

Rippled Chair

ABOUT

Rippled is a deeper dive into the non-Euclidean processes explored in *Wilkinson & Rivera's Baile collection*. Inspired by the look and feel of ribbon, their aim was to create a controlled flowing design. To achieve these undulating forms, they quarter and reconfigure a stock of wood. The result embodies the deconstruction of the rigid qualities of timber, as they're permitted to make amazing shapes with minimal loss of material whilst retaining structural integrity.
