PROJECTS (More details to be found at ciandoyle.com)

AeroMoss

- A freestanding air purifier that harnesses the natural air filtration properties of moss. Using a fan at the top, it draws air through the living moss panels and an activated carbon layer effectively removing harmful and volatile particulates in the air from the indoor living space. It is designed to blend form and function.
- Conducted research and user interviews to build up a strong design foundation, ensuring the product is both user friendly and impactful.

Wobl

- An egg shaped chicken feeder designed to regulate chicken feed distribution while providing an engaging interaction that helps to increase the welfare of chickens for busy small-scale farmers who care for their animals.
- Conducted interviews with small scale farmers for insight on how much they care for their animals as well as the types of livestock they keep, chickens were found to be the most common.

The Jewel Logo

- Commissioned to create a logo for *The Jewel* spa in Glengarriff, Co. Cork, Ireland.
- Worked with the owner and went through different designs to meet their vision for the Spa's identity as a business.
