

We wanted to let you know that we **do not offer travel medicine services**, including vaccinations and pre-travel consultations.

---

### **Why we don't offer travel medicine**

Travel medicine is a specialized field that requires specific expertise and up-to-date knowledge on global health risks, vaccination requirements, and preventative measures for various international destinations. Our practice focuses on general family healthcare, and we believe it's best for our patients to receive specialized care from clinics dedicated to travel health.

---

### **Travel clinics are your best option**

For all your travel health needs, we strongly recommend visiting a dedicated **travel medicine clinic**. These clinics specialize in providing comprehensive travel health advice, administering necessary vaccinations, and prescribing appropriate medications to ensure your health and safety abroad. They have the most current information on outbreaks, entry requirements, and region-specific health concerns.

---

### **Coverage for travel medicine services**

Please be aware that **travel medicine services, including consultations and most travel-related vaccinations, are not covered by MSP** (Medical Services Plan). You should expect to pay out-of-pocket for these services at a travel clinic. It's a good idea to check with the travel clinic directly about their fees and payment options.

---

Thank you for your understanding.
