PROFESSIONAL SUMMARY

Innovative **UI/UX Designer (Product design | No code web development | Certified Framer Expert | AI assisted Builder)** with 1+ Years hands-on experience in designing **intuitive, scalable, and high-impact interfaces** for complex **SaaS**, logistics, and **AI-powered platforms**. Strong expertise in end-to-end **product design**, interactive **prototyping**, and building consistent **design systems**. Proven success in simplifying multi-role workflows and delivering clear prototypes that **reduce development ambiguity** and accelerate delivery. Passionate about turning complicated processes into **clean, delightful** experiences that **users and teams actually love**.

TECHNICAL SKILLS

- **Design Skills:** Web and Mobile App Design, Design Systems, Prototyping, Wireframing, Low to High-fidelity Design, Mockups, User Research, Information Architecture, Competitor Analysis, User-Centered Design
- **Interface & Visual Design:** Typography, Iconography, Material Design & Human Interface Guidelines
- **Development:** No-Code Web Development, Vibe Coding, AI-Assisted Development, CMS
- **Tools & Platforms:** Figma, Framer, Webflow, V0 by Vercel, Supabase, Razorpay, Vercel, Hostinger, fal.ai, Higgsfield, Replit, Clerk(auth).

PROFESSIONAL EXPERIENCE (1+ Years)

UI/UX Designer | Prowess Enterprise Pvt. Ltd., Vishakhapatnam | Apr 2025 – Present

- Designed and prototyped a complete **end-to-end Asset Management platform** for procurement onboarding allocation and inventory tracking.
- Created clean user-friendly **dashboards** and interfaces for User Admin Management Procurement Onboarding Allocation and Inventory modules.
- Built reusable UI **components** and maintained **consistent design** language across all screens and **user flows** successfully.
- Designed full **end-to-end Food Delivery platform** covering five user roles from customer to admin with complete **order lifecycle**.
- Built structured interfaces with **live status tracking** and simplified **complex workflows** into clear step-by-step screens for users.
- Designed **complete Logistics and Warehouse Management** platform covering warehouse hub transfers and last-mile delivery operations fully.
- Built structured interfaces for inbound, scanning, **PIN-based routing** truck allocation and **delivery partner** mobile app successfully.

KEY PROJECTS & IMPACT

- **Asset Management System** - B2B SaaS, Internal Tool / Supply Chain. Planned and prototyped a complete end-to-end Asset Management platform for procurement, onboarding, allocation, and inventory tracking. Built clean interfaces, dashboards, forms, and reusable components. Streamlined complex workflows for non-technical users and delivered ready-to-develop prototypes.
- **Food Delivery Platform** - B2B & B2C / E-commerce. Developed a full end-to-end food delivery platform covering five user roles - Customers, Restaurants, Delivery Partners, Feeders, and Admins. Mapped the complete order lifecycle and built structured, readable interfaces with live status tracking and interactive prototypes.
- **Logistics & Warehouse Management System** - B2B SaaS, Internal Tool / Supply Chain. Designed a complete logistics platform for warehouse operations, hub routing, transfers, and last-mile delivery. Built structured interfaces for scanning, storage management, PIN-based routing, and delivery partner app with clear status tracking and reusable components.
- **Jimmi - AI Image Generation & Editing App (Self product)** - Vibe Coding & AI-Assisted Development / Self Product. Designed and developed a full-featured AI image generation and editing app. Defined product logic, credit system, and multi-provider routing. Built all screens in Figma and developed the complete application using V0, Supabase, Razorpay, and multiple AI models.
- **Ownly- freelancer studio SaaS (Self Product)** - Designed a complete all-in-one platform for freelancers to manage their business. Created intuitive interfaces for studio profile, services, client management, Kanban pipeline, AI-powered proposals, invoicing, and time tracking. Built a clean design system with strong visual hierarchy and delivered a polished, production-ready product experience.

EDUCATION

- Master of Computer Applications | Andhra University (Online) | Pursuing |
- Bachelor of Computer Applications | Aditya Degree College, Vizag | March 2025 |
