

# Harshanth Srinivasan

Designer-builder. I think, design, prototype, build in React, and ship, and I've designed AI systems that do the work without a human in the loop. Owns outcomes, not just screens.

## EXPERIENCE

---

**UI/UX Intern, Airbus India** Mar 2026 - Present  
*Bengaluru, KA*

- Ran usability reviews of enterprise internal tools with Airbus flight test engineers, observing real sessions to find workflow friction in dense, data-heavy interfaces and turning it into prioritized design work.
- Redesigned legacy flight test applications by restructuring information architecture and standardizing navigation patterns across screens that had drifted over years of ad hoc additions.
- Redesigned a bookmarking surface after user conversations revealed the card layout I was briefed to build wasn't what people wanted; shipped a combined pattern instead, cards with the option to pin items to the navbar, serving both the spec and the observed need.
- Worked cross-functionally with product owners to pressure-test feasibility, converting wireframes and iterations into an implementation-ready backlog rather than designs that die in Figma.

**Product Design Intern, Sasefied** Jun 2024 - Aug 2025  
*London, UK (Remote)*

- Led end-to-end design of IAMReadyAI as the sole designer, working directly with the founder to ship a live, AI-agent-native recruiting platform from concept to release.
- Designed the first versions of two autonomous AI agents that did the work a user used to do by hand: give the system the input you already have, it sources and ranks in the background. Defined how a person reads, trusts, and acts on what the agent surfaces.
- Designed the semantic scoring UI to make AI output legible, breaking one opaque match score into per-skill confidence so a human could audit the machine's reasoning.
- Designed 50+ screens across web and mobile on a design system I built from scratch, then moved fluidly into React to build production frontend rather than handing specs across a wall.
- Co-created with the founder and engineering from day one, defining UX requirements early and staying in through release rather than throwing designs over a wall.

**Website Designer, Vibrance, VIT Chennai** Jan 2025 - Mar 2025  
*Chennai, TN (Remote)*

- Designed and shipped the official Vibrance site, which served 35.65k visits and 56.68k page views across the event cycle.

**UI/UX Intern, Jivan Health** Jun 2024 - Aug 2024  
*Chennai, TN (Remote)*

- Redesigned the main website to improve user experience and reduce bounce rate by 25 percent through better navigation and information hierarchy.
- Created user flows and wireframes for two new products, focusing on intuitive UX and modern UI patterns.

## SKILLS

---

**Design:** Product Design, UI/UX Design, Design Systems, Interaction Design, Interactive Prototyping, Wireframing, User Flows, Information Architecture, User Research, Usability Testing, Responsive Design, Motion Design

**Tools:** Figma, Framer, Rive, Adobe After Effects, Blender, Cinema 4D, Three.js

**Build:** React, MERN Stack, HTML, CSS, JavaScript, MySQL

**AI-Native:** Claude, GPT, Claude Code / Cursor for prototyping and frontend; shipped design for autonomous agents and model explainability

## LEADERSHIP

---

**Head of Media, The Linux Club, VIT Chennai** Jun 2023 - Aug 2025  
Led media and design strategy for a 500+ student body, building visual systems for technical events.

**Design Lead, Diseño** Jun 2023 - Jun 2024  
Led creative direction for campus events with 1000+ attendees; built feedback processes that improved design turnaround 25 percent.

## EDUCATION

---

**Vellore Institute of Technology, Chennai** Jun 2026  
B.Tech, Mechanical Engineering

**Certifications:** Google UX Design Professional Certificate
