

Empower your business teams with Generative AI.

Identify, build, and scale GenAI use cases that truly make an impact.

Make GenAI work for your business

Ready to turn Generative AI into your team's creative advantage? We help companies operationalize **Google's latest GenAI models** like Gemini (Pro, Flash, Nano Banana) and Veo 3, so you can generate on-brand content, automate creative workflows, and move faster from idea to execution.

The AstraFY Solution

We combine the best of Google's latest GenAI models with your company's data, brand, and workflows to **turn creativity into a repeatable, measurable process**.

Our **multimodal solutions** connect text, image, and video generation, allowing marketing, sales, product, and operations teams to create high-quality assets across every channel.

What you get:

- **Campaign creation, simplified** → Generate social visuals, ad copy, and headlines aligned with your brand tone.
- **Product storytelling** → Produce images and videos for catalogs, demos, or launches using Imagen 3 and Veo 3.
- **Customer interaction** → Power chat assistants and content summaries through Gemini 2.5 Pro and Nano models.
- **Operational automation** → Combine Gemini with Looker to generate insights, reports, and documentation automatically.

Results that matter

From prototype to production.
We design tailored solutions to help your company achieve:

Speed Gains

Reduce time-to-market for GenAI use cases by up to **70%**.

Cost Efficiency

Cut experimentation costs with **optimized** model selection and caching.

Empowered Teams

Enable marketing, operations, product, and support to **automate insights** and create new AI-powered experiences.

 **Gemini**

 **Gemini Enterprise Agent Platform**

How it works

Everything runs on Google Cloud's secure and scalable infrastructure, ensuring that your GenAI content remains private, compliant, and enterprise-ready.

1. **Infrastructure Setup** – We deploy your GenAI environment on Google Cloud (Vertex AI, IAM, CI/CD) with automated Terraform setup.
2. **Intelligent Orchestration** – We connect GenAI models through frameworks like LangGraph and Google ADK, enabling complex workflows, human review, and tool integration with full traceability.
3. **Team Enablement** – We train your team on prompt design, grounding, cost optimization, and deploying new use cases independently.

Ready to make business intelligence work for your company?

We'll help you identify, build, and scale the use cases that drive real value.
