

Discover the Best Figma Plugins

Explore a curated list of 150+ best Figma plugins to elevate your design process and enhance creativity.

By Guruprakash Adimulam

Welcome

As a UI/UX Designer or Product Designer, you know how much time and energy goes into crafting seamless user experiences. Over the years, working extensively in the design field and with Figma, I've come across countless plugins—some helpful, some not so much. That's why I decided to curate a list of 150+ Figma plugins that can truly enhance your workflow, streamline repetitive tasks, and help you design smarter, not harder.

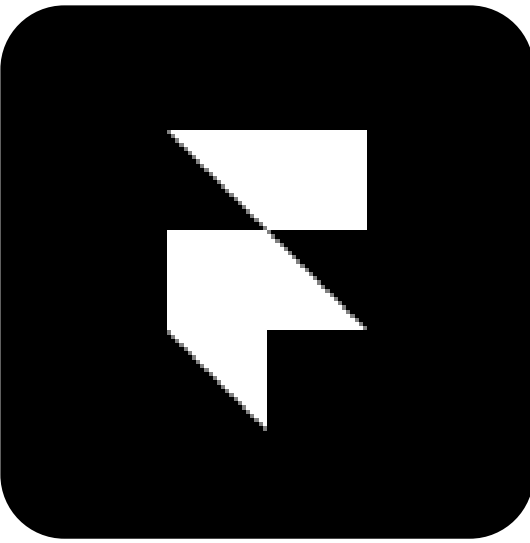

This eBook is designed to be your go-to resource—a toolkit to boost productivity, spark creativity, and make your design process smoother and more efficient. Whether you're just starting out or deep into your design journey, there's something valuable here for everyone.

Figma to HTML with Framer

Converts Figma designs into HTML using Framer.

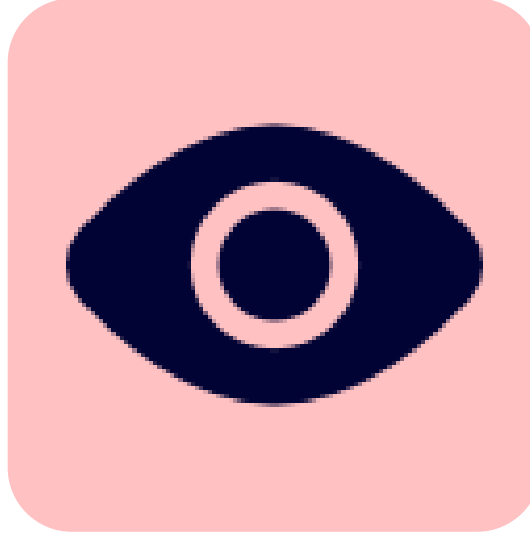

Emailify - HTML Email Builder

Build responsive HTML emails directly in Figma.

Map Maker

Generate customizable maps directly in Figma.

Color Blind

Simulate color blindness in your designs to check accessibility.

Image Tracer

Convert raster images into vector images.

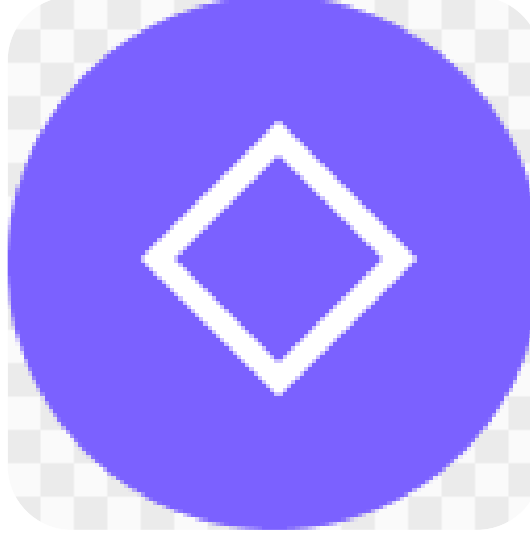

Flaticon by Freepik

Access and insert Freepik's collection of icons directly into your Figma designs with ease.

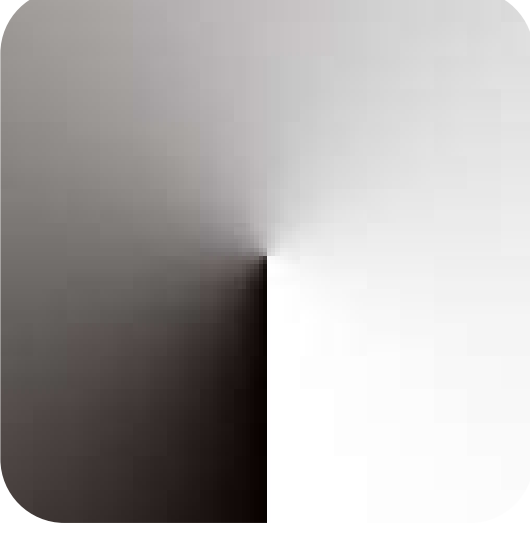

Roast

Get instant feedback and constructive criticism on your designs from a community of designers.

Instance Finder

Find and select all instances of a component in your design file effortlessly.

Dark Mode Magic

Automatically switch your design or components to dark mode with this plugin's magic conversion.

Export to GIF/Video

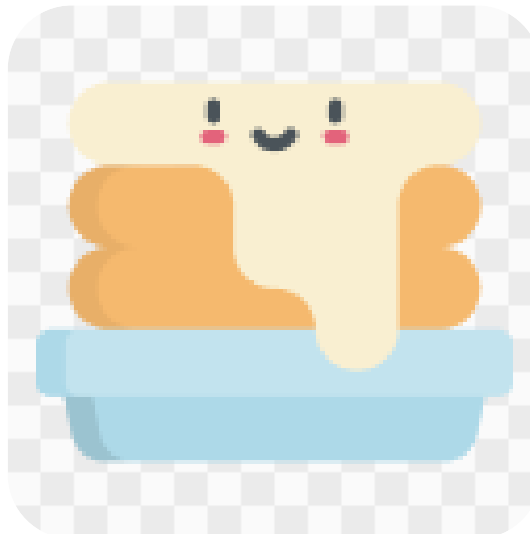

Export your Figma designs directly to GIFs or videos, perfect for sharing interactive prototypes.

Discover the Best Figma Plugins

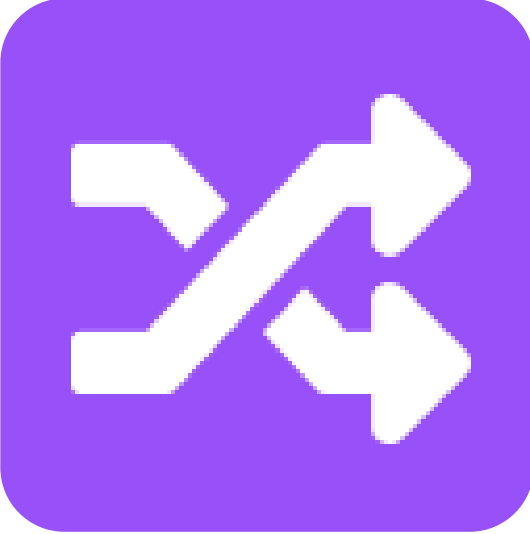

Remove Background Privacy First

Removes image backgrounds with privacy-focused processing.

Pitchdeck Presentation Studio

Create stunning presentations using Pitchdeck templates in Figma.

Property Randomizer

Randomize properties such as colors, sizes, and positions.

Dominant Color Toolkit

Extract dominant colors from images for your designs.

Typescales

Create and manage consistent type scales in designs.

AI Image Generator by Freepik

Generate AI-powered images using Freepik’s tool and insert them into your Figma designs instantly.

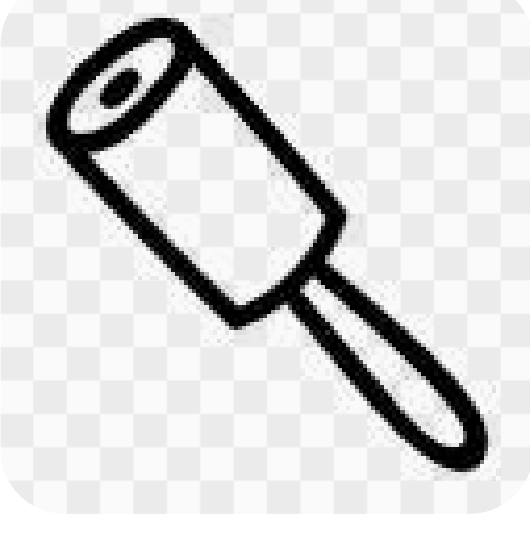

Jony Eye Figma Design Assistant

AI-powered design assistant that helps you by suggesting improvements and repetitive tasks.

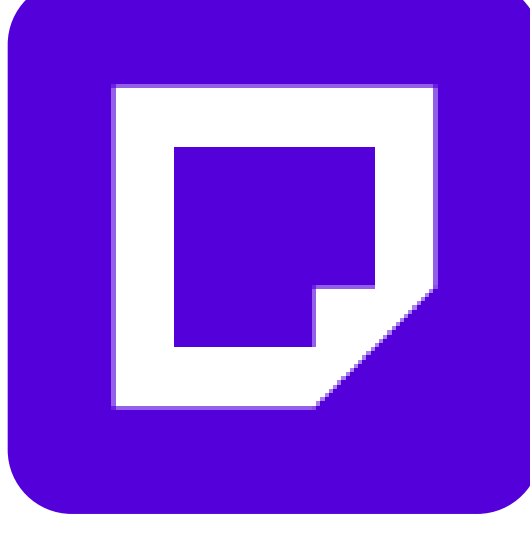

Ghost UXWriter

An AI-powered assistant to help with UX writing tasks and copy suggestions.

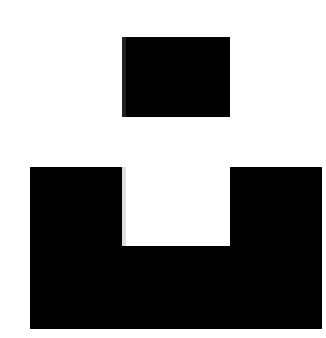

Roller Design Linter

Identify and fix inconsistencies in your design with this linting tool for maintaining design quality.

QoQo AI - UX Personas & Mapping

Generate AI-powered UX personas, journey maps, and sitemaps to speed up your design process.

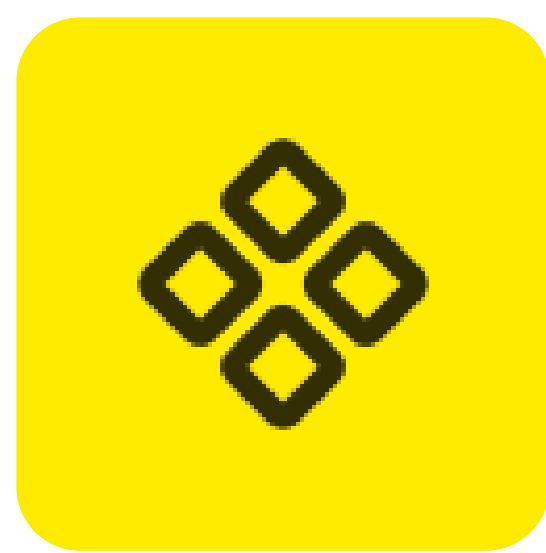

Unsplash

Search and insert high-quality images from Unsplash.

Assign Color Value to Text

Assign specific color values to text layers with ease.

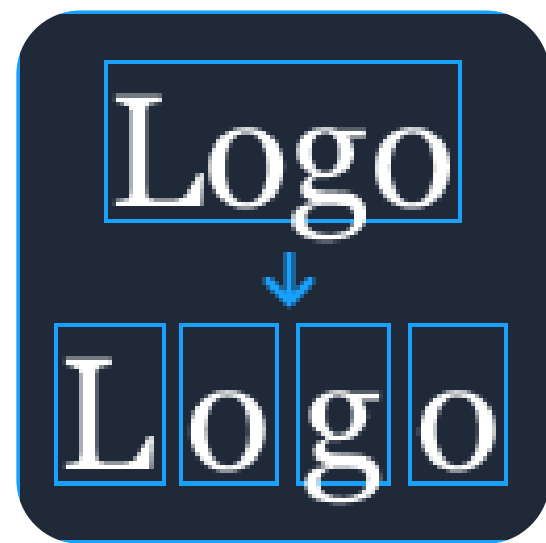

Component Utilities

Manage and organize your Figma components with ease.

Supa Palette

Create and manage color palettes effectively.

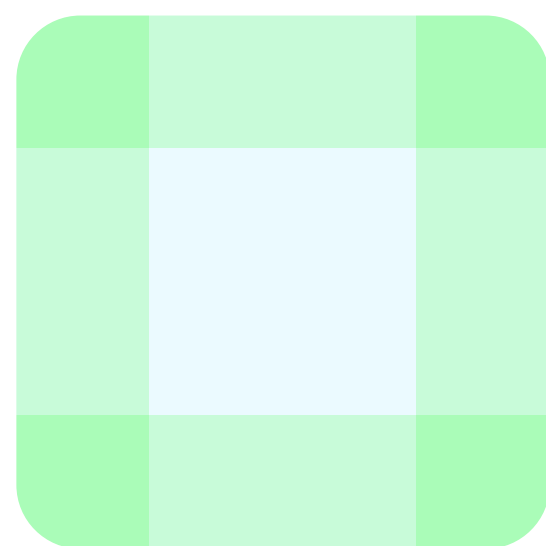

Text Splitter

Split text into individual characters or words.

Proper Title Case

Automatically convert text to proper title case for consistency in headings and text elements.

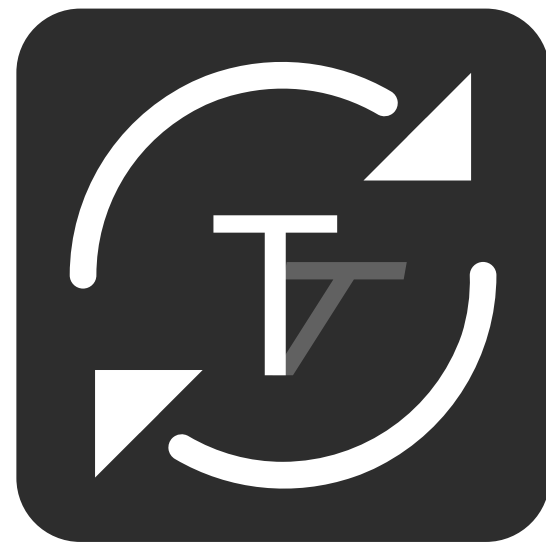

Grids Generator

Generate customizable grids for your Figma designs, aiding with layout consistency and alignment.

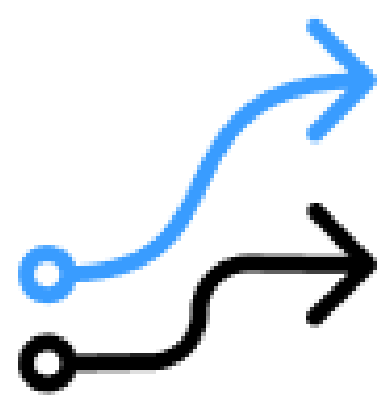

Handy Components

Access a library of hand-drawn style components for quick design mockups.

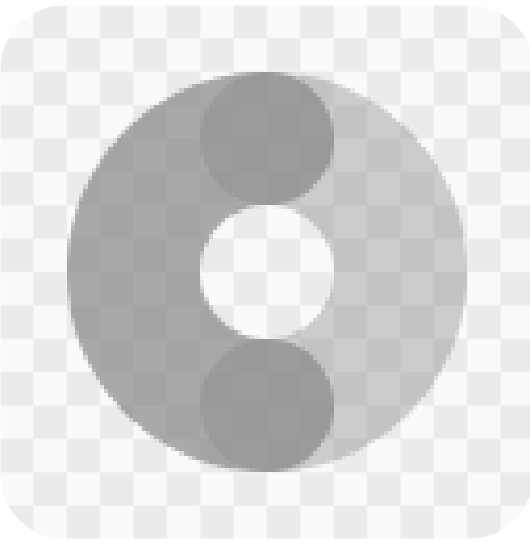

Rich Text Replacer

Replace text elements in bulk across your Figma design with advanced formatting and text options.

Protoflow

Create interactive flowcharts and user flows in Figma to map out your design processes easily.

Use Contrast

Check contrast ratios and ensure accessible designs.

Coolors

Generate beautiful color palettes for your designs.

Ease Isometric

Create isometric illustrations easily in Figma.

Color Compass

Generate color variations based on a base color.

Rename It

Batch rename layers, frames, and components in bulk.

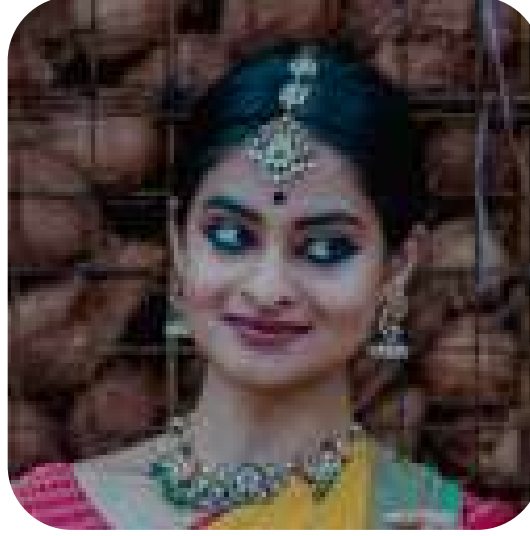

PagePilot

Organize and navigate Figma pages effortlessly with advanced sorting and filtering options.

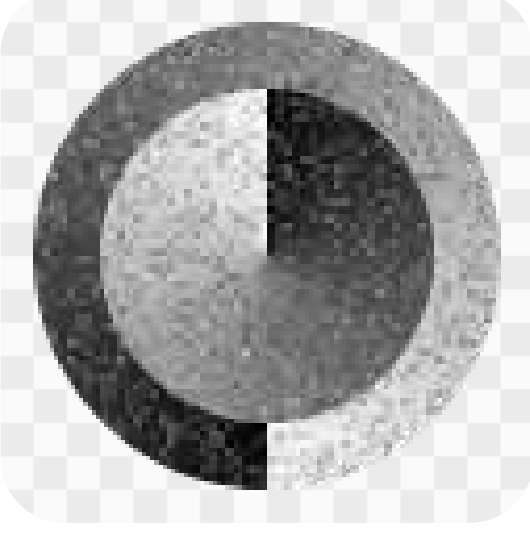

Simple ChatGPT Plugin

Use the power of GPT in Figma to generate quick design feedback and suggestions.

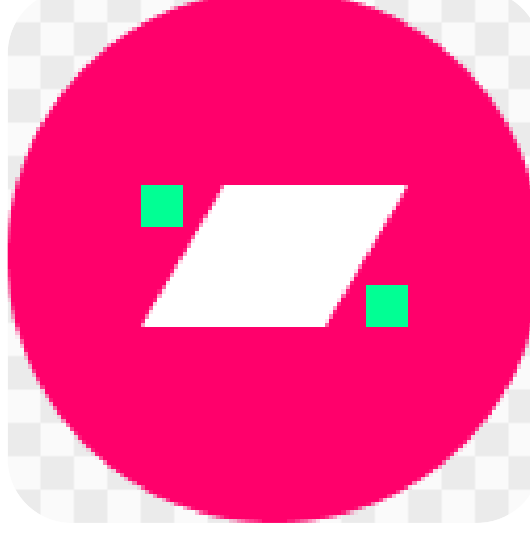

Indian Persona

Create realistic user personas based on Indian demographics for UX research and design.

Noise Texture

Add realistic noise textures to your designs, providing a more organic feel.

Skewdat

Skew and manipulate Figma elements easily with this plugin, offering unique design flexibility.

Discover the Best Figma Plugins

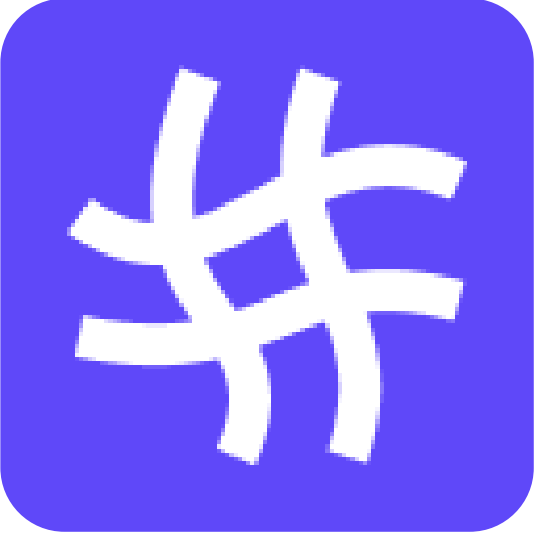

HTML to Design

Import websites (HTML/CSS) into Figma designs.

Lorem Ipsum

Quickly add placeholder text to your designs.

Warp It

Warp and bend elements in Figma to create unique effects.

Threshold

Create dynamic images by applying threshold effects.

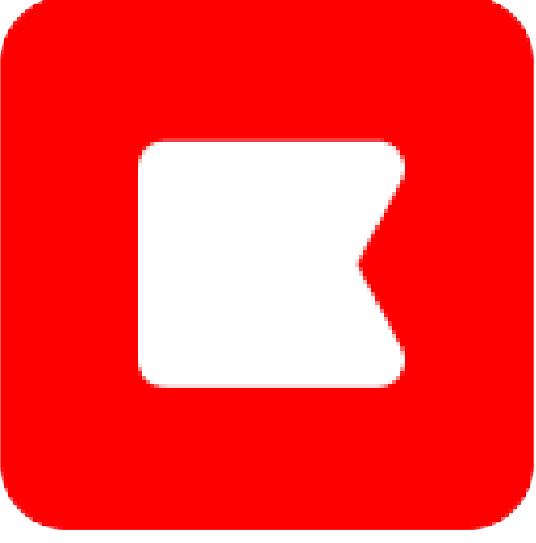

Contento

Add placeholder content in different categories to your designs.

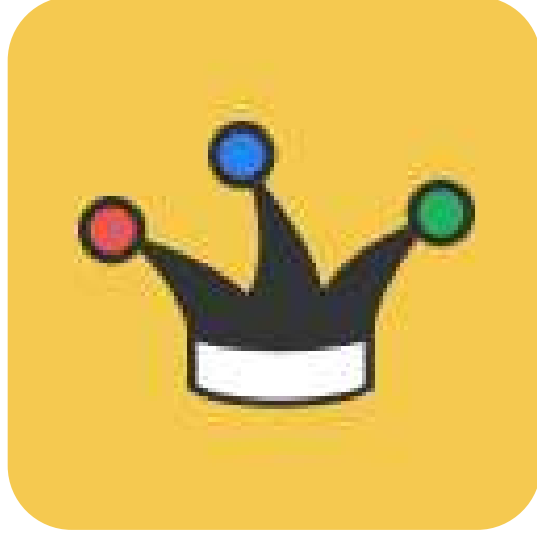

Hues Gradients

Create, manage, and apply beautiful gradients to your designs quickly and easily.

Views

Quickly toggle between different views or layouts within your design files for efficient collaboration.

Faker

Generate fake user data like names, emails, and addresses for prototyping and testing.

Find and Replace

Find and replace text elements in your Figma designs efficiently, just like in traditional text editors.

Cloneify

Clone design elements and components across your Figma projects to maintain consistency effortlessly.

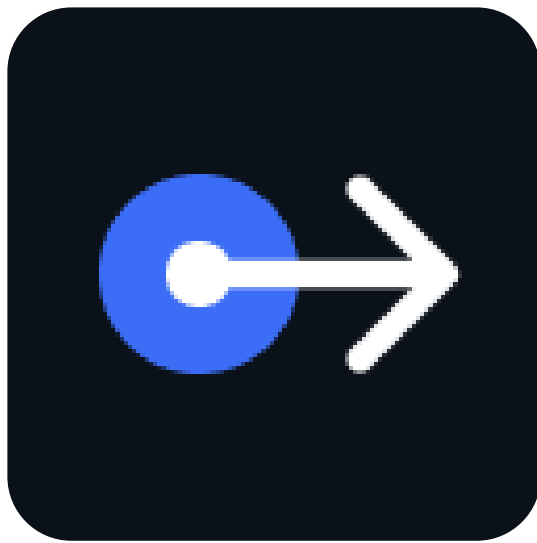

Brandfetch

Automatically fetch brand assets and logos.

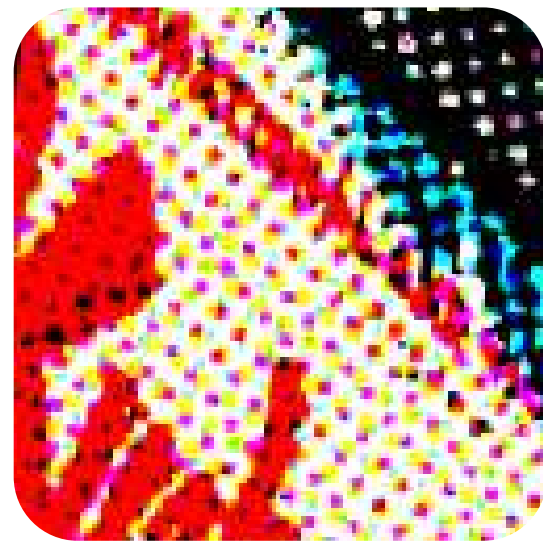

TinyImage Compressor

Compress images to reduce file size without losing quality.

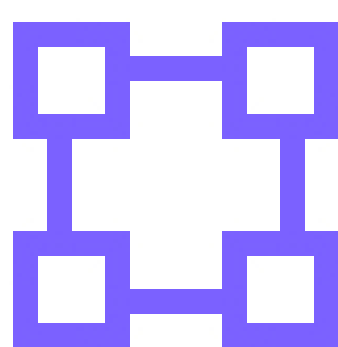

Autoflow

Draw flow lines between screens to visualize user journeys.

Halftones

Apply halftone effects to your designs.

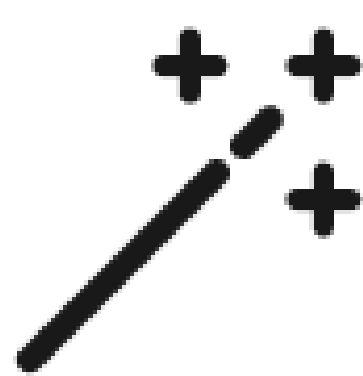

Select Similar

Quickly select similar objects or layers based on properties.

Tracking Plan Companion

Keep track of key metrics and trackable actions in your design process for better product management.

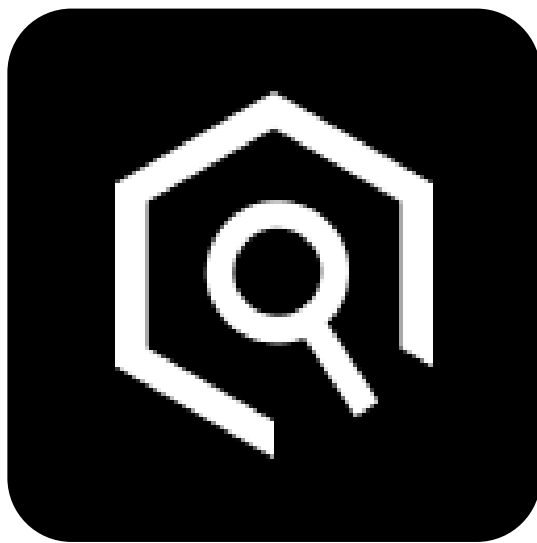

Figma AutoName

Automatically rename layers, groups, and frames in Figma based on customizable rules.

Better File Thumbnails

Customize and create visually appealing thumbnails for your Figma files to improve organization.

Variables Inspector

Inspect and manage Figma variables directly within your designs, improving your workflow.

RTL Layout

Adjust and preview right-to-left (RTL) layouts in your Figma designs for different languages.

Font Swap

Quickly replace fonts across your Figma design.

Sparkliner

Generate simple sparkline charts to visualize data.

Anima — Figma to Code

Convert Figma designs into responsive React, HTML, or Vue code.

Looper Legacy

Automate repetitive tasks for creating patterns and loops.

Animated GIF Maker

Create animated GIFs directly from your Figma designs.

LazyPDF

Export your Figma designs to PDF easily with this plugin for better presentation and sharing.

Text Fill

Fill your text layers with sample content.

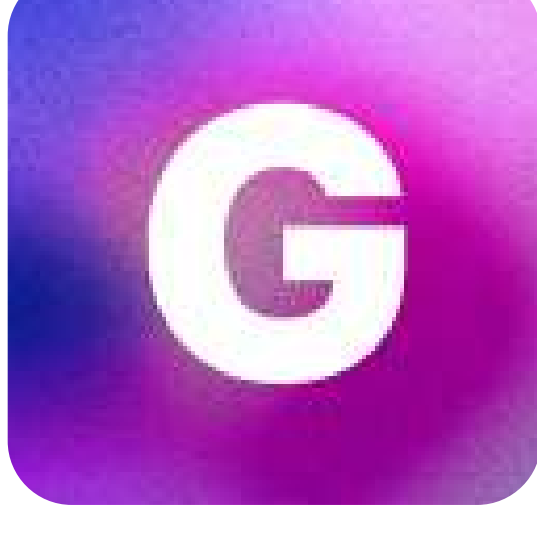

Print for Figma

Prepares your Figma designs for print with options like CMYK, bleed, crop marks, and DPI settings.

Simple Noise

Add subtle noise textures to your designs to achieve a more textured and organic look.

Grainy Gradient

Create beautiful grainy gradients directly in Figma, enhancing design with trendy, textured gradients.

Discover the Best Figma Plugins

LottieFiles

Export animations from Figma to Lottie.

Feather Icons

Use simple and clean Feather icons in your designs.

Lummi

Generate simple, customizable illustrations.

Morph

Create smooth morphing animations between shapes.

Mockup Plugin

Add various mockups for devices, print materials, and AI art.

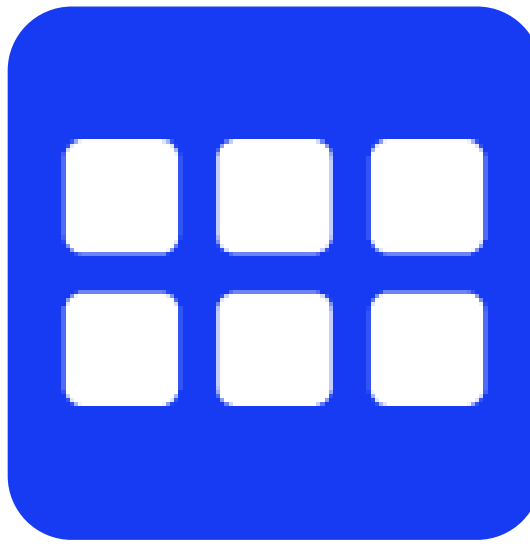

Clueify

Perform UX audits and gather feedback by tracking usability clues directly in your Figma files.

Mesh Gradient

Create beautiful mesh gradients effortlessly.

Sort on Canvas by Name

Organize and sort layers or frames on your Figma canvas based on their names.

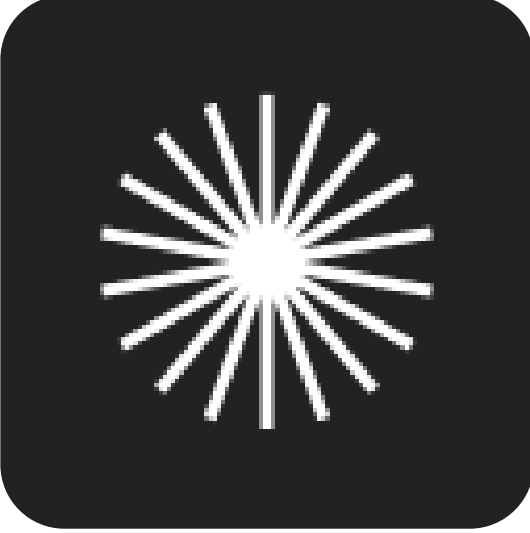

Super PDF

Generate PDFs from your Figma designs with customizable options.

Clean Document

Organize your Figma file by automatically cleaning up unused layers, guides, and empty groups.

Cloner

Clone components and maintain their original properties.

Streamline Icons, Illustrations, and Emoji

Get access to a comprehensive UI/UX icon library.

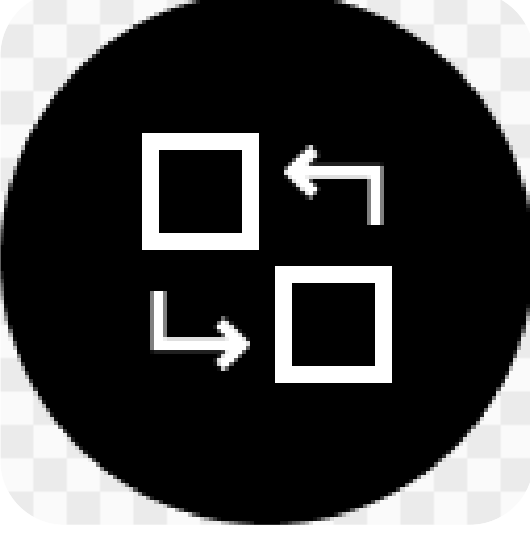

Figma to Website

Convert Figma designs directly into responsive websites.

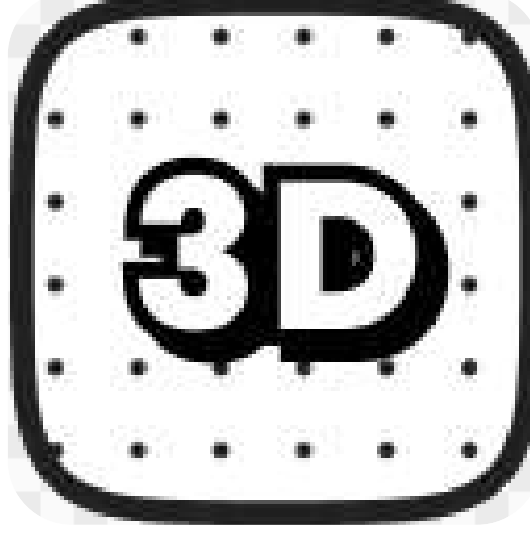

Noise

Add customizable noise effects to designs.

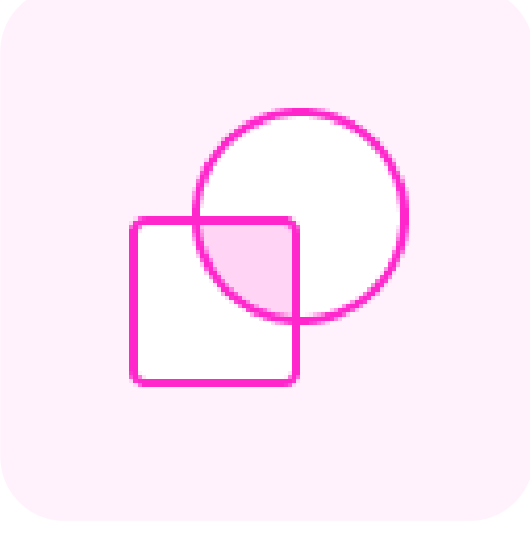

Swap

Swap instances of components in bulk.

3D Transformer

Add 3D transformation effects to objects in Figma, giving them a new dimension and visual depth.

Wire Box

Draw wireframes quickly and easily for rapid prototyping.

Organize Layers

Automatically organize and group layers in Figma for cleaner and more structured design files.

Scribble

Add hand-drawn or scribble-like elements to your designs for a more casual and creative look.

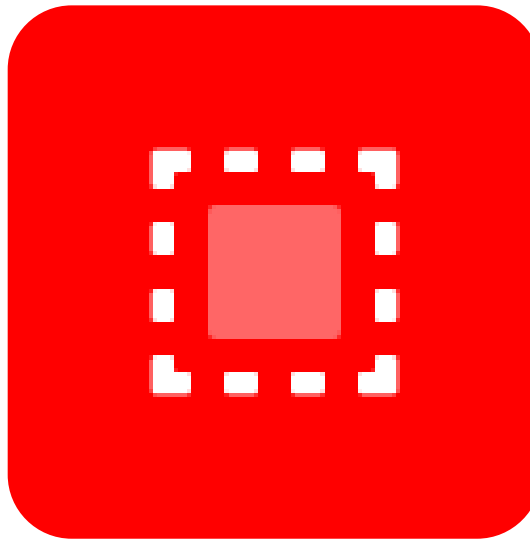

Spectrum

Generate color scales, gradients, and palettes to enhance your design systems.

Noisy Gradients

Generate noisy gradient textures to enhance designs.

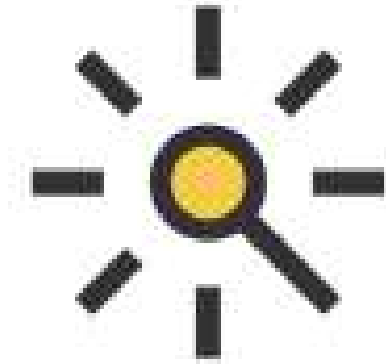

Redlines

Create redlines to specify design measurements for developers.

Ally - Color Contrast Checker

Check your design's color contrast for accessibility.

Filter Effects

Apply CSS-like filter effects to images.

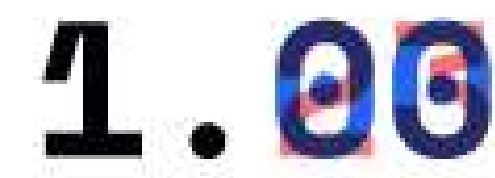

Figmotion

Create animations directly within Figma.

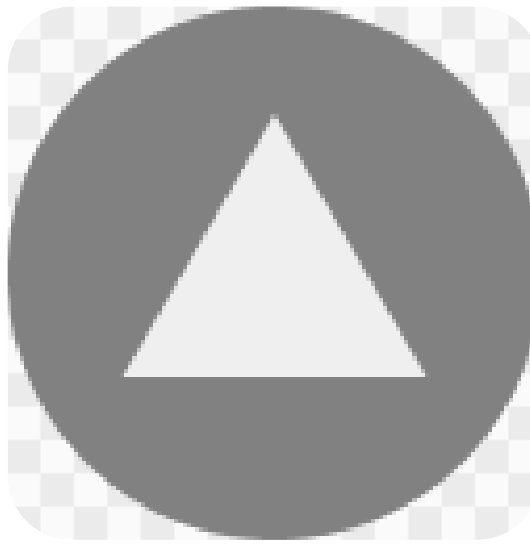

Bookmarks

Save and organize important parts of your design file by bookmarking key pages or frames in Figma.

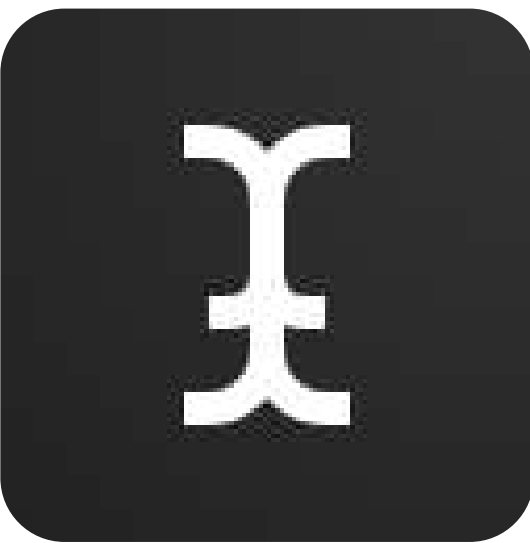

Roundall

Easily create rounded or circular shapes for your designs in one click.

Keyboard Scrolling

Navigate Figma files more efficiently by enabling scrolling using keyboard shortcuts.

Layer Renamer

Batch rename layers and groups in Figma for improved organization and better workflow.

Supa Gradient

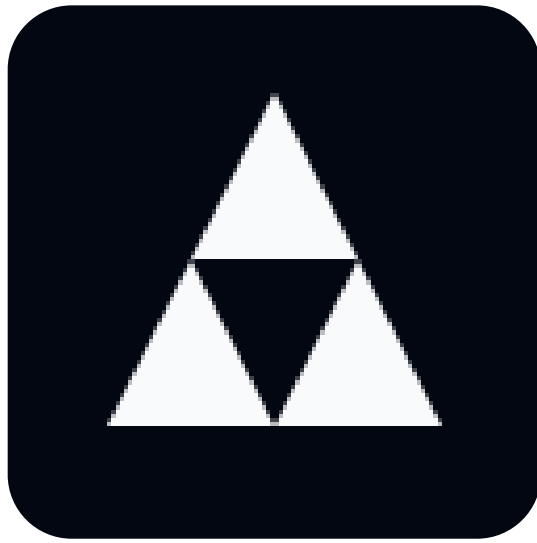

Create complex, multi-color gradients with ease to add vivid transitions and depth to your designs.

Discover the Best Figma Plugins

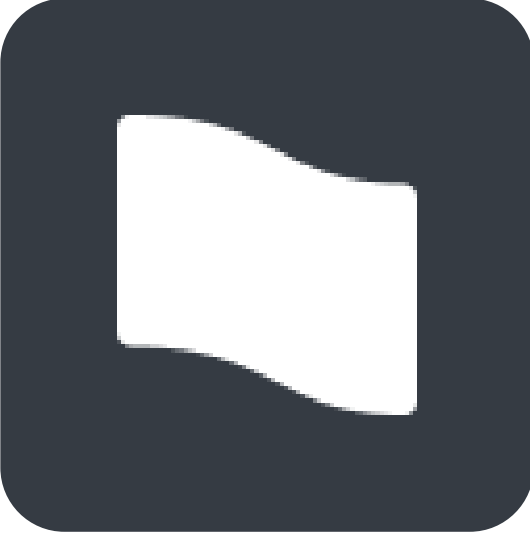

Material Design Icons

Access and use Material Design icons directly in Figma.

Arranger

Arrange objects and layers in neat grids or circles.

Flags

Add country flags into your design mockups.

EightShapes Specs

Create detailed design specs for developers.

Better Font Picker

Easily pick and preview fonts within Figma.

Photos by Freepik

Quickly insert high-quality photos from Freepik’s library directly into your Figma projects.

LottieLab Figma to Lottie Animation

Convert Figma designs to Lottie animations, making your designs interactive and engaging.

Ghost

Create a transparent ghost effect on images or objects within Figma.

Viewport Size Calculator

Calculate and preview viewport sizes in real-time for different devices and screen resolutions.

Cube GPT UX AI Assistant

Utilize AI to generate UX personas, journey maps, sitemaps, and copywriting from within Figma.

Discover the Best Figma Plugins

Remove BG

Removes backgrounds from images quickly.

Musho AI

Generate AI-powered design suggestions and content within Figma.

Similayer

Select similar layers based on properties like color or stroke.

Chromatic Figma

Organize color palettes and manage colors easily.

Change Font

Quickly change fonts in your designs.

Wavy Lines

Easily create wavy line patterns to use as backgrounds or decorative elements in your design projects.

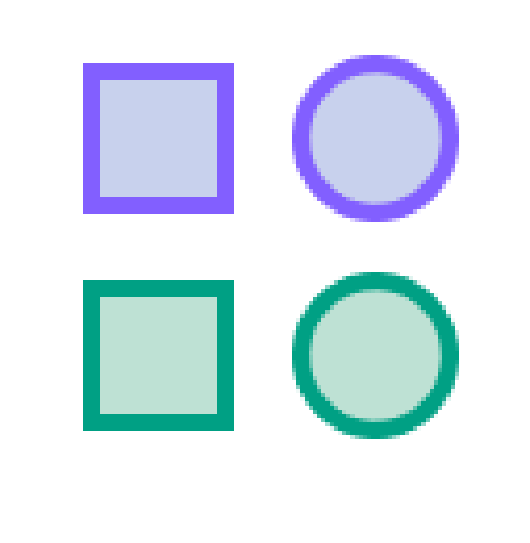

UI Table Builder

Build complex, responsive tables and grids in Figma, without needing to design each element manually.

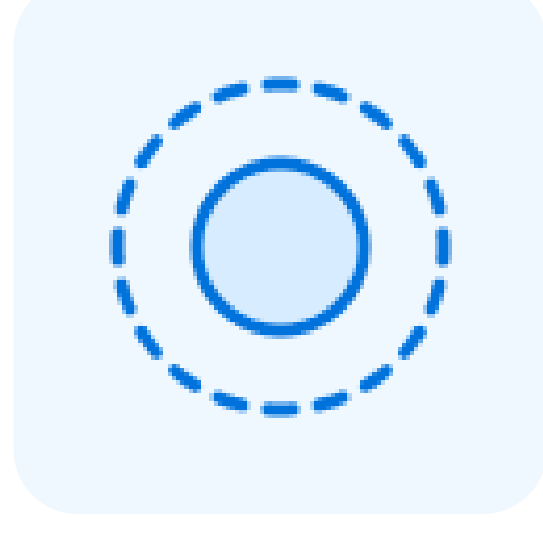

All Hands Mockup Generator

Generate high-quality mockups using diverse hands and devices for presentations.

Simple Sort

Quickly sort layers, frames, and objects in Figma by name or custom criteria for better organization.

Outline

Add sharp and customizable outlines to your Figma elements to help define shapes and structure.

Easometric

Create 3D isometric illustrations easily in Figma.

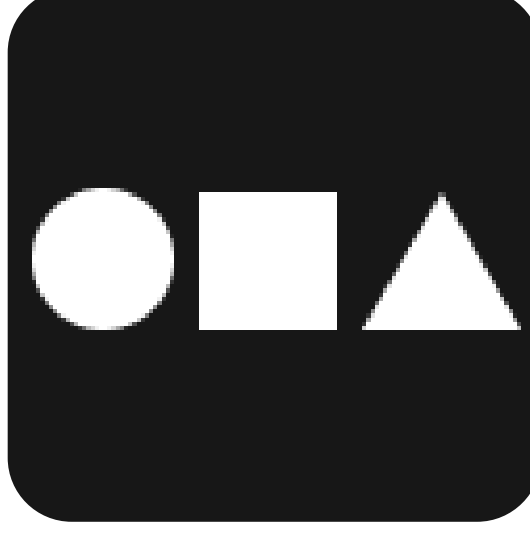

Stark - Contrast & Accessibility Checker

Checks color contrast and accessibility issues in your design.

Blobs

Generate unique organic blob shapes for your designs.

Style Manager

Manage and clean up your design styles.

Font Preview

Preview different fonts directly on your text elements.

Regressor Auto Instance Creator

Automate instance creation in your Figma designs to maintain consistency and save time.

Populate

Quickly fill your design elements with real data, helping to visualize how your designs perform in real life.

Frame Tags

Organize your designs with customizable frame tags for better categorization.

Any App Finder

Easily find and switch between apps while working in Figma for a smoother workflow.

UX Quotes

Get daily inspirational UX quotes that can help boost your design thinking and creativity.

Discover the Best Figma Plugins

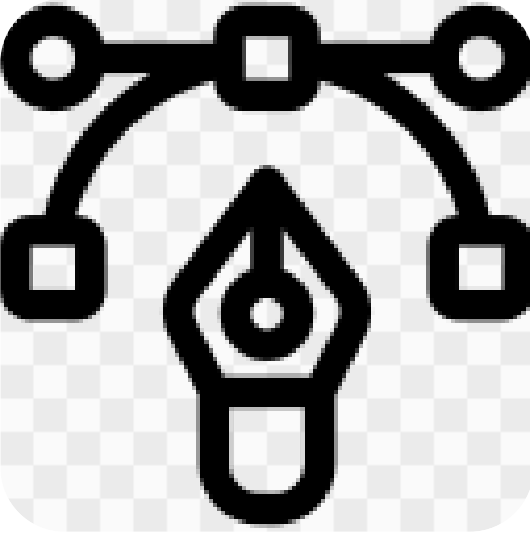

Data to Design

Design using data from Google Sheets, CSV, Airtable, or Notion.

UI Faces - Free AI Avatars

Insert AI-generated avatars into your design mockups.

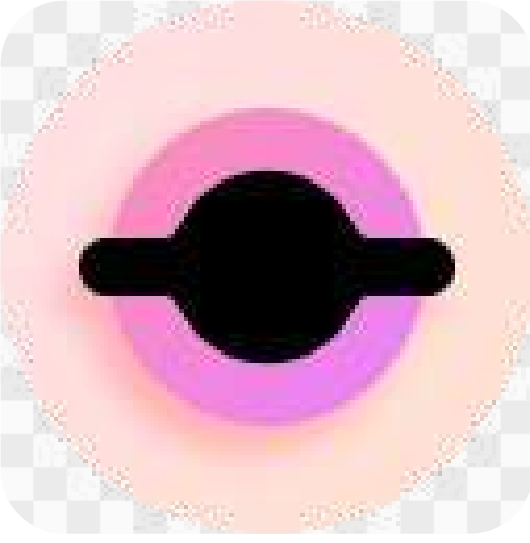

PasteSVG

Paste and convert SVG graphics directly into Figma.

Dark Vader

Automatically convert your designs to dark mode.

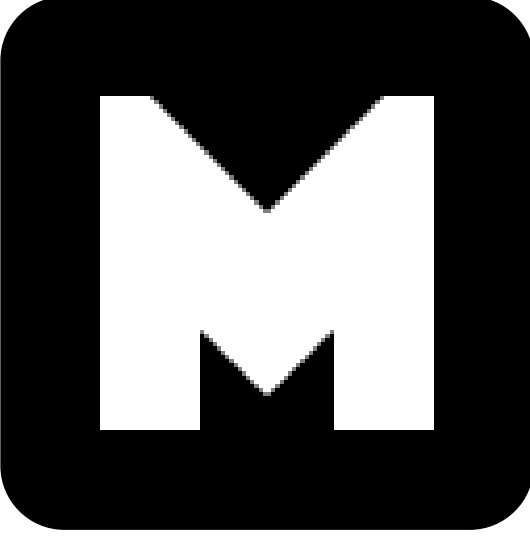

Breakpoints

Create responsive layouts by setting breakpoints.

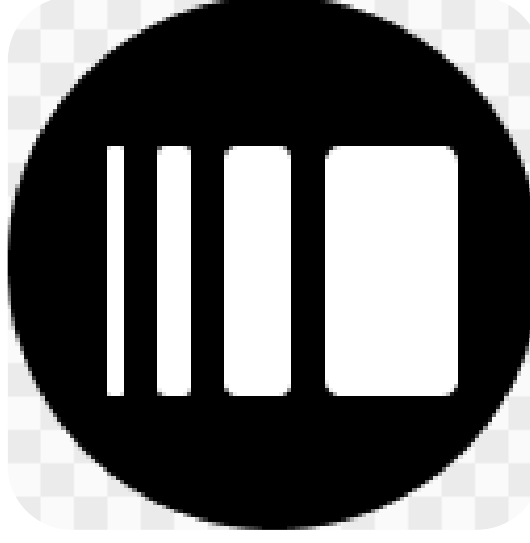

Frontitude UX Content Management

Manage and edit UX content directly within Figma, syncing with Frontitude for workflows.

Master

A master controls plugin that allows you to sync styles, components, and layouts across your Figma files.

Responsify

Preview your designs at different screen resolutions to check for responsiveness.

Easy Proto

Create quick and easy interactive prototypes in Figma with simple and intuitive tools.

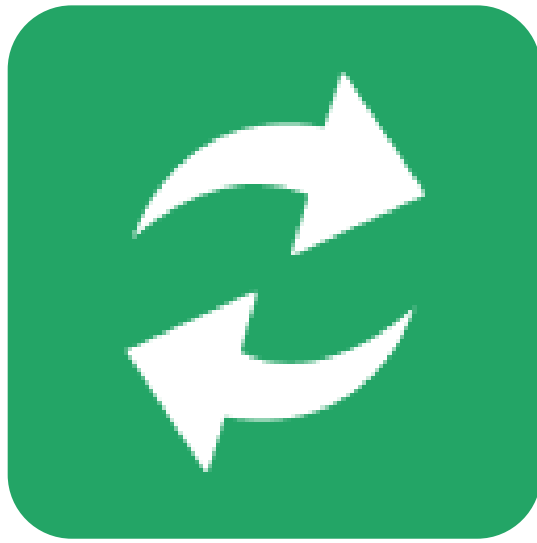

ThumbOrg

Effortlessly generate thumbnails and organize Figma pages systematically.

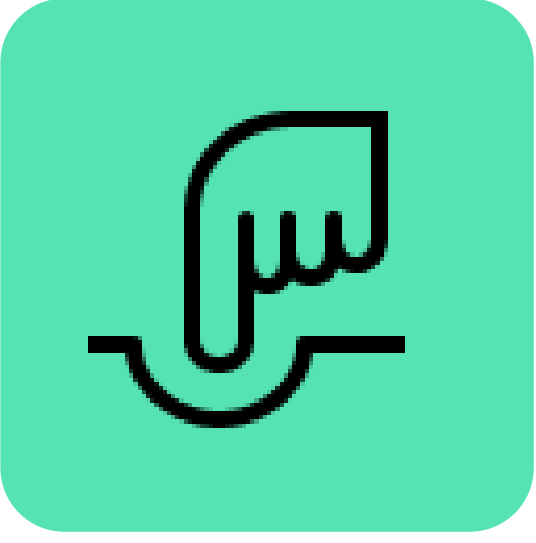

Batch Styler

Style multiple elements in batches to save time.

Google Sheets Sync

Sync data from Google Sheets into your Figma designs.

Warp Tools

Distort, warp, and bend layers in creative ways.

Image Editor

Edit images directly within Figma.

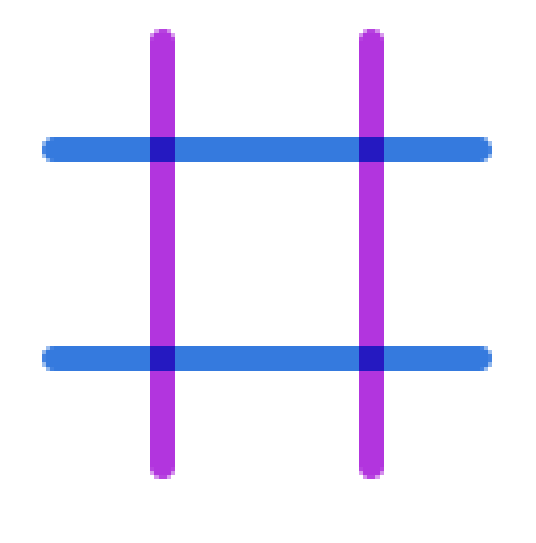

Design Lint

Automatically find and fix design inconsistencies.

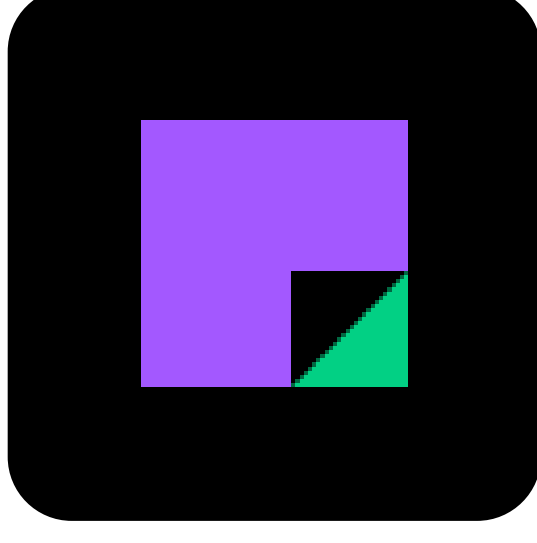

Sizze Figma to Native (Powered by AI)

Convert your Figma designs into native apps powered by AI for a fast and seamless transition.

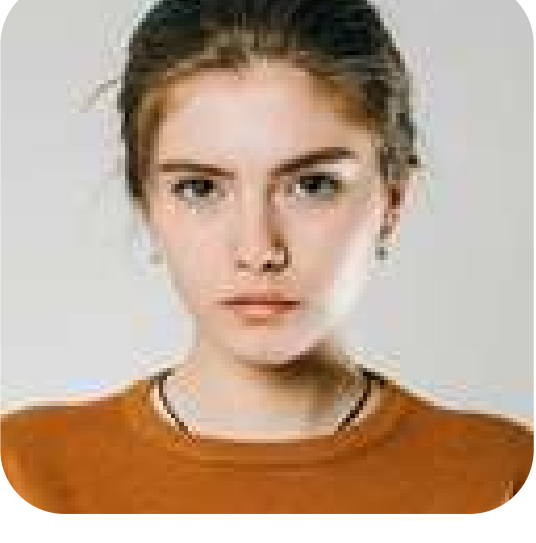

Name Layers

Automatically name layers in your Figma file for better organization and easier navigation.

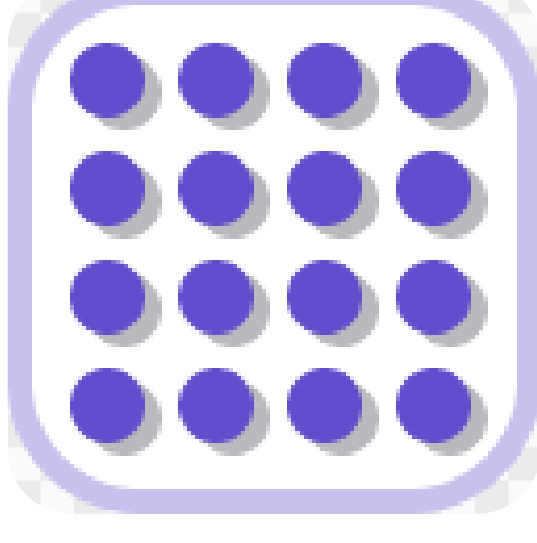

Sticky Notes

Add digital sticky notes to your design files for brainstorming or feedback.

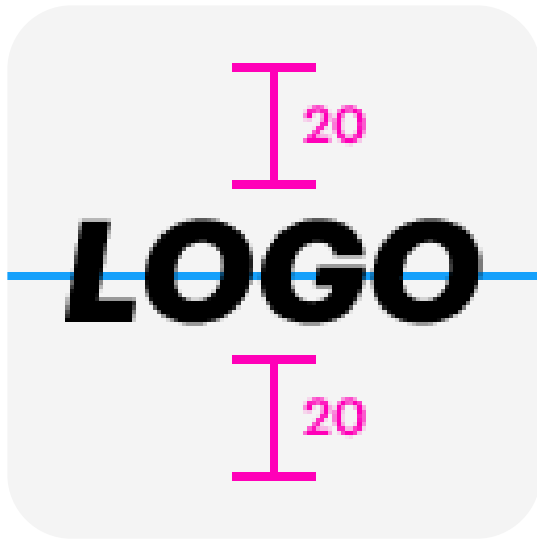

User Profile Avatar

Generate customizable user profile avatars for use in your mockups and projects.

Variant Organiser

Manage and organize Figma variants to keep your design system clean and easy to navigate.

Logo Layout

Create logo grids and layouts effortlessly.

Charts

Create customizable charts and graphs in Figma.

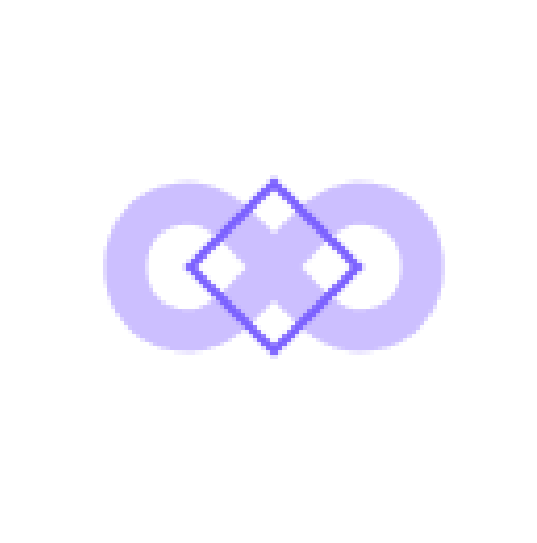

Arrow Auto

Create arrows automatically to illustrate flows and connections.

Oblique

Skew and distort shapes and objects in your designs.

GetAll

Export all assets and files in your project in one click.

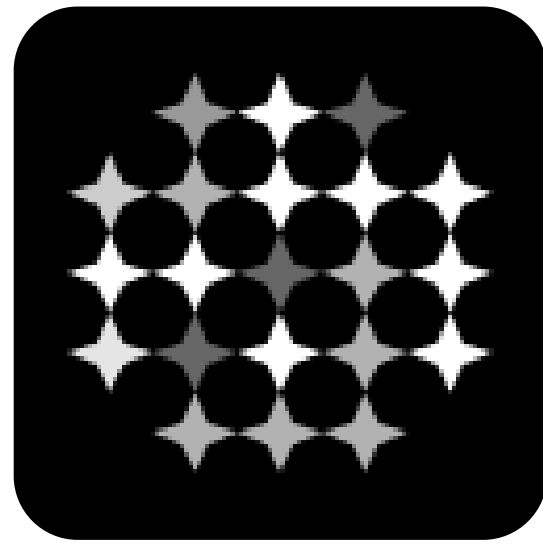

Rain Drop Effect

Add rain drop effects to your designs for a unique visual touch.

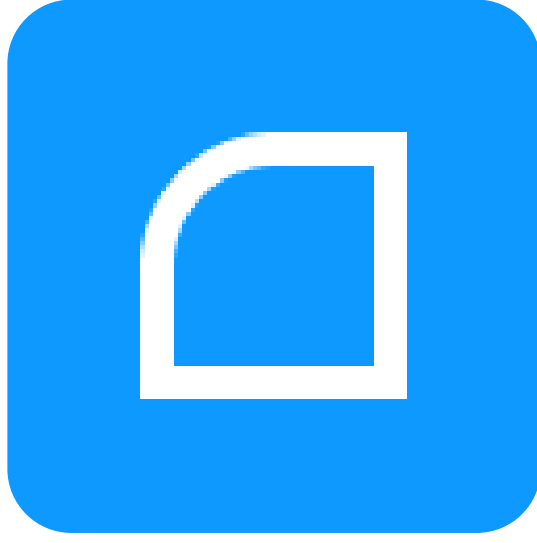

Nisa Text

Generate and insert Lorem Ipsum text in different languages.

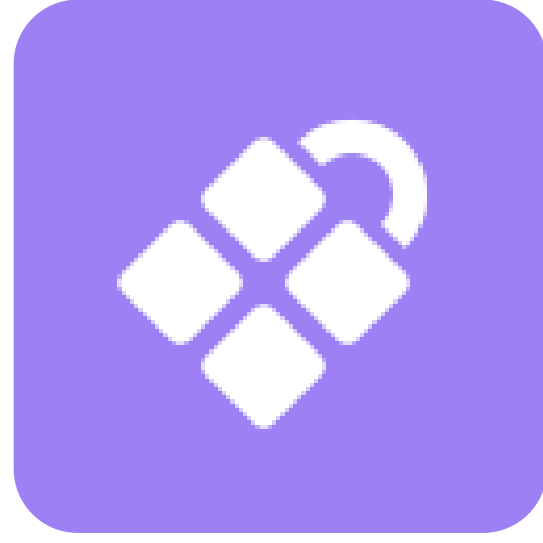

Pattern Hero

Generate unique, customizable patterns to use in your design projects quickly and easily.

Styles to Variables Converter

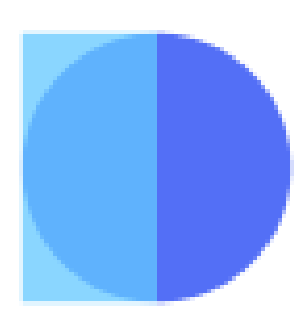

Convert Figma styles to variables automatically for better design system management.

Safely Delete Components

Safely delete unused components and assets in your Figma file without affecting the design.

Discover the Best Figma Plugins

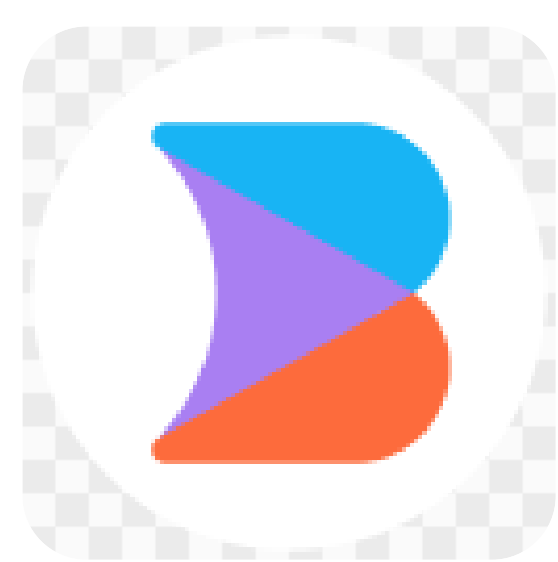

Deck

Create presentation slides directly in Figma.

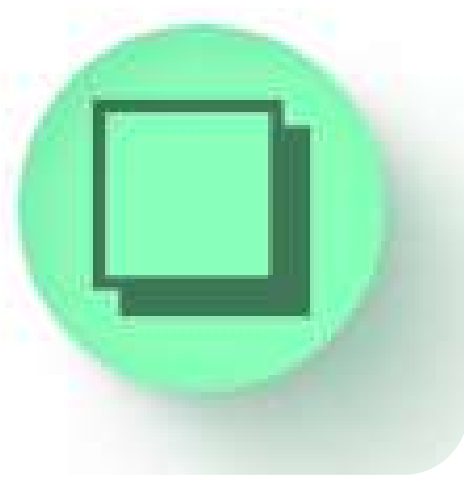

Iconify

Access over 100,000 icons from popular libraries.

Builder.io — AI-powered Figma to Code

Automatically convert Figma designs to React, Vue, and Tailwind code.

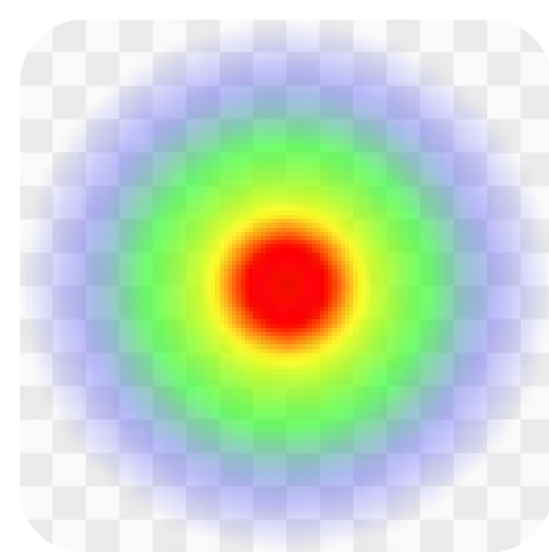

Shadow Maker

Easily create custom shadows for your designs.

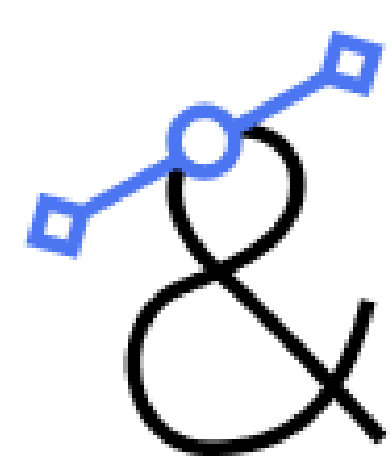

Artboard Mockups

Add device mockups to your artboards for presentation.

NB Heatmap

Generate heatmaps within Figma to visualize user interaction data and improve UX designs.

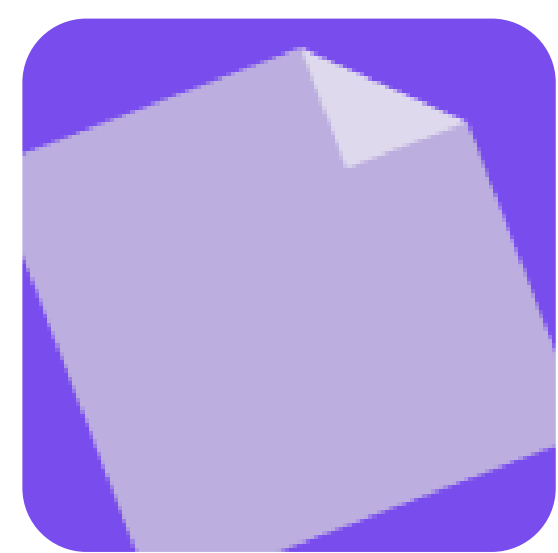

Wave Urve

Add wave effects to text or shapes.

FigPug: Profile Generator

Automatically generate user profile images for mockups using randomly generated avatars.

Pages Organizer

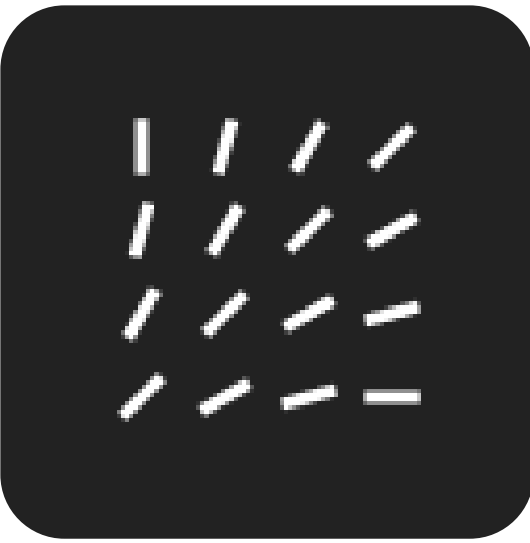

Organize your Figma pages more effectively by sorting and categorizing them automatically.

SVG Motion

Animate your SVG graphics with smooth, custom transitions to bring life to your designs.

Discover the Best Figma Plugins

Generista

Auto-generate design variations with predefined rules.

Font Awesome Icons

Insert Font Awesome icons into your design projects.

Auto Style Sheet

Automate style sheet creation for your designs.

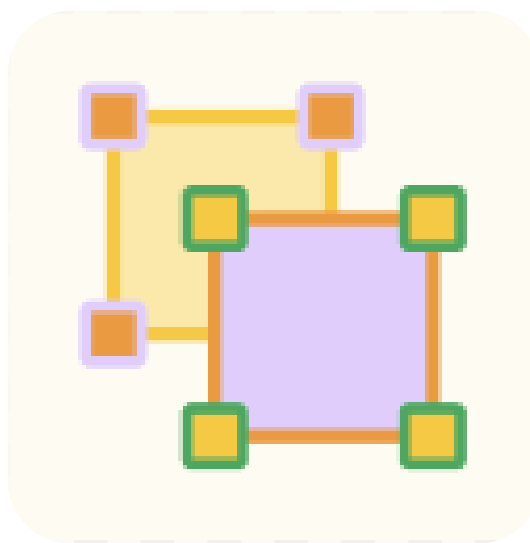

Duotones

Apply duotone effects to images.

Writer for Figma

A built-in writing assistant for Figma.

Framehop

Quickly navigate between Figma frames and pages with this intuitive frame-hopping tool.

Easing Gradients

Generate smooth gradient transitions in your designs.

Word Counter

Counts the number of words and characters in selected text layers for better text management.

RenameGPT

Automatically rename layers and frames in Figma using AI to follow best naming practices.

Find and Replace Colors

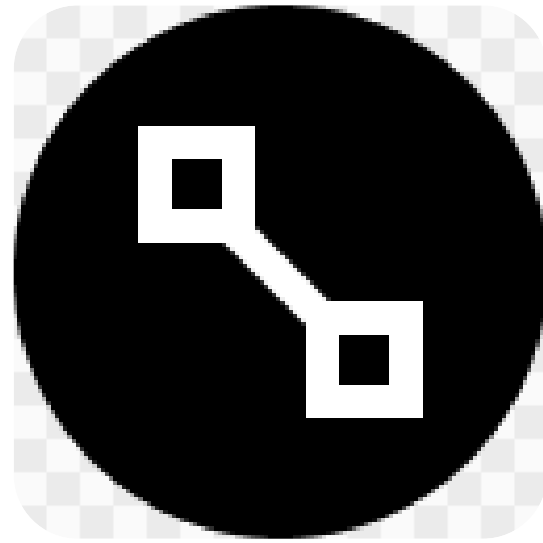

Quickly find and replace colors across your Figma file to maintain consistency.

Discover the Best Figma Plugins

Beautiful Shadows

Create beautiful, soft shadows for your design elements.

Measure

Measure distances and elements directly in Figma.

PDF to Design

Import PDF files directly into Figma for editing.

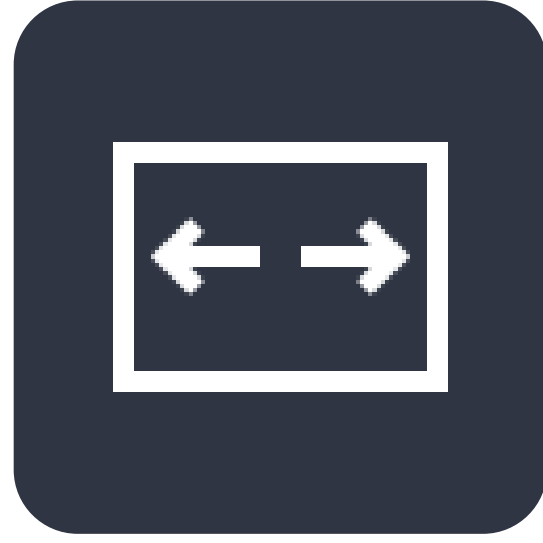

Rough

Create rough, hand-drawn style elements.

Clay Mockups 3D

Add 3D clay mockups to your Figma projects.

Button Resizer

Resize buttons in your Figma designs uniformly and easily with this handy tool.

Figma - Map Maker

Create and customize maps directly within Figma.

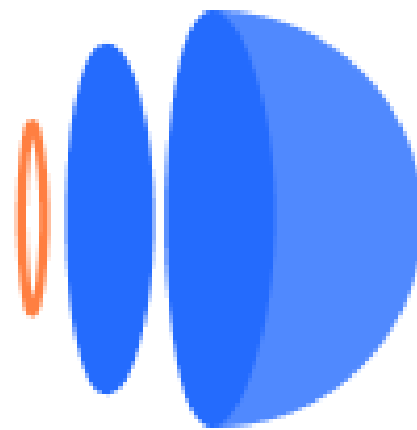

Design System Organizer

Organize, manage, and categorize design system components for easier access and better efficiency.

Chart BG

Create background charts and data visualizations easily for infographics and design projects.

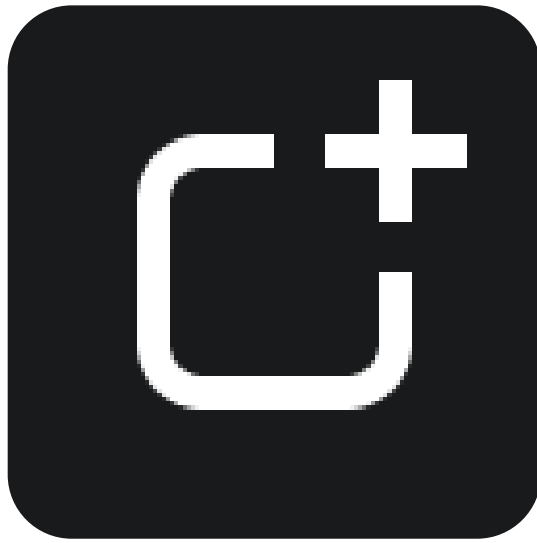

Figma to Dora

Easily publish interactive 3D websites with zero code, directly from Figma to Dora's platform.

Fractal Glass Effect

Adds stunning fractal glass effects to your Figma designs.

Page Automator

Automatically organize your Figma pages and artboards.

Accessible Color Palettes

Generate accessible color palettes for your designs.

Figmaoji

Add fun emojis to your designs directly from Figma.

Arc - Bend Your Type

Easily create curved or bent typography.

Insert Big Image

Insert large images into your Figma projects without quality loss using this plugin.

Detach Component

Quickly detach instances from their parent component to make modifications.

Figma Chat

Collaborate with your team by chatting within the Figma app in real-time while working on designs.

AutoLayout All

Apply auto layout settings to multiple layers in Figma in one click for faster design adjustments.

Trace Images

Automatically trace and convert raster images to vector, giving you editable and scalable versions.

The End

Thank you for exploring this curated collection of Figma plugins. I hope it brings more ease, efficiency, and inspiration to your design process. Design is ever-evolving, and having the right tools at your fingertips can make all the difference.

If you found this resource helpful, feel free to share it with your fellow designers. And if you come across any hidden gem of a plugin that's not in here—I'd love to hear from you!

Keep designing. Keep growing.
