

Product Designer with 3 years of experience, including 2+ years designing enterprise B2B SaaS products for global users in cyber risk management and internal audit. I work end-to-end across user research, wireframing, interaction design, and prototyping, partnering closely with PMs, engineers, and researchers across cross-functional teams. Shipped scalable UX solutions **impacted 75+ customer organizations** with a strong focus on design systems, accessibility (WCAG), and usability testing to drive consistency across products.

EXPERIENCE

Product Designer

🏢 Diligent

📅 Jun. 2024 – Present

- Led a cross-product initiative impacting **4 enterprise products** as the sole designer, owning UX and UI decisions end-to-end from problem definition through delivery used by dozens of customer organizations.
- Designed and iterated on core workflows in an enterprise B2B SaaS platform for cyber risk management and audit, **impacted 75+ global customer organizations** users across 3 product lines.
- Designed Audit Follow-up to close a critical product gap in post-audit remediation, helping move customers away from spreadsheet-based tracking toward a structured, reportable workflow for findings, validation, and follow-up reporting.
- Led the Audit Risk Assessment weighting and interpretation initiative, creating a more transparent and consistent risk-based planning workflow for internal audit teams.
- Translated complex compliance and business requirements into clear, user-centered UX flows, reducing friction in highly regulated workflows.
- Drove design quality through critiques and pattern studies, aligning teams on scalable interaction patterns and reducing UX fragmentation.

Product Design Intern

🏢 Diligent

📅 Mar. 2024 – Jun. 2024

- Served as the sole design contributor on a greenfield product initiative focused on improving strategic alignment for enterprise customers.
- Conducted user research and synthesized insights to inform product direction and core workflows.
- Designed and validated 10+ core user flows and prototypes, translating ambiguous problem spaces into concrete UX solutions.
- Presented design rationale, insights, and outcomes to stakeholders and peers in a final product showcase.

Freelance Web Designer-Framer Developer

🏢 Freelance

📅 Oct. 2022 – Mar. 2024

- Designed and delivered 15+ responsive marketing websites for clients, owning UX and UI decisions from initial requirements to final implementation.
- Built high-fidelity, interactive websites using Framer, focusing on clear information hierarchy, usability, and visual polish.
- Managed multiple client projects independently, balancing client goals, timelines, and technical constraints.
- Ensured accessibility, performance, and cross-browser consistency across delivered websites.
