

AI-Powered Data and Integration for Modern Banking

The AI-powered platform that unifies integration and data for financial institutions, delivering trusted real-time insights and the freedom to connect any fintech with confidence.

Who We Are

PortX is the financial services integration company. For over a decade, we've helped banks, credit unions, fintechs, and cores speed up and modernize how they connect, manage, and use their data.

The platform unifies integration and data with PiXi AI, empowering financial institutions to onboard fintechs, access trusted real-time insights, and accelerate innovation without vendor lock-in.

Why it Matters

 Unified Approach.	Integration and data solved together, eliminating silos, vendor sprawl, and duplication.
 Trusted Real-Time Data.	Publish “blessed” data across the organization for real-time, confident decisions.
 Purpose-Built for FIs.	Designed specifically for banks and credit unions, not retrofitted enterprise middleware.
 Best-of-Breed Freedom.	Connect any fintech, app, or core without lock-in.
 Faster, Lower-Risk Outcomes.	ROI in months, not years, at a fraction of the cost.
