PREMIER RECYCLE

TOTESTERS

A Smarter System for Clean, Trackable Jobsite Waste

Totesters are a mobile waste collection solution designed to improve jobsite efficiency, cleanliness, and material tracking. They are ideal for projects that require advanced source separation, detailed reporting, and reliable service in space-constrained environments.

Key Advantages

Advanced Source Separation & Reporting

Dedicated carts make it easy to separate materials at the point of disposal, improving diversion rates and enabling more accurate waste and recycling reports to support sustainability and compliance goals.

Eliminates Double-Handling

Debris goes straight into the cart where work happens, reducing labor, minimizing dust and clutter, and eliminating unnecessary rehandling on the jobsite.

Clean, Professional Jobsites

Totesters provide a contained, organized solution that replaces loose debris and oversized dumpsters, helping maintain a safer, more professional work environment.

Designed for Tight and Urban Sites

Compact and easy to maneuver, Totesters work well in interior spaces and urban jobsites where traditional dumpsters are impractical.

Construction-Grade Design & Specs

Capacity: 25 cubic feet

Size: 49.5” L × 30.5” W × 41” H

Body: 0.25” LDPE rotationally molded cart with reinforced lip

Base: Welded steel with bolted-through casters

Wheels: 8.6” semi-pneumatic casters with locking brakes

Design Features: Tapered sides protect your walls; forklift pockets for easy handling

Haul Capacity: One full Totester truckload provides 18+ cubic yards of haul-away capacity

Operational Benefits

- Carts roll directly to work areas, reducing travel time
- Smaller footprint helps protect finished floors, pavement, and landscaping
- Multiple carts can be staged by trade or material type
- Cost-effective alternative to roll-off dumpsters on smaller or phased projects

Premier Recycle Service Model

- Same reliable service as Premier Recycle dumpsters
- Full carts swapped with clean, empty carts
- Transported via box truck for efficient site access
- Integrated into your existing recycling and reporting program

Totesters are weighed at our sorting facility for accurate reporting

Cleaner Jobsites. Better Data. Less Waste.

Totesters deliver flexibility, efficiency, and greater visibility into waste streams, without sacrificing durability or service reliability.
