

D&D SECURITY TOKEN

AVENO COIN

We are proud to say that we are on the Blockchain platform, via Ethereum, with the tokenization of a **Nero Marble mine in Brazil**. The mine spans 1,600 hectares, where **10,000,000 tons (ten million tons)** of marble have been confirmed, backed by official documentation, and there is potential for an additional **20,000,000 tons (twenty million tons)**, ensuring mineral extraction for approximately **75 years**. There is also the potential presence of diamond and titanium deposits in the same mine.

The tokenization of the **Aveno Mine** is supported by records and certified under important regulations. This means that we are in the market with a foundation that guarantees investors, partners, and buyers of the **Security Token** that they are acquiring a financial instrument backed by an existing asset, registered and guaranteed by Brazilian and global regulatory bodies.

The number of Security Tokens digitized in the first phase is **10,000,000,000 (ten billion tokens)**.

GUARANTEES

It is important to emphasize that **AVENO COIN** is under the constant supervision and evaluation of the U.S. **Securities and Exchange Commission (SEC)**.

Our company, **AVENO MARKET INTERNATIONAL LLC**, is based in Miami, Florida, USA.

We currently have subsidiaries in the Oriental Republic of Uruguay, the headquarters of **D&D GROUP**, as well as in the Federative Republic of Brazil and the Argentine Republic.

Beyond the company we have established in the United States, **D&D GROUP** and **AVENO** have partnered to exploit only a defined percentage of the total confirmed reserves, not only to increase the value of the security token but also, and more importantly, to preserve the environmental and social conditions of the surrounding area.

The **AVENO COIN** platform is already available, with all the proper documentation certifying that, in this first phase, the Aveno Mine has reserves of 10,800,000 tons (ten million eight hundred thousand tons). Additionally, Brazilian mining reports indicate that the 1,600 hectares could yield up to 20 million more tons, ensuring the potential for extractions over a 75-year period.

OBJECTIVES UNDER DIGITAL CONTRACT ON BLOCKCHAIN

At **D&D GROUP** and **AVENO COIN**, we are convinced that we can disrupt the market in a completely different way.

Our intention is to first raise awareness and foster solidarity with the most vulnerable sectors of the mining industry. We aim to demonstrate that a mining complex can be operated responsibly and sustainably.

Under the digital contract and our responsibility, we will not only exploit a minimal portion of the Marble Mine but will also invest in projects aimed at improving the quality of life for the artisanal miners at the Aveno mine. Moreover, we will launch a **LARGE SOLIDARITY CHAIN PROJECT**, aimed at channeling significant social projects for the community, starting with areas near the mine and expanding outward in a concentric spiral.

A large percentage of the potential marble sales will be allocated to environmental, social, cultural, and basic infrastructure projects in the area.

AVENO COIN FUNDING INVESTMENT PROPOSAL

In this **AVENO COIN** funding phase, prior to the **PRIVATE PRESALE**, which will take place from **October 15, 2024, to October 31, 2024**, we intend to offer potential investors, and as we like to say, "friendly clients," the opportunity to acquire security tokens at a preferential rate, thereby enabling a mutual "solidarity" approach. This means that the project will be funded for at least two years, and our friendly clients will access the security token at a nominal value far below the market value on the **Blockchain**.

D&D GROUP and **AVENO MARKET INTERNATIONAL LLC**, if necessary, will provide guarantees with their own assets to offer investors peace of mind and security. This decisive stance by our holding is due to the simple fact that our project, based on eight years of ideas, work, and self-investment, is so solid and strong that today we can confidently safeguard investors with our own guarantees.

It should be noted once again that our digital financial instrument is a **SECURITY TOKEN**, meaning it is backed by an asset, in this case, marble, which has also been officially certified and documented in terms of quantity.

At this stage, where only **D&D GROUP's** long-standing business and friendly partners will be involved, we will offer only **30,000,000 (THIRTY MILLION SECURITY TOKENS)** for sale, out of the **10,000,000,000 (TEN BILLION TOKENS)** available on the **AVENO COIN** platform.

SECOND INVESTMENT ROUND**FINANCIAL PROPOSAL**

Following the initial funding capitalized by companies, also partners of **D&D GROUP**, we have decided that the second round of funding will be backed by real guarantees. This means that beyond the value to be negotiated with the investor of the security token based on its nominal value on the platform, we will provide guaranteed backing on the exploitation profits of the Aveno Mine in the state of Bahia, Brazil, or, if necessary, with assets or properties of the **D&D GROUP** Holding.

The nominal values established for negotiation with the investor will be closely linked to the capital to be invested.

FUNDING PERIOD: From October 10 to October 30, 2024.

AVAILABLE SECURITY TOKENS: 30,000,000 (Thirty million)

INITIAL NEGOTIATION NOMINAL VALUE: From USD 0.50 to USD 0.90 per security token, depending on the investment amount.

CONTRACT SIGNING: In the Investor's country of origin, in the Oriental Republic of Uruguay, or if necessary, in the United States of America.

CONTRACT CERTIFICATION: Certified and authenticated by the corresponding country's consulates, with a Hague Apostille.

INVESTMENT CONTRACT SUBMISSION: SEC of the United States of America.

INVESTMENT GUARANTEES: Percentages of the exploitation profits of the Mine, or, if necessary, profit rights in the commercialization of assets; as well as guarantees in assets, if necessary, of the D&D GROUP Holding in Uruguay, Argentina, or Brazil.

COMMERCIALIZATION OF NERO BAHIA QUARTZITE MARBLE

It is worth clarifying that the **Aveno Mine** in the state of Bahia, Brazil, is fully backed by the necessary documentation from the corresponding regulatory bodies in the country.

We are working with our specialist teams regarding the regulatory documentation in our possession to obtain the two most relevant global certificates: **NI43-101** and **SK1300**.

Although **AVENO COIN** does not require this documentation, as the project will not initially rely on stock exchange listings globally, we aim to secure these certificates, which are important in the mining sector. It is also important to highlight that, following the geological

analyses and studies conducted, it has been confirmed that our stone contains up to 12% quartz, which significantly increases its value.

D&D GROUP and **AVENO COIN** have an **EXPERT COMMITTEE**, which includes individuals with direct experience and knowledge in the mineral, geoscience, brokerage, and digital banking industries.

After the formal confirmations made by the hired experts, we will be in a position to make **PRELIMINARY COMMERCIAL AGREEMENTS** for our Marble, with figures to be negotiated with the interested potential client, to reach the best possible agreement between the parties. The negotiation of the nominal value of the Aveno security token and the ton or cubic meter of our Marble will be established at values below the market average.

From September 24 to 27, we participated in the **Marmo + Mac Fair in Verona**, where we held key meetings with CEOs of the world's leading marble companies from various regions. Several of them showed strong interest in commercializing our marble.

AVENO COIN GLOBAL TOUR

Starting September 24, **D&D SECURITY TOKEN** and **AVENO COIN** began the global presentation and business round tour in Europe.

The first presentation, as mentioned, took place at the prestigious **MARMO + MAC FAIR** in Verona, Italy.

We are currently in **Madrid, Spain**, where we will make the official presentation of **AVENO COIN** at the end of October. Here we have scheduled business meetings with potential investors, and we are open to scheduling new interested parties in our project.

From there, the global tour of **AVENO COIN** presentations will take place in the following cities:

- **PORTO ALEGRE, BRAZIL** (End of November 2024)
- **PUNTA DEL ESTE, URUGUAY** (Mid-December 2024) – Laguna de los Cisnes
- **MIAMI, FLORIDA, USA** (Early January 2025)
- **NEW YORK, USA** (Late January 2025)
- **GENEVA, SWITZERLAND** (Mid-February 2025)
- **LUXEMBOURG, LUXEMBOURG** (End of February 2025)

In the first half of 2025, we have confirmed the opening of our headquarters in **Madrid, Spain**, from where we will manage all commercial aspects related to the operation of the project.

FINAL CONCLUSIONS

It is important to highlight that the foundation of this project, perhaps the most important aspect, is that **D&D GROUP** is the owner, creator, and holder of the project since its inception. We are also owners of the company and holders of the tokenizing company in the United States of America.

We are facing a project with no intermediaries. We are the owners of the project and the assets; we respond with our own guarantees and assets. The undersigned is the President of the **AVENO COIN** company in the United States of America and of **D&D GROUP**.

The **OFFICIAL PRE-SALE** on the platform to the international market will take place from November 1 to 30, 2024, where security token purchases will only be made at the nominal value (USD 1.00 per security token) in the total amount in this first stage of only **250,000,000** (two hundred and fifty million security tokens).

We have an **Expert Committee**, and we like to say that not only are we responsible, but we also love to know that we are not one, two, or three. We are simply different.

Good morning, good afternoon, good evening.
