

# Beyond Power®

EMPOWERING YOUR UNITS

[beyondpower.in](https://beyondpower.in)

**Meet Tolia**  
**Founder & CEO**

“ Success isn’t measured in megawatts installed it’s measured in trust built, value created, and the positive impact we leave on our customers and the environment.”

Trust is earned through performance, not promises. That’s why we stay personally involved at every stage planning, design, execution, and commissioning to ensure each client gets the professionalism and value they deserve . As the renewable energy landscape evolves, so do we. We were committed to innovation, advanced technology, and partnerships built to last because the future needs to be greener, and we intend to help build it. We’re not just generating electricity. We’re building a legacy of clean energy for generations to come.

“Great projects aren’t built on ambition alone they’re built on discipline, attention to detail, and a team that refuses to cut corners.”

**Dharmaraj Vala**  
**Director**

## About Company

Beyond Power is a solar EPC and renewable energy solutions company committed to building a cleaner, greener, and more sustainable future. We believe every rooftop, commercial building, warehouse, and industrial facility has the potential to become a productive energy asset. Through engineering, technology, innovation, and quality execution, we transform this potential into reliable solar power solutions. From system design and engineering to procurement, installation, testing, commissioning, and project support, we provide end-to-end solutions tailored to our customers' energy needs. Our focus goes beyond installing solar panels. We aim to deliver efficient, safe, and high-performing energy systems that help reduce electricity costs, improve energy independence, and lower environmental impact. With every project, we strive to create long term value for our customers while contributing to India's transition towards clean and renewable energy. Beyond Power Empowering Your Units.

## Mission

To engineer intelligent renewable energy solutions that empower every home, business, and industry to become more energy independent through reliable technology, exceptional engineering, and sustainable innovation. Beyond Power exists to deliver long-term value by transforming the way energy is generated, managed, and experienced.

## Vision

To become one of the most trusted renewable energy companies by providing smart and reliable energy solutions that help create a cleaner and more sustainable future. We envision a world where every home, business, and industry plays an active role in the transition to clean energy. Through innovation, responsibility, and engineering excellence, we strive to deliver high-quality renewable energy solutions that benefit our customers, society, and the environment.

## Our Services

### Residential Solar Projects

Customized rooftop solar solutions for homes and residential communities. We provide complete EPC services including site survey, system design, installation, net metering assistance, commissioning, and after-sales support to help homeowners reduce electricity bills and adopt clean energy.

### Commercial Solar Projects

Reliable solar solutions for offices, schools, hospitals, hotels, retail outlets, and commercial buildings. Our turnkey EPC services include engineering, procurement, installation, grid connectivity, and maintenance to maximize energy savings and operational efficiency.

### Industrial Solar Projects

High-performance solar power systems for factories, warehouses, and manufacturing units. We deliver end-to-end EPC services with customized designs, quality equipment, timely execution, and long-term maintenance for maximum return on investment.

### Ground-mounted solar Projects

Complete EPC solutions for utility-scale and ground-mounted solar power plants. Our services include project planning, engineering, procurement, civil and electrical works, installation, testing, commissioning, grid integration, and operation & maintenance (O&M).

## Our Process

### 1. Engineering & Design

- Site survey
- System design
- Energy generation analysis  
Structural assessment

### 2. Procurement

- Tier-1 solar panels
- High-efficiency inverters
- Mounting structures
- Balance of system (BOS) components

### 3. Installation & Commissioning

- Professional installation
- Electrical integration
- Testing and commissioning
- Government compliance support

### 4. Operation & Maintenance (O&M)

- Preventive maintenance  
Performance monitoring  
Cleaning and inspections  
Annual maintenance contracts (AMC)

## Why Choose Us?

- Experienced Solar EPC Team High-Quality Components Customized System Design On-Time Project Delivery Competitive Pricing.
- End-to-End Project Management Warranty Support.
- Dedicated After-Sales Service.

## Our Commitment

Provide reliable and affordable solar energy solutions while maintaining the highest standards of engineering, safety, and customer satisfaction.
