

FICTIONAL DEMO DOCUMENT - SPECIMEN ONLY. NOT A REAL PRODUCT, APPROVAL OR CERTIFICATE.

WP-HYG

Hygienic transmitter cleaning validation

What to document when validating cleaning of a pressure instrument.

Scope

This specimen whitepaper outlines how a hygienic transmitter is assessed for cleanability, including surface finish, geometry and verification of CIP and SIP performance.

Acceptance

Typical acceptance covers swab or rinse tests, visual inspection of the diaphragm and confirmation of drift after repeated cycles.

Records

Keep the instrument certificate, cleaning-cycle parameters and result records together in the validation file.
