

COBASEKRM ROADMAP 2025

Get to know the roadmap of product development for CoBaseKRM. CoBaseKRM is a powerful framework for managing your data, analytical work, and other knowledge assets. CoBaseKRM Roadmap 2025 contain forward-looking statements for future releases of the CoBaseKRM platform.

- **Quarter 1 - 2025 | Enable 21 CFR Part 11 compliance for users**
 - Enhanced uploading workflow to support approvals with electronic signatures
 - Specification range limits for parameters will include notifications of outlying data
 - Management of python scripts containing models and metrics tracking
- **Quarter 2 - 2025 | Improve model metrics features**
 - Enhancements to model metrics features
 - Management of user-defined template to support more flexible experimentation
 - Reusable Wiki templates for experiments to guides users to record relevant information
- **Quarter 3 - 2025 | Power Transform feature, beta version**
 - Power Transform feature leverages LLM technology, and is considered an experimental feature
 - Transform unstructured spreadsheets to structured data format to enable reuse and searchability of historical data for modeling
 - Users validation of transformed data to ensure data integrity
- **Quarter 4 - 2025 | Release candidates Power Transform & Recipe Similarity**
 - Improved Power Transform on user feedback and support for automated parameter matching
 - Recipe Similarity enables comparison of factors across experiments for the discovery of new designs of experiments
