SETUP GUIDE

CODL STORAGE

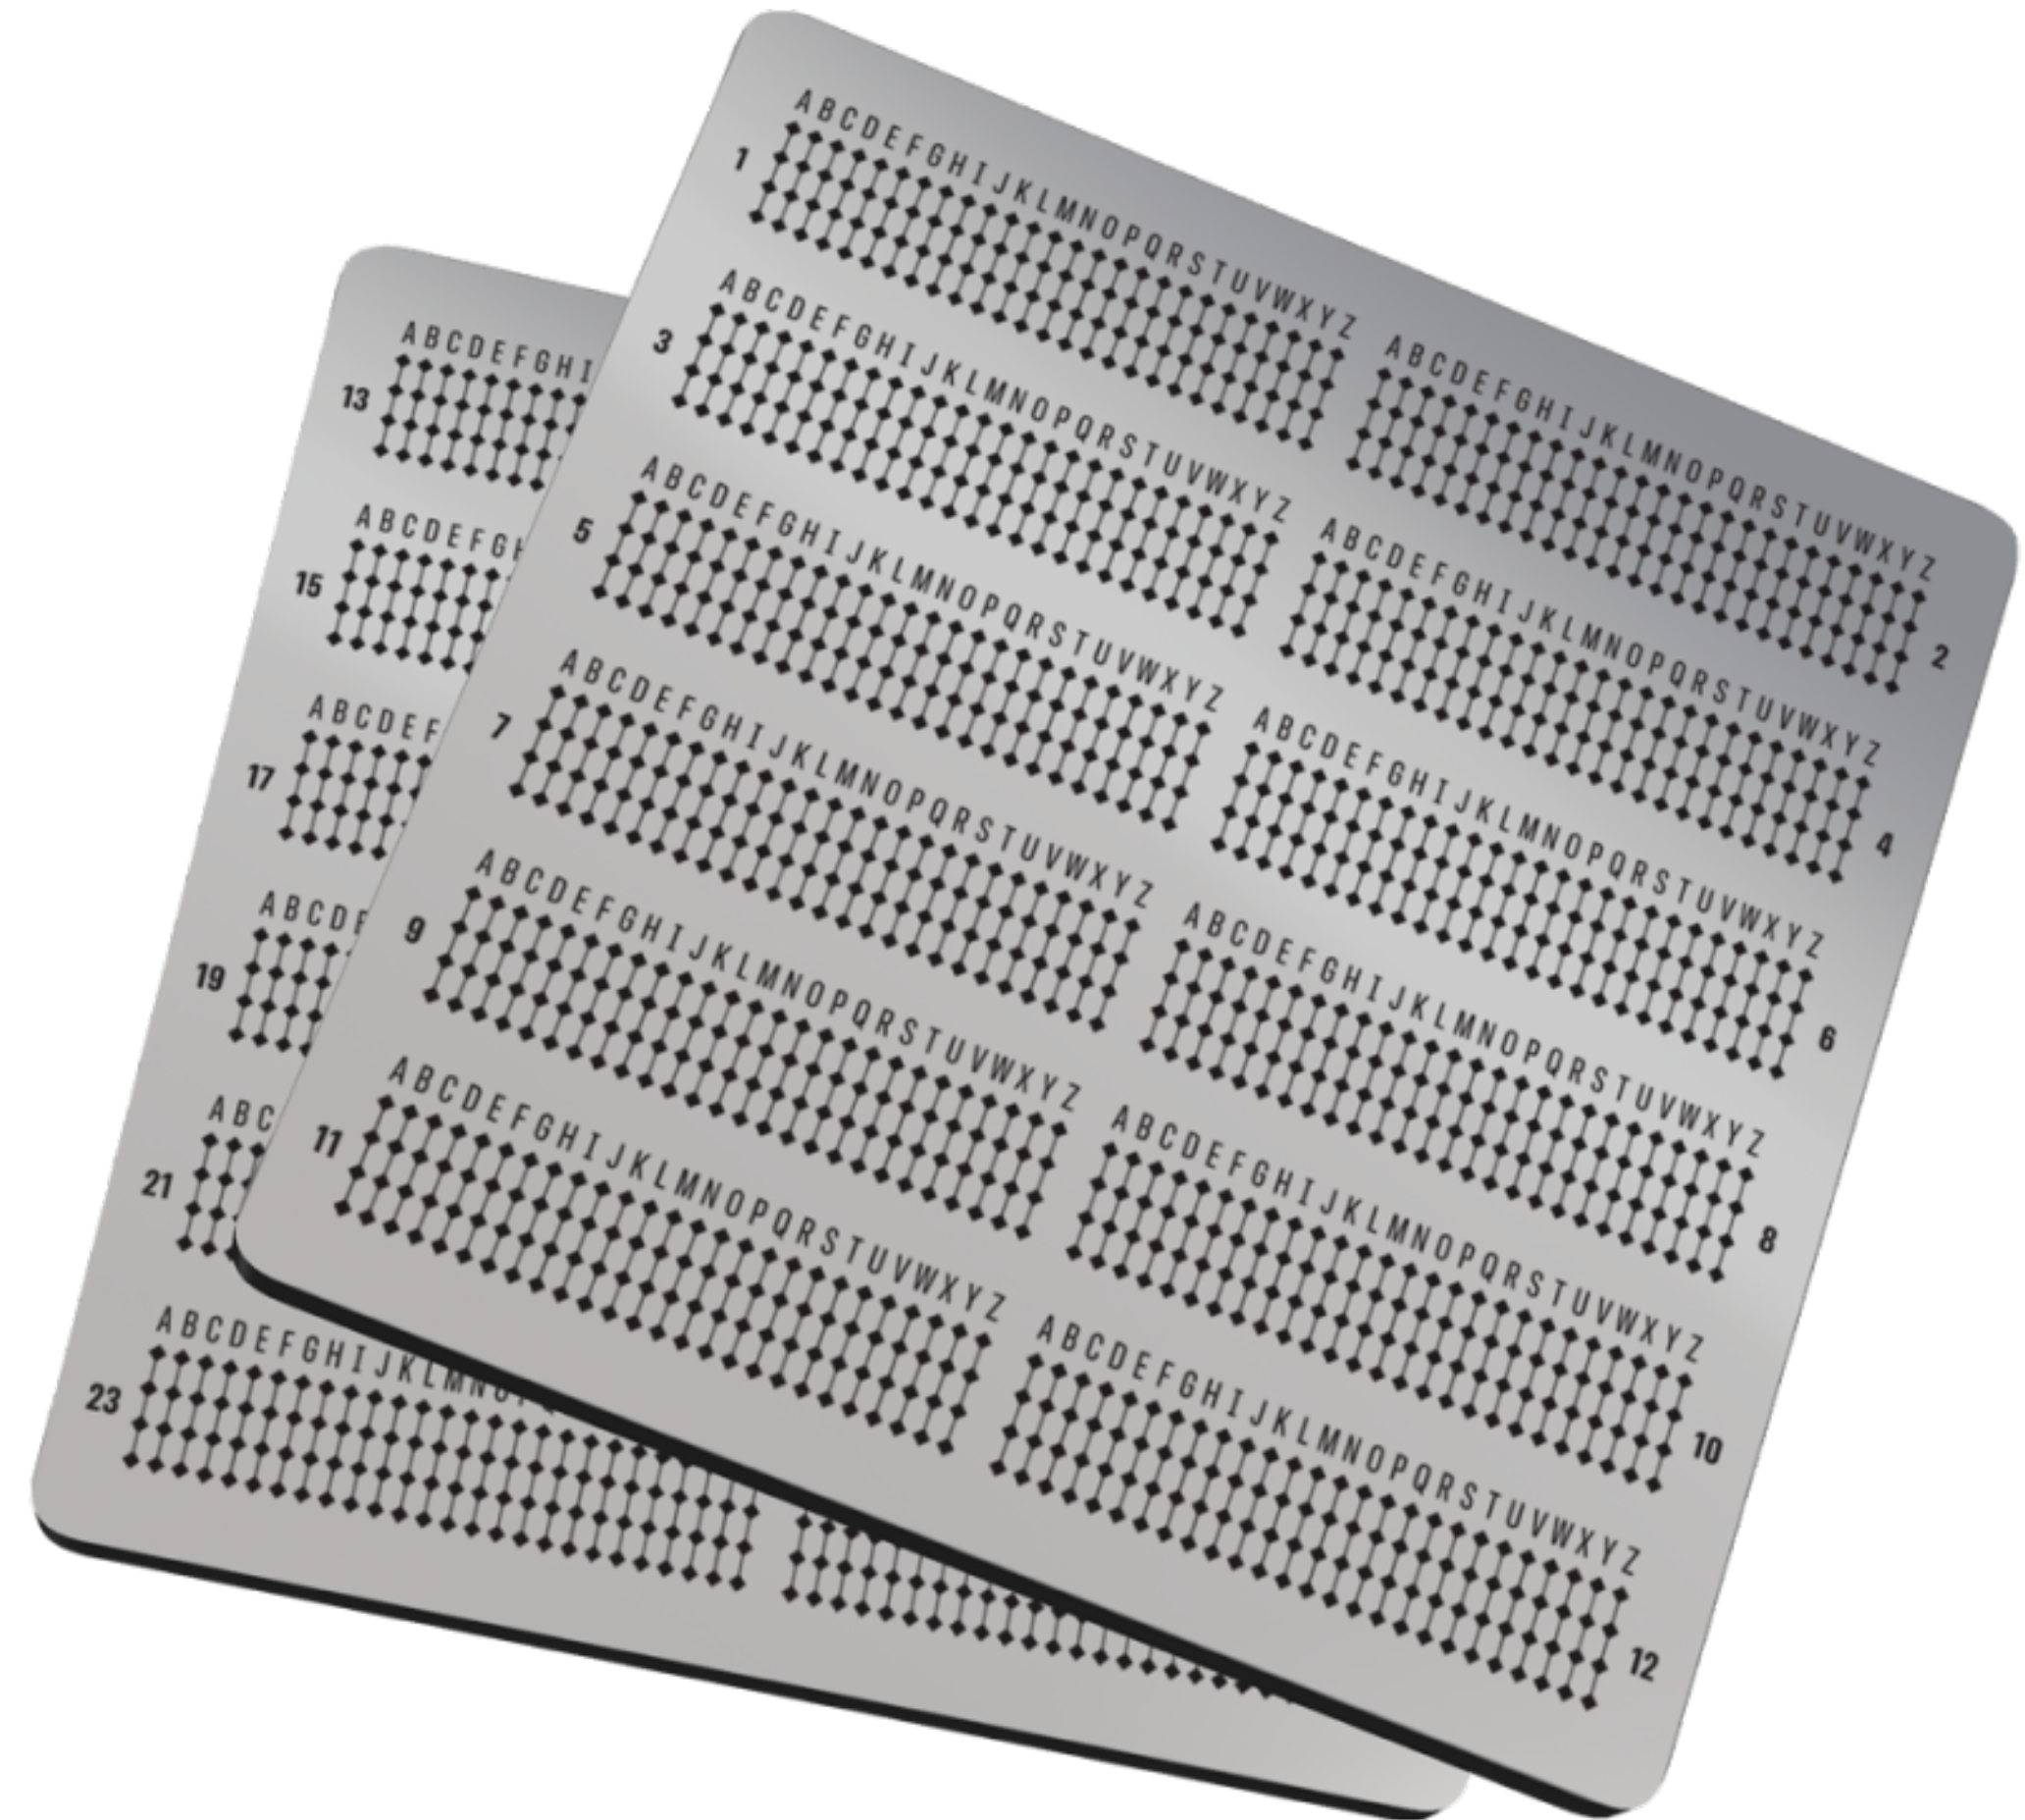

CODL Storage

A metal cold wallet designed to securely store your crypto assets.

Its specially developed stainless steel structure protects your Recovery Phrase (seed phrase) from physical damage.

With its durable design, it offers a long-lasting secure storage solution against potential hazards such as fire, water, and impact.

What's inside the box?

CODL Metal Plates

2 × 12 Recovery words backup plates

Conversion Sheet

Stone paper-based Conversion Sheet

Punching Tool

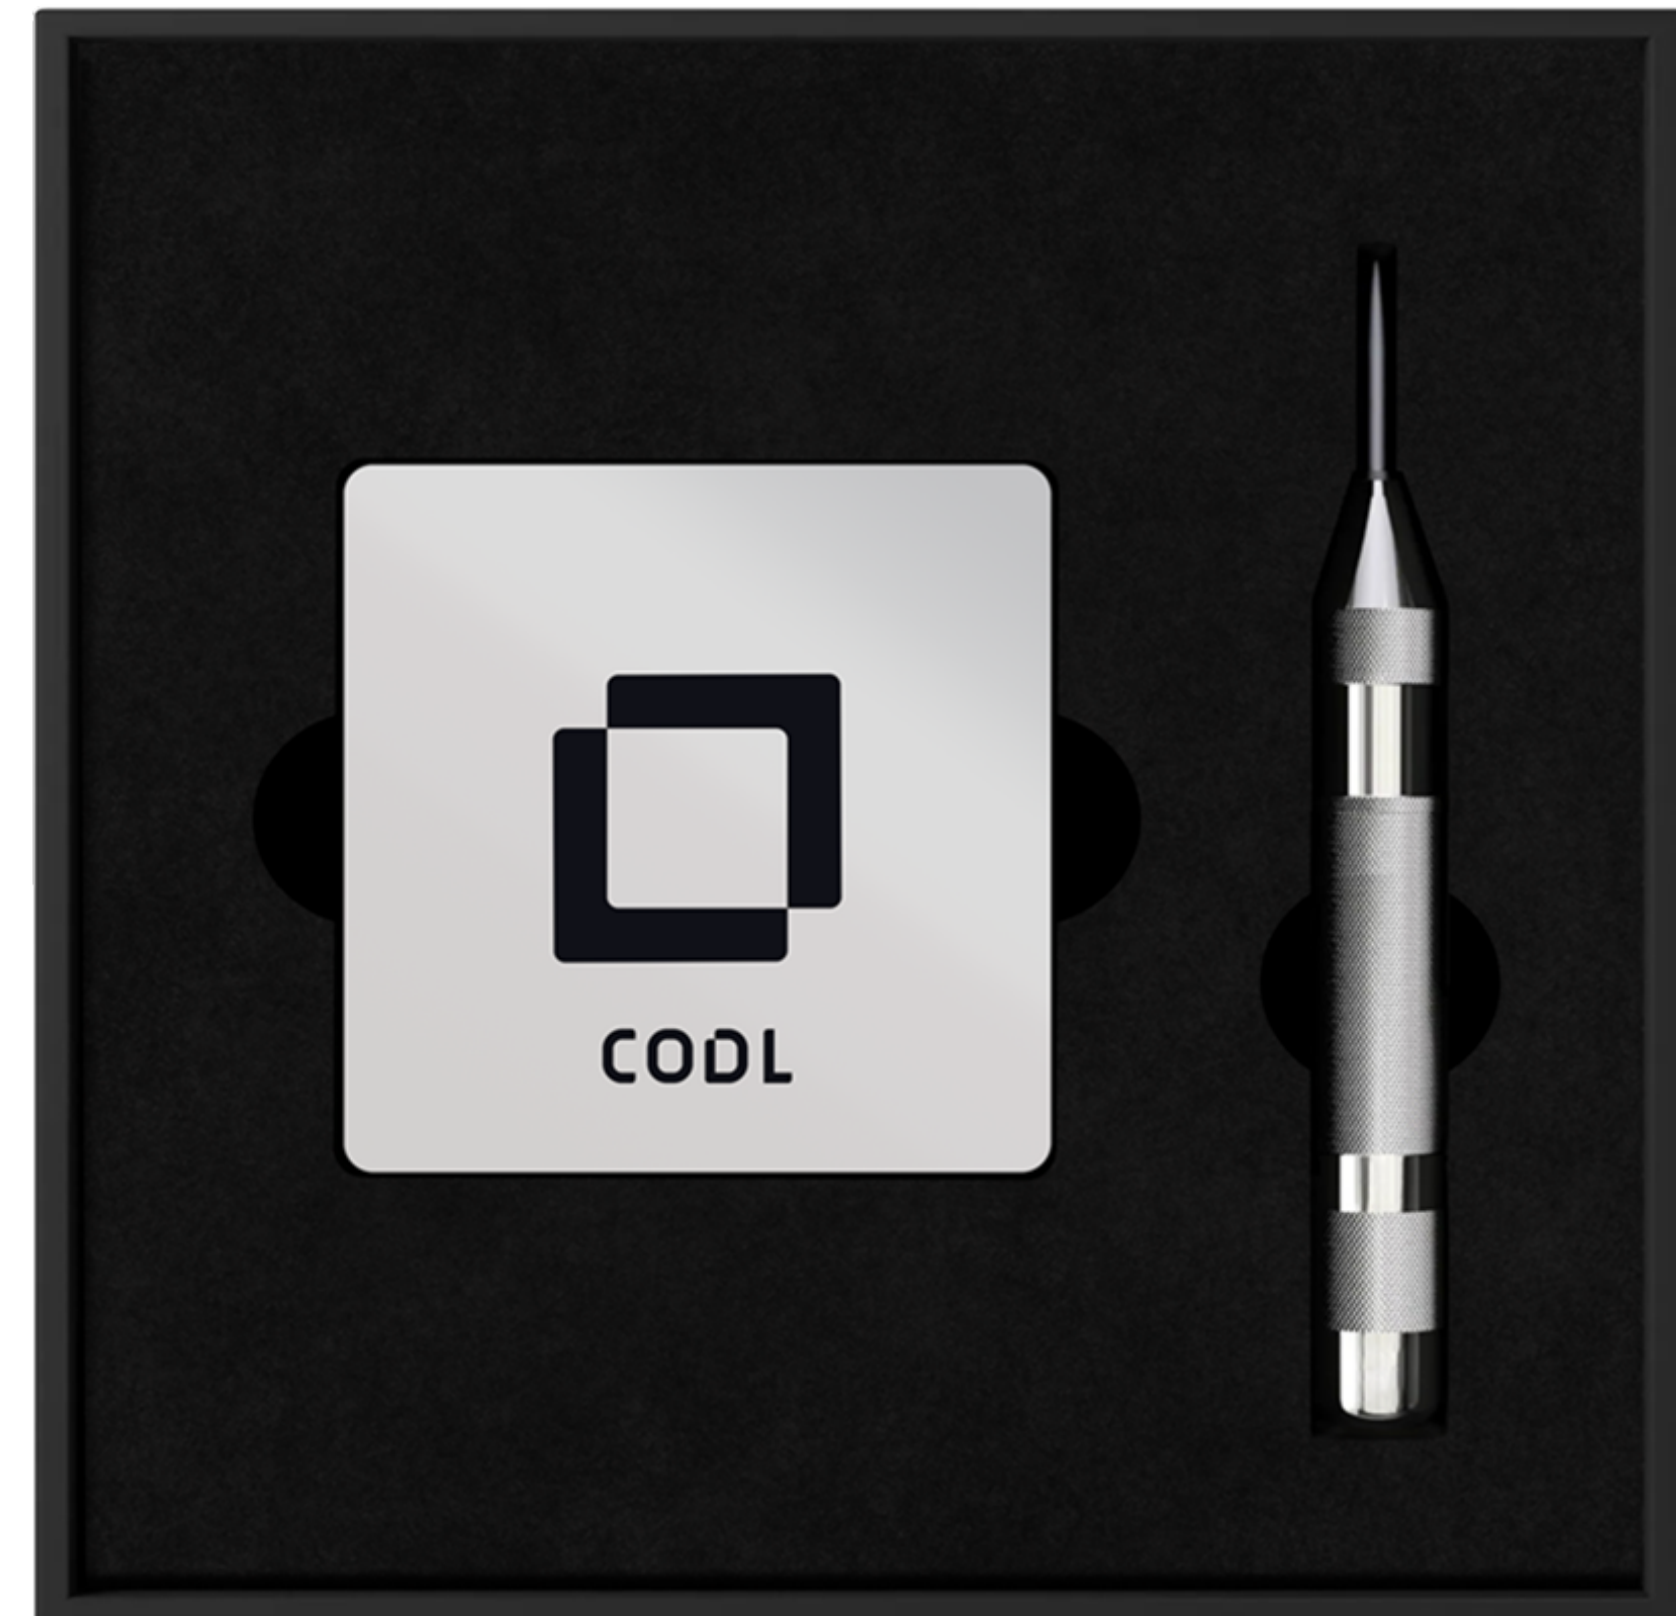

High-Quality Center Punch

Security Seals

2x Tamper-proof security seals

Setup Guide

Step-by-step instructions

Step 1

Write down your recovery words on the Conversion sheet.

In the numbered section, write the full word, and in the # sections, write the first 4 letters.

If a word has fewer than 4 letters, write what you can and leave the last box empty.

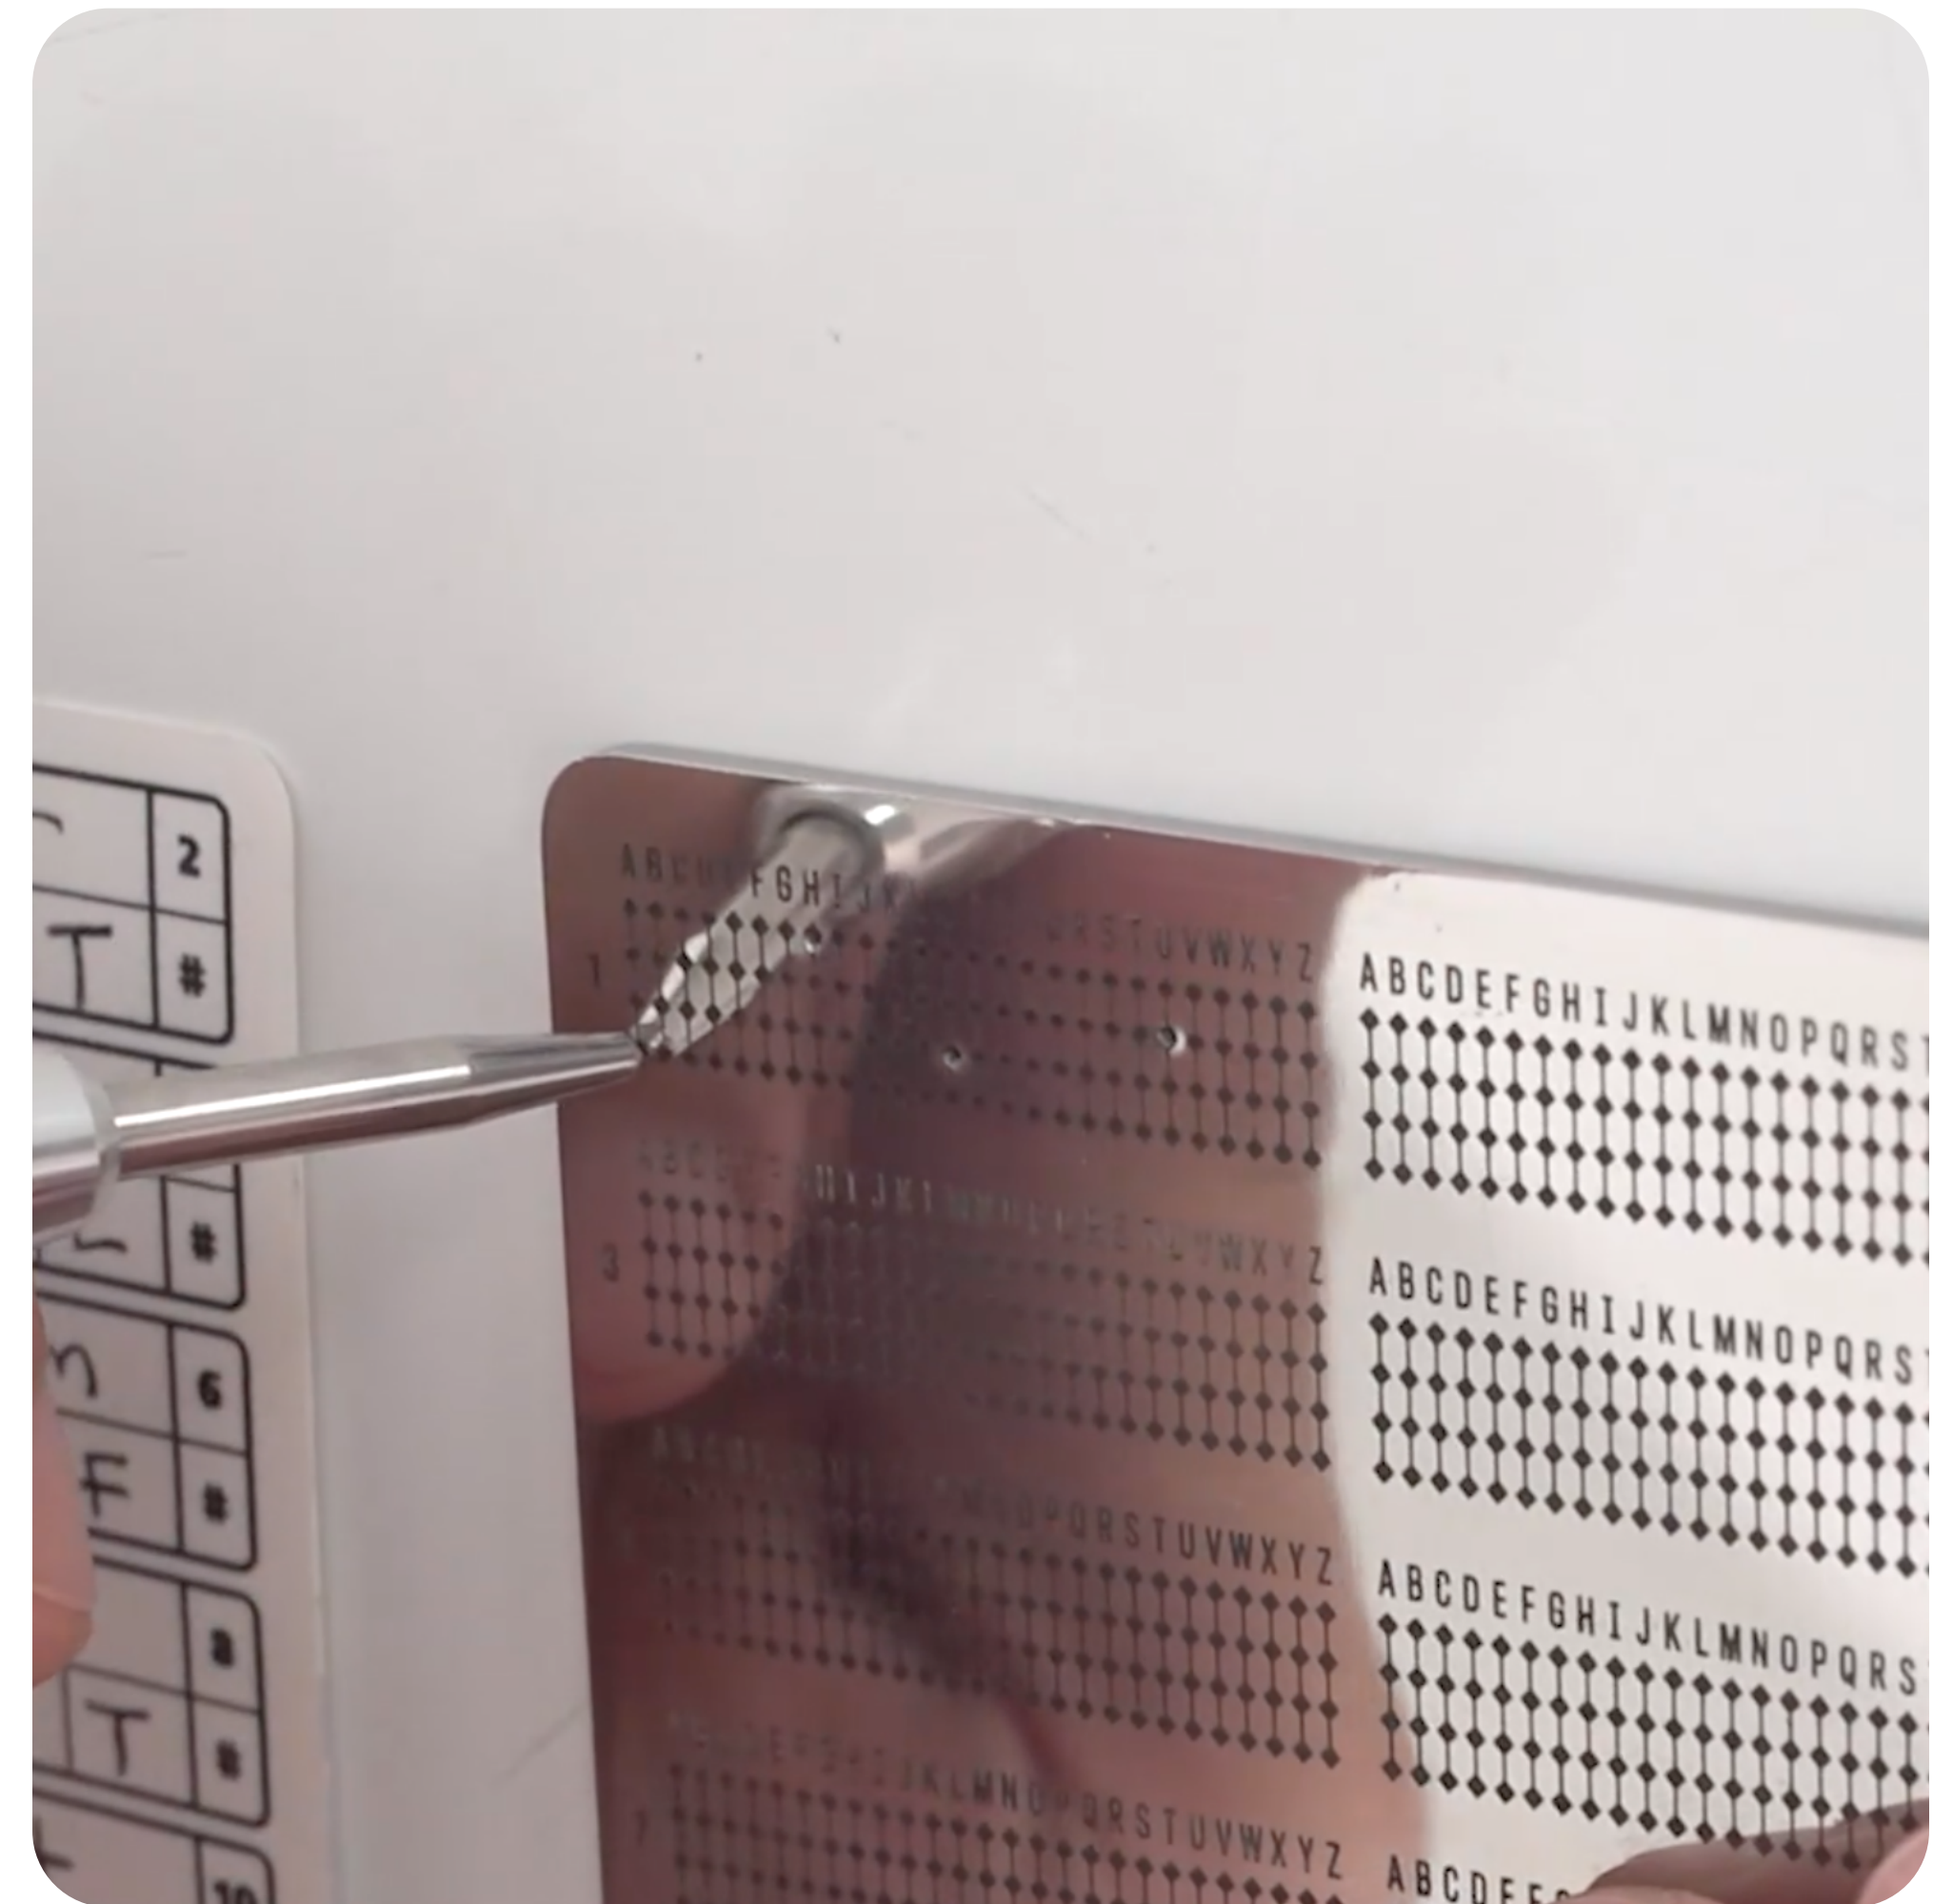

Step 2

Punch the first 4 letters of each recovery word onto the CODL Plates.

Use the punch tool provided in the box to mark the first 4 letters of each recovery word onto the corresponding metal plate.

Align the punch tool over the correct letter on the metal plate and press firmly until you hear a sound, indicating the letter has been successfully punched.

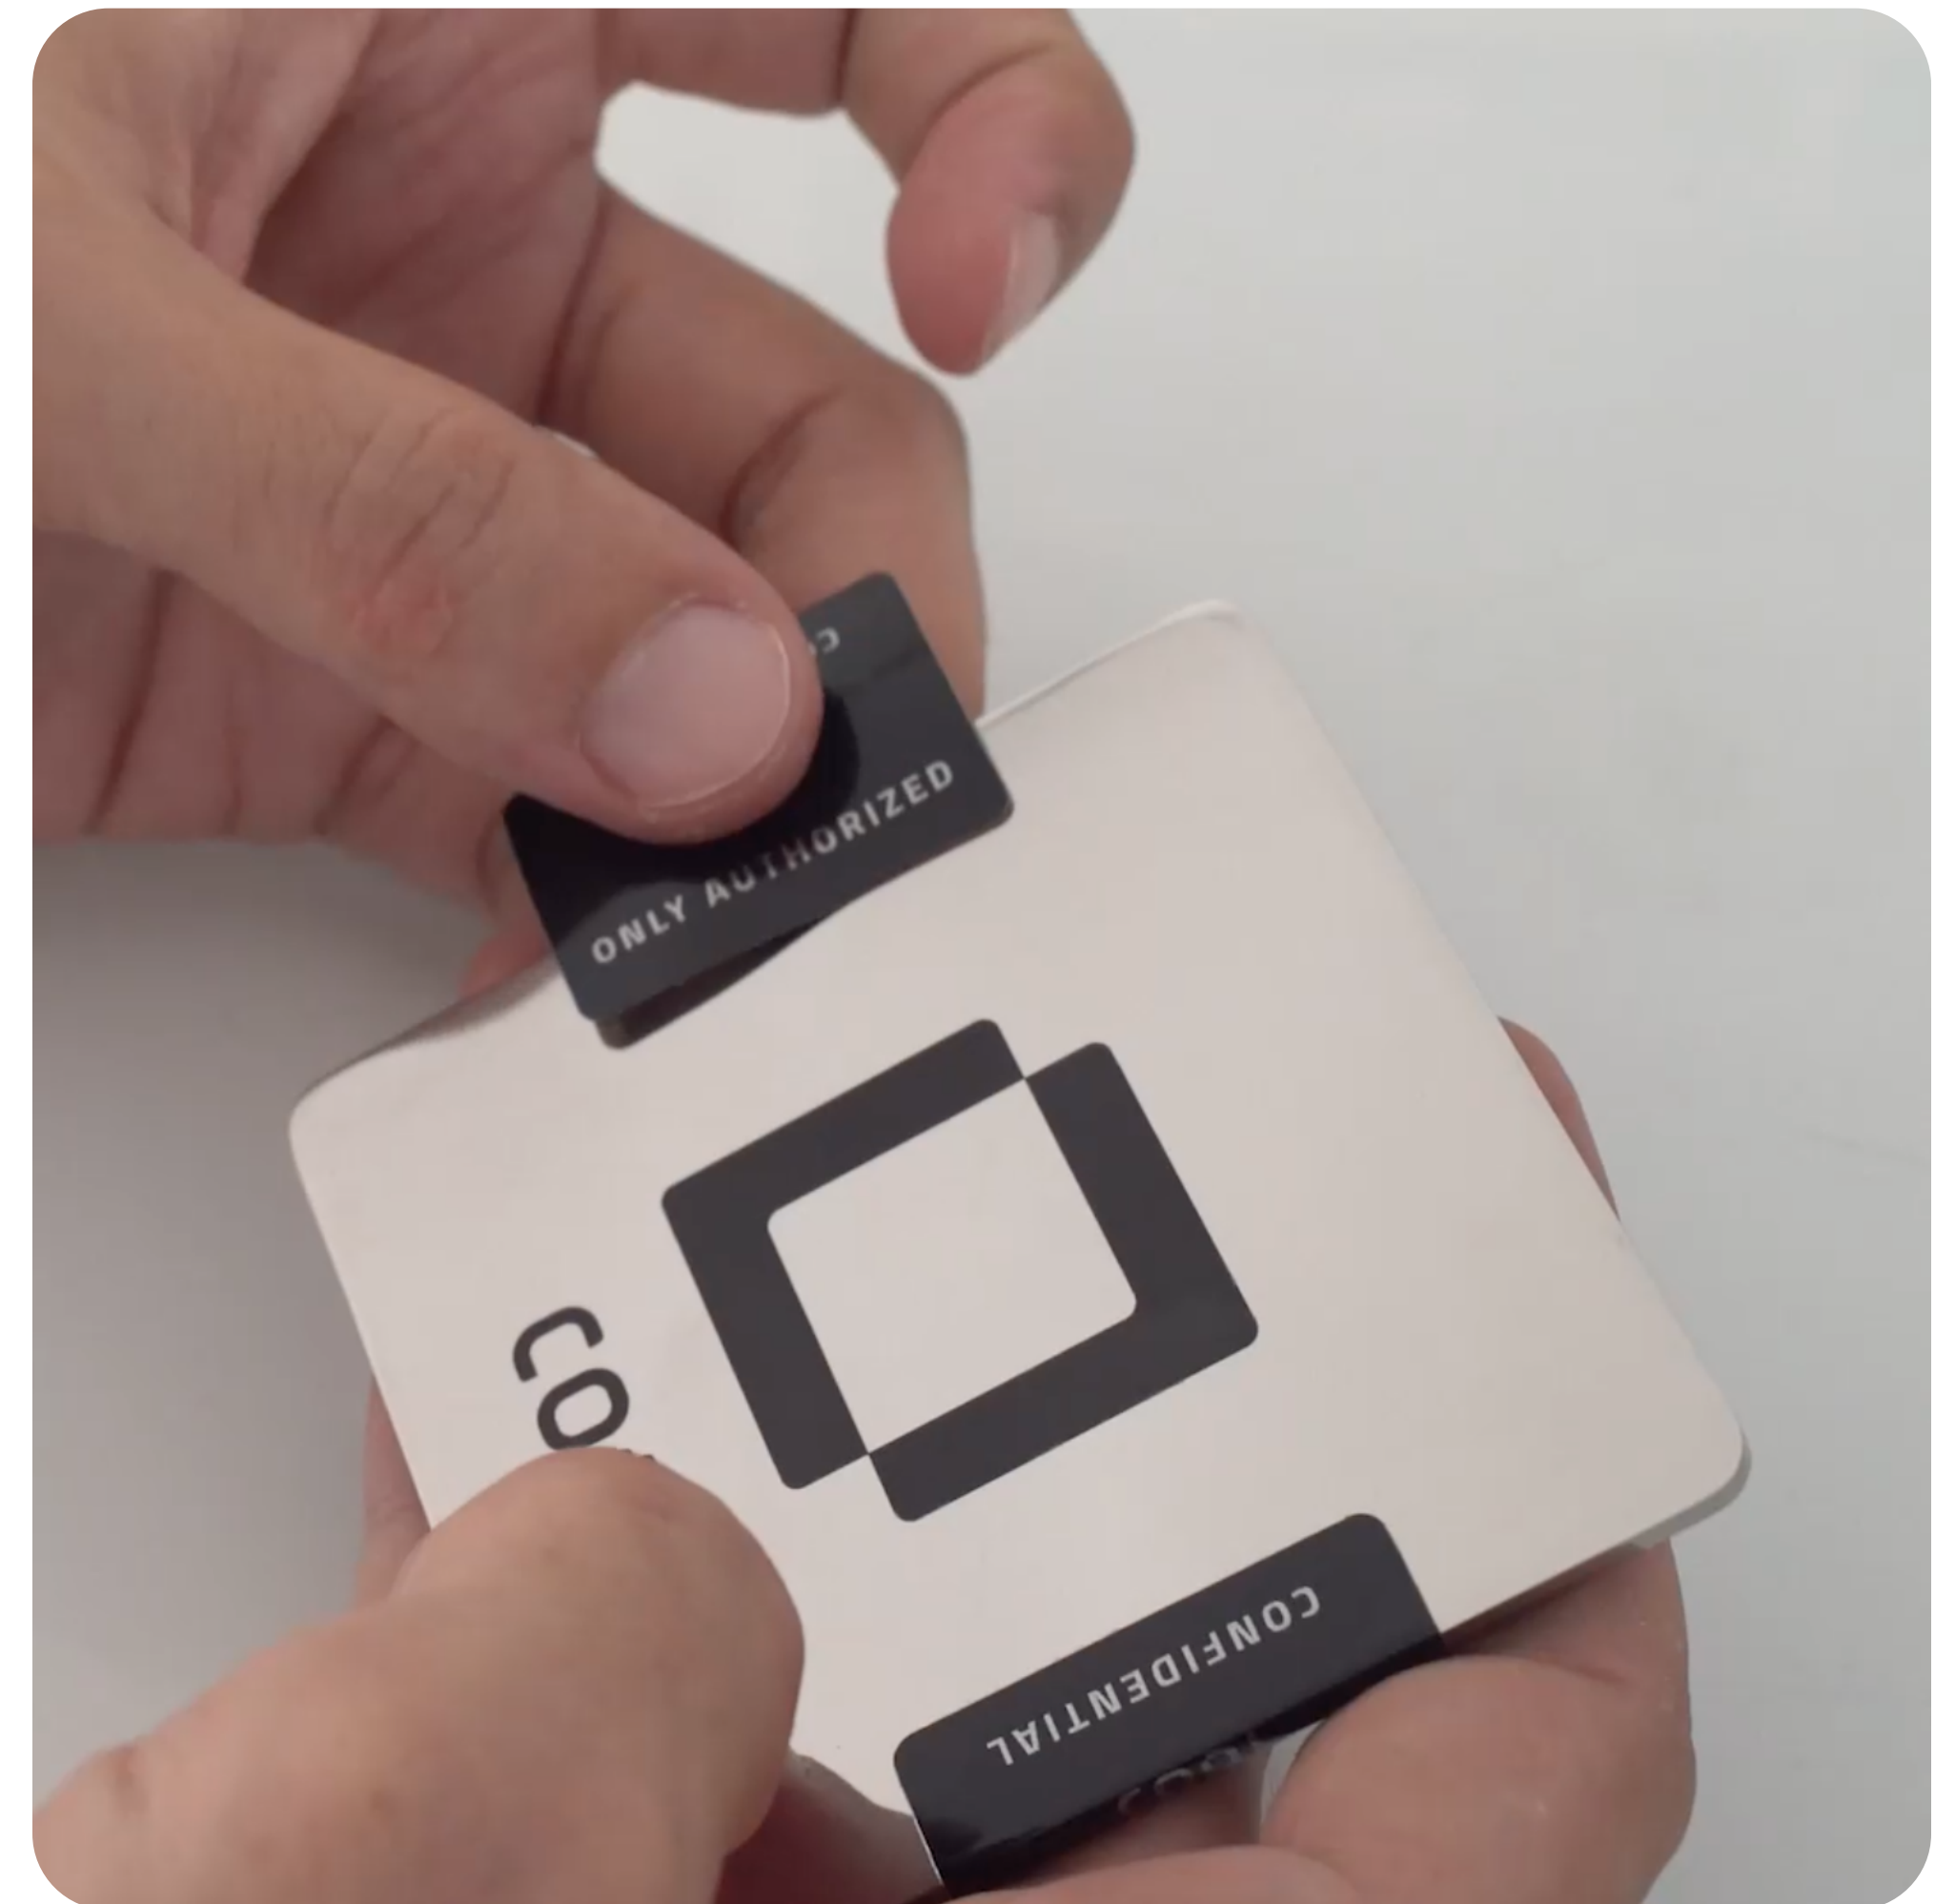

Step 3

Complete the installation by attaching the security stickers.

With the punched recovery words facing inward, place the metal plates together with the Conversion Sheet in between.

Then, secure them using the security stickers provided in the box to complete the setup.

SAFETY WARNINGS

- **Protect Your Recovery Words**

Do not copy or store your Recovery Words (seed phrase) in any other place or digital format. Anyone with access to your Recovery Words can access your crypto assets.

- **Set Up in a Secure Environment**

Ensure your setup is done in a private and secure location. During the setup process, make sure there are no cameras recording, and no one is around to observe the process.

- **Be Careful When Using the Punch Tool**

Use caution and control when marking with the punch tool. Apply appropriate force to make clear marks on the metal plates.

- **Post-Setup Security**

After completing the setup, store the CODL Storage in a secure location. Don't forget to use the security seals to protect against unauthorized access.
