

Enamored by the versatility and performance of sheet aluminum on our custom architectural projects, we worked to introduce a new family of aluminum only tables. Nesting their imperfect, puddle-like tops on a sheet of 3/8" thick aluminum, we attach stock 6" diameter aluminum tubes as their legs. Once the laser cutter does its job and our metal workshop prepares the piece, the tables are then passed over into the hands of our metal finishers. Over 4 hours are spent on average, sanding, softening and polishing the aluminum surface. To avoid issues with scratching, all tables are waxed only, allowing end user to re-apply or re-sand if needed any top surface damages that might occur through years of use. The Puddle tables come in a variety of shapes and are offered in counter height, dining height or three, stackable options for coffee table heights.

KLEIN HOME / The Puddle Tables

THE PUDDLE TABLE - LARGE

Height: 15"
Width (rough): 56"
Length (rough): 60"

Material: Sheet Aluminum
Finish: Hand Polished and Waxed
