

Just as phonetics translates sound into written language, FNTKS translates a designer's abstract vision into the precise language and specs a factory can execute.

Every project gets the right specialist, not a generalist stretched thin. FNTKS matches vetted technical designer or **overseeing the work end-to-end - concept through factory-ready production.**

/ WHAT WE DO /

01

Tech Pack Development

One executable document: BOM, construction detail, POM and grading a factory can build from without guessing.

02

Patternmaking

Flat pattern development and grading, built from draping and tuned for repeatable production.

03

CLO 3D & Digital Sampling

Virtual fit and photoreal samples that cut physical iterations before the fabric is even touched.

04

Design Direction

Creative and technical direction across a range, from concept through to production-ready line.

05

Factory Liaison

Direct communication through sampling and pre-production, keeping construction intent intact to the last stitch.

06

Technical Illustration

Flats, orthographic CADs and callouts carrying every construction decision.

/ SELECTED WORK / 26 /

ORIM Athletics

1 SAMPLE ROUND TO PO · ZERO DELAYS

Tiered jersey system from construction audit to factory-ready specs across a multi-style pipeline. Captured multiple B2B PO from first sample

TOKO5

DESIGN & DEVELOPMENT LEAD

End-to-end design and development lead for Wycliff Palus's Japanese streetwear startup, concept through sampleing.

Aegitec

CONCEALED-CARRY FOCUSED R&D

Retainer partner building technical concealed-carry apparel and accessories.

Rockstar Originals

FAST-TURNAROUND RETAINER

Ongoing retainer partner, prioritised turnaround across recurring seasonal drops.
