

## Surgical gowns

### Properties:

Surgical gowns provide high protection from body fluids as well as infection.

Gowns are made from non-linting nonwoven hydrophobic material SMMMS or SPUNLACE, with antistatic treatment. Both materials are breathable and comfortable to wear.

Gowns are of a tie-round type and fastened by the four tie system to keep the wearer aseptic.

Sewn-in sleeves are finished with knitted elastic cuffs, the upper seam of sleeves is done by ultrasonic welding, as well as ties.

**Surgical gowns with reinforcement** – are equipped with a liquid proof material SBPE at both the front side and on sleeves. Although the material is laminated, it is breathable and provides high level of protection.

Neck Colour Differentiation indicates Gowns' liquid resistance:

<b>Blue</b>	low fluid contact surgery
<b>Yellow</b>	middle fluid contact surgery
<b>Green</b>	middle and high fluid contact surgery
<b>Red</b>	long-lasting and high fluid contact surgery

### PRIMA

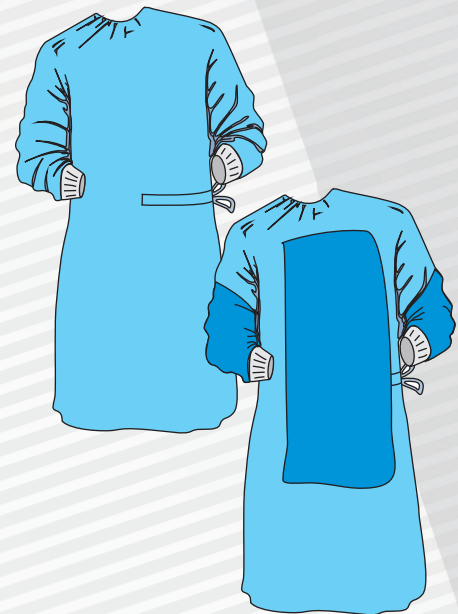

Made of hydrophobic non-woven textile SMS.

Size	PRIMA Ref	PRIMA Reinforced Ref	Length (cm)
M	354523-S	354623-S	115
L	354533-S	354633-S	125
XL	354543-S	354643-S	135
XXL	354553-S	354653-S	145
XXL-XL	354563-S	354663-S	160

### CLASSIC

Made of hydrophobic non-woven textile SMMMS.

Size	CLASSIC Ref	CLASSIC Reinforced Ref	Length (cm)
M	351023-S	351123-S	115
L	351033-S	351133-S	125
