Power. Precision. Performance.

Diesel & Gas Generators

About Us

Lance Power is a UK-based global provider of industrial power solutions, specialising in diesel generators, hybrid systems and gas-powered technologies. Headquartered in Selby, Yorkshire, we deliver reliable, high-performance power for both backup and prime applications, supporting projects of all sizes across multiple industries.

Whether you need a single standby unit or a fully engineered multi-set system, our team of qualified engineers is on hand to design, install and maintain a solution built precisely for your needs.

We are proud to be an approved supplier to YESSS Electrical, reflecting our commitment to quality, reliability, and standards.

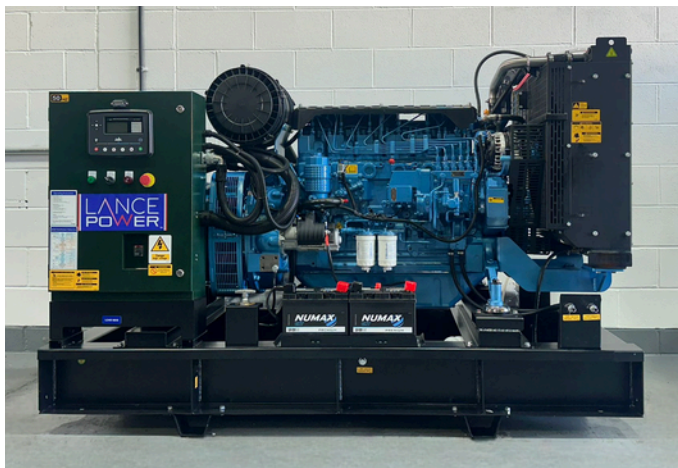

Our Accreditations

Open Sets Generators

Lance Power supplies open-set diesel generators engineered for strength, durability and ease of maintenance. These units are ideal for plant rooms and bespoke installations where flexibility and accessibility are essential.

Soundproof Generators

Lance Power's gas generators are designed for versatility and efficiency, supporting applications from hospitals to data centres and industrial facilities. They provide a lower-emission alternative while maintaining consistent performance and dependable power.

Gas Generators

Lance Power's gas generators are designed for versatility and efficiency, supporting applications from hospitals to data centres and industrial facilities. They provide a lower-emission alternative while maintaining consistent performance and dependable power output.

100KW Portable Loadbank

The LPL100 100kW portable load bank is a compact, lightweight and easy-to-transport solution for testing and commissioning. Designed for flexibility and ease of use, it enables accurate load simulation to ensure generator systems are fully validated before operation.

Switchgear panels / ATS

Our switchgear panels and ATS solutions provide reliable power control and seamless transfer between mains and generator supply. Designed

for full system integration, they ensure safe, efficient and compliant power distribution across a wide range of applications.

Service & Generator Parts

Lance Power supplies genuine generator service parts from leading manufacturers, supporting maintenance, reliability and long-term performance.
