UI/UX Designer

sagarmahato0073@gmail.com | +91 7001763809 | Bengaluru, India

## SUMMARY

UI/UX Designer focused on building clean, functional products anchored in logic and intentionality. I have a solid grasp of the end-to-end process, from user research and information architecture to interactive prototyping and high-fidelity UI. Whether I'm defining a design system or refining a user flow, I prioritize a minimalist aesthetic and a seamless experience that scales across web and mobile.

## WORK EXPERIENCE

Internify

Jan 2025 - June 2025

### UI/UX Design Intern

As a UI/UX design intern, I worked on user research, wireframing, prototyping, and UI improvements across projects. I focused on creating intuitive experiences with attention to detail, while collaborating with teams and adapting to feedback throughout the process.

## PROJECTS

Emote

Jan 2026 - March 2026

### Web Design and Development

As a product designer and developer, I built Emote to bridge the gap between emotional context and visual execution. I architected the end-to-end product logic, utilizing NLP to translate text prompts into data-driven color systems and typography pairings. My focus was on creating a high-efficiency tool that replaces manual exploration with an automated, justified design framework.

## EDUCATION

Kristu Jayanti University

Aug 2024 - Present

### Bachelor of Computer Applications

Studying Computer Applications(BCA), developing skills in software development, computer programming, and software systems.

Ranchi University

Aug 2022 - April 2024

### Intermediate

Completed upper secondary education at Ranchi University, Jharkhand, within the Science stream.

## KEY SKILLS

- UI/UX Strategy
- Wireframing
- Prototyping
- Design Systems
- User Research
- Interaction Design
- Usability Testing
