

India's #1 Emission Control Device

→ Automoto Retrofit Emission Control Device (RECD)

→ Automoto Dual Fuel Kit (DFK)

Powering India's Shift to Cleaner Energy

Future-ready emission and dual-fuel solutions by Automoto, built for India.

Automoto is driving India's transition toward cleaner, compliant, and sustainable energy solutions. Our flagship products - Automoto RECD and Automoto DFK - help businesses, industries, and institutions keep their diesel generators compliant without costly replacements.

With 4000+ installations nationwide, Automoto has earned its reputation for trust, reliability, and environmental leadership. Every solution is built for Indian conditions - durable, field-tested, and certified by CPCB, iCAT & CAQM.

We don't just sell products; we deliver confidence - ensuring your gensets meet current norms, avoid penalties, and operate responsibly under evolving government standards.

Automoto RECD & DFK Solutions

Compliance, performance & trust built into every solution.

RECD Retrofit Emission Control Device

The Automoto Retrofit Emission Control Device (RECD) transforms your existing diesel gensets into emission-compliant systems — without costly replacements. Designed using advanced Catalytic Oxidation and Filtration Technology, RECD reduces harmful pollutants at the exhaust stage with measurable results:

Key Reductions

- PM: 99.21%
- CO: 95.90%
- Smoke: 98.92%
- HC: 79.24%

✓ Custom sizing available on request

✓ 20 kVA - 3000kVA

DFK Duel Fuel Kit

DFK retrofits your existing diesel generator to run on a controlled blend of diesel and natural gas, maintaining performance while cutting diesel consumption and emissions.

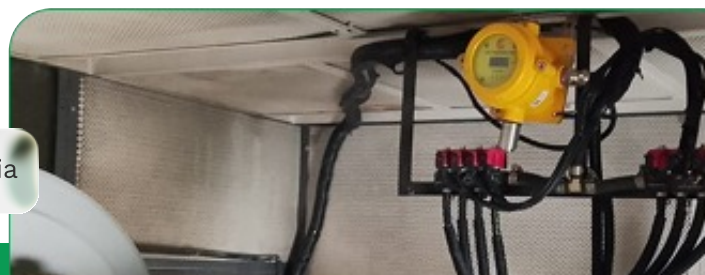

Headline Outcomes

- Up to 70% reduction in diesel consumption
- Lower NOx/PM/greenhouse gases versus diesel-only operation
- Optimized diesel:gas ratio ~25:75 while maintaining rated power and load response

🏆 ICAT-Certified → No risk of rejection

🌍 4000+ compliant systems running across India

Trusted by Leaders Across India

Proven, certified, and widely adopted — Automoto is the industry standard for emission control and fuel savings.
