HUMIFOR Liquid gives growers a straightforward liquid humic option for routine applications where ease of handling and practical program cost matter. It helps support soil-plant interactions and can be used as a simple way to add humic acids into an annual crop nutrition program.

Humic acid content verified using both California Method HA4/JC and ISO 19822 analytical methods.

DIRECTIONS FOR USE

Suitable for foliar, drip, sprinkler, or soil application. Compatible with most fertilizer programs. Apply based on soil conditions and agronomic recommendations. Apply during pre-emergence and during vegetative stages in row crops. For horticultural crops, apply throughout the growing season.
