

Carbon Reduction Plan

Publication date: Aug 2025 (corrected version of July 2025 issue)

Commitment to achieving Net Zero

ClearSpace is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024/25		
Additional Details relating to the Baseline Emissions calculations.		
No previous reporting has been carried out by ClearSpace. A move to permanent offices took place in September 2024, so information before this date is not considered representative. The annual baseline is extrapolated from data covering Sept 2024 to June 2025.

This is the first carbon footprint assessment, so no detailed short-term targets have been identified yet.

ClearSpace is committed to achieving net zero emissions by 2050.

Carbon Reduction Projects

In the future we hope to implement further measures such as:

- Review the energy use of the new office to identify areas of excessive energy usage.
- Ensure business travel is justified.
