CONNECTION CHANGES THE MOMENT

Connection changes the moment.

ALICE × LINKER

Immersive interactive entertainment platform & official partner device
Product · Technology · Partnership catalog

Real-time connection | Immersive content | Interactive experience

ANOTHER LEVEL IN CONNECTED EXPERIENCE

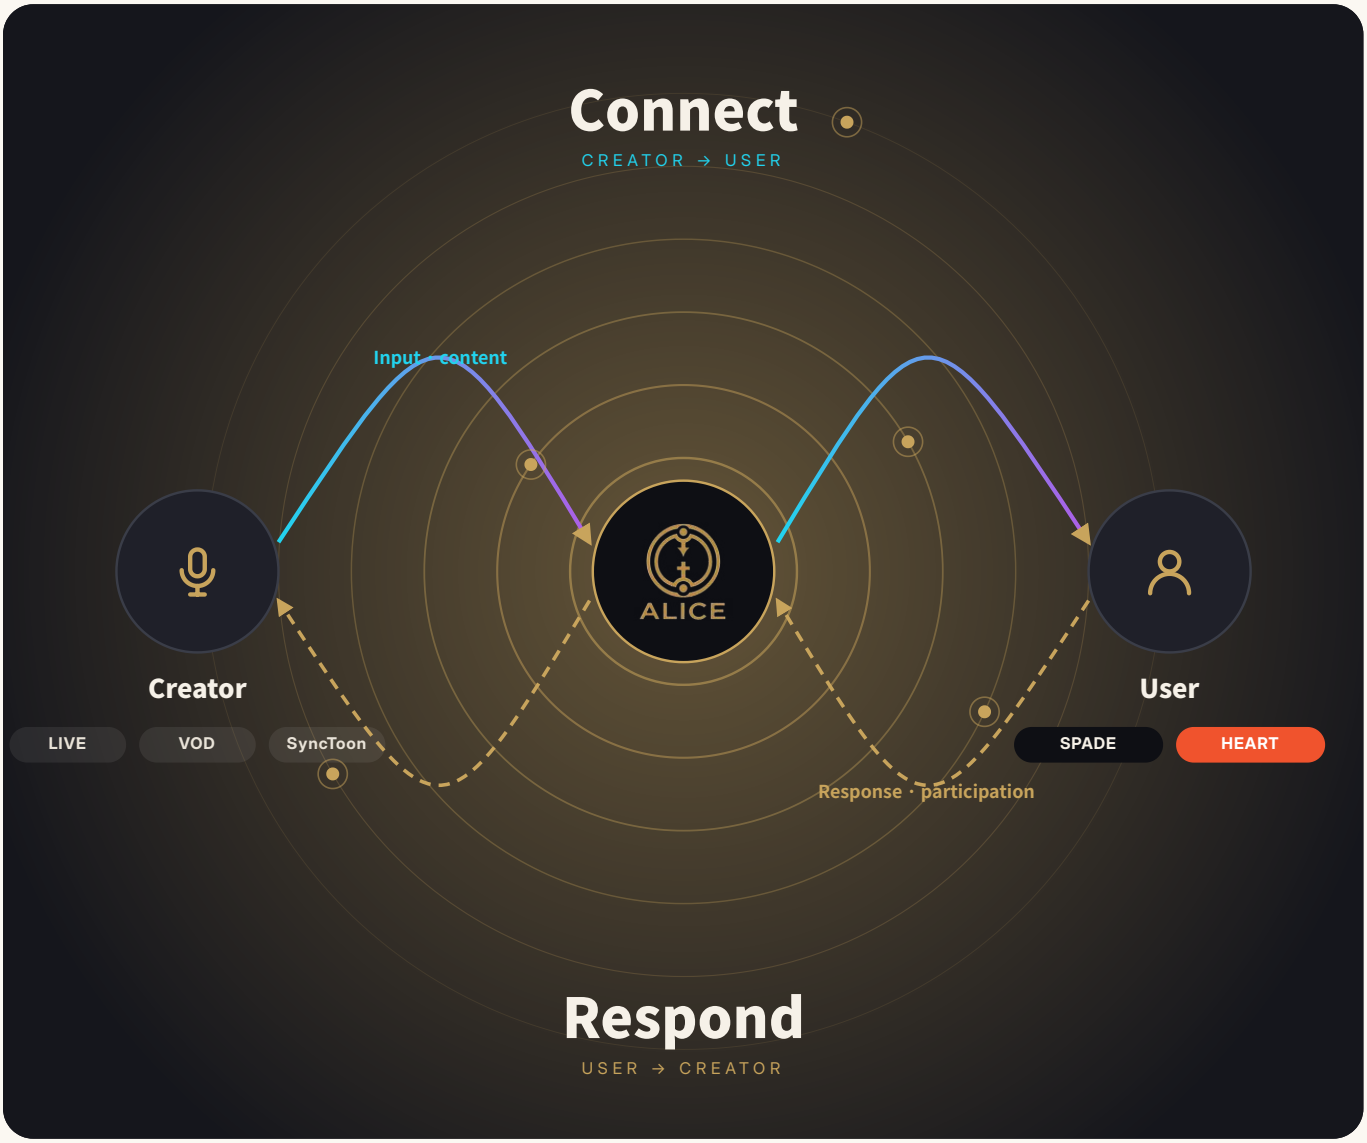

18+ · ADULTS ONLY

BRAND STATEMENT

We don't make content to be watched. We make experiences that respond.

Live streaming is everywhere, yet "participation" is still stuck in chat and tips. ALICE fuses a content platform with a physical device that responds in real time. Every move a creator makes, every beat of a video, every decisive panel of a webtoon crosses the screen and becomes a real sensation.

Not faster streaming — a new content format. **The connection itself is the experience.**

One Connection. **Infinite Experience.**

ALICE Platform · LINKER Device — one ecosystem, operated by separate companies

WHO IS THIS FOR

Who this catalog is for

Devices, content or operations — whatever your interest, this single volume lets you understand the whole ALICE ecosystem and find the partnership entry point that fits you.

Individual users

Adults who want a LINKER device and content that syncs in real time with live streams, videos and webtoons.

HOW IT WORKS P.06 · DEVICE P.18–23

Resellers / distributors

Businesses buying LINKER in volume for retail or distribution in their region.

RESELLER PROGRAM P.29 · SPECS & CERTIFICATION P.23

Content creators

Creators who upload synced content such as VOD and SyncToon and earn ongoing revenue from views and purchases.

BUSINESS STRUCTURE P.07 · MONETIZATION P.14 · CREATOR PROGRAM P.27

Live streamers & MCNs

Streamers who go live on ALICE and interact with fans through LINKER, or agencies running a streamer roster.

LIVE P.10 · STREAMER PROGRAM P.27–28

National master agencies

Companies that want to operate the ALICE streamer ecosystem and device distribution exclusively in a country.

MASTER AGENCY P.28 · GLOBAL P.30

One ecosystem, two separate companies.

ALICE is an interactive entertainment platform for adults; LINKER is the official partner device that syncs with the ALICE platform in real time. The platform and the device are **operated by two different companies**, connected through a sync-protocol partnership into a single "Connected Experience".

PLATFORM

ALICE Platform

- Four content formats: LIVE · VOD · SyncToon · Feed
- Creator studio, subscriptions & tipping, settlement
- User / creator / operations in one system
- Platform HQ: Taiwan · global service (excl. mainland China)

Real-time sync protocol

DEVICE

LINKER Device

- SPADE series · HEART series
- Bluetooth · position-mapping controller · reciprocating drive
- 1:1 two-way link · 1:N live-room sync
- Hardware R&D and manufacturing: China · sold worldwide

Q4 2026 →
Official launch · global expansion
Device mass-production ready · platform launch pending

From watching → to experiencing.

On conventional platforms content stops when playback ends, and revenue stops at a single payment. ALICE puts content, creators, fans and devices into one loop: connection creates experience, experience creates value, and value brings the next connection.

01
Connect
Device and platform connect; creators and fans are linked in real time.

02
Engage
The device responds instantly to the screen and the emotion. Participation no longer stops at chat.

03
Consume
Subscriptions, interactions, VIP, merchandise — payment happens naturally.

04
Repeat
One device sale comes back as ongoing platform experience and revenue.

THREE SYNC MODES

Three sync modes, one connection layer

LIVE · real-time sync
The streamer's controller touch position is translated in real time into the motion of every viewer device in the room.

VOD · timeline sync
The video timeline and the device control script lock together second by second. Play, pause, seek and speed all stay in sync.

SyncToon · scene trigger
As you scroll a webtoon, the device responds the moment an animated scene enters the screen — and stops when it leaves.

WHY IT MATTERS

Same 60-minute live, revenue touchpoints go from 2 to 5.

Subscriptions · interactive tipping · private/VIP · devices & merchandise · B2B licensing — fans have more reasons to pay for every moment they are "responded to", creator income rises, and the platform grows with it.

ONE CONNECTION. INFINITE EXPERIENCE.

Platform and device, connected.

ALICE × LINKER on one page. Input on the creator side (controller · device · video · webtoon) passes through ALICE Cloud, becomes a control signal and turns into real motion on the user's LINKER. Whatever the content, the path is the same.

INPUT
1
Creator · content
Controller input, video timeline script, webtoon scene trigger

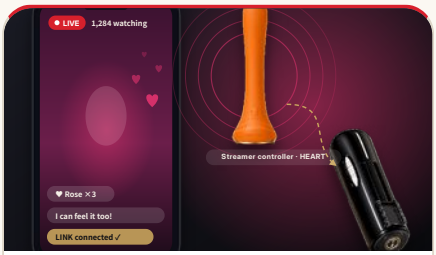

RELAY
2
Client
Web · app relays the device over Bluetooth

HUB
3
ALICE Cloud
Checks session · rules, converts input into commands, distributes

RELAY
4
Client
User's web · app passes commands to the device

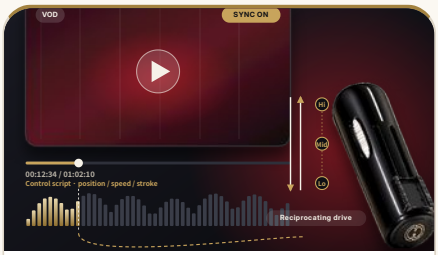

OUTPUT
5
LINKER
SPADE → position · speed · stroke
HEART → mode · intensity

THREE WAYS CONTENT DRIVES THE DEVICE

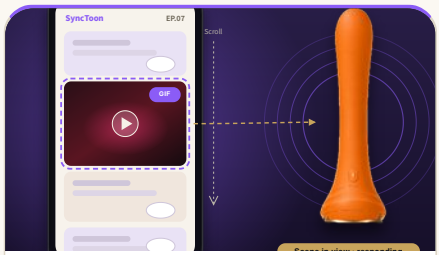

LIVE REAL-TIME SYNC

01 Streamer opens a live room, connects HEART · controller
02 Viewers enter and connect their LINKER (LINK → blue)
03 Touch and gifts sync to every device instantly

VOD TIMELINE SYNC

01 Each video carries a script mapped to playback time
02 Press play — LINKER moves along the script
03 Pause · seek · speed · drops stay in sync

SyncToon SCENE TRIGGER

01 Scroll down and read the webtoon as usual
02 An animated scene enters the screen — LINKER responds
03 Stops when the scene leaves; waits for the next

CONNECT IN 3 STEPS

1 **Wear**
Wear & secure as in the manual

2 **Connect**
Pair over Bluetooth in the web / app

3 **LINK**
Short-press LINK → blue light → start

LINK → ✓ LINK

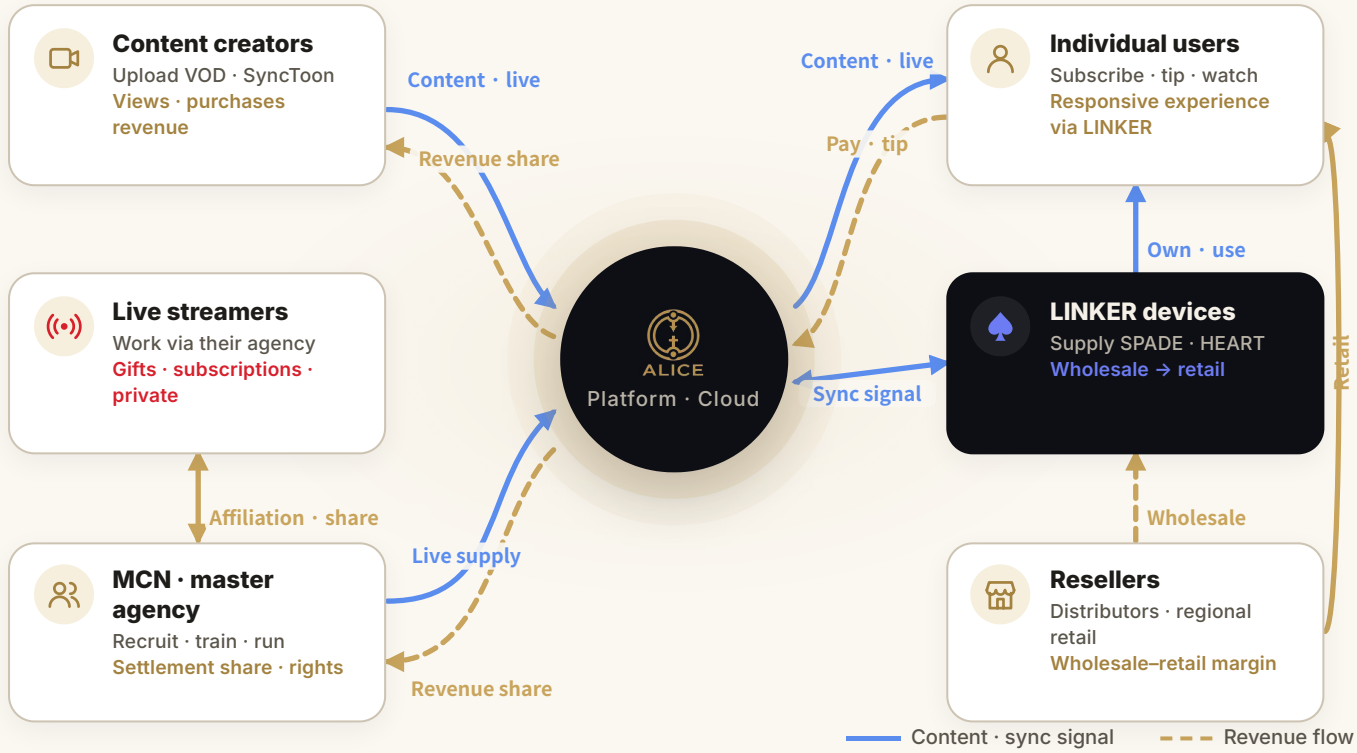

Every command travels inside five layers: session token · encryption · intensity limits · emergency stop · audit log.

WHAT IS SYNCHRONIZED

- **Position · speed · stroke**
  SPADE reciprocating drive
- **Mode · intensity · pattern**
  HEART vibration response
- **Timing**
  Playback state · scene · real time

Who does what, and how they earn.

There are six places in the ALICE ecosystem. Content flows from left to right; revenue flows from right to left. Whichever place you take, you are connected to the other five.

WHO EARNS WHAT

ROLE	WHAT THEY DO	REVENUE SOURCE	HOW TO START
Individual user	Buy LINKER · subscribe · tip	— (consumer of the experience)	Buy from a reseller / official channel → QR
Content creator	Produce · upload VOD · SyncToon	Views · purchases · subscriptions on uploads	Register a creator account → submit a sample
Live streamer	Live streaming · LINKER interaction (via agency)	Gifts · subscriptions · private · VOD replays	Register via agency (MCN) → kit → go live
MCN · master agency	Recruit · run streamers · country ecosystem	Share of streamers' revenue · device distribution	Agree region · terms → master agreement
Reseller · distributor	Buy LINKER wholesale · sell retail	Wholesale–retail margin · bundles	Region · channel · volume → quote

PLATFORM REVENUE SPLIT

- Settlement base = sales − taxes − payment fees
- Creator · streamer · agency · platform split by contract
- Platform share → technology · operations · marketing

DEVICE REVENUE

- Own device sales, separate from the platform
- Wholesale (resellers · agencies) → retail (users)
- More device owners → more interaction revenue

ALICE

01

ALICE Platform

A creator-driven immersive interactive entertainment platform. Live, VOD, interactive webtoon and community — one account, one device.

09 Platform overview · six services
10 LIVE · real-time sync
11 VOD · timeline sync
12 SyncToon · interactive webtoon
13 Feed · creator channels · subscription
14 Creator studio & monetization
15 Why ALICE wins
16 Trust & safety

One account, four content formats.

The ALICE platform is built around four content areas — **LIVE · VOD · SyncToon · Feed** — plus creator channels and subscriptions. All content shares one connection layer: as long as LINKER is connected, any content can "respond".

ALICE platform home — desktop and mobile

User app
Web · mobile web · app. Browse, watch, connect a device, subscribe and tip — one account for all content.

Creator studio
Go live, upload, schedule, manage fans, revenue dashboard and settlement — the creator's operating hub.

Operations back office
Creator pipeline, settlement and refunds, KYC and content review, support, device inventory and activation.

SIX SERVICES

Six services that turn "watched" into "experienced"

01 · FLAGSHIP
Live Sync
Creators and fans connect two-way in real time, and every reaction syncs instantly to LINKER devices. A community experience driven by fan participation.

02 · ZERO-DELAY
Synchronized VOD
Premium licensed video synced second by second with device control scripts — content you don't just watch, but go through.

03 · NEW FORMAT
ALICE SyncToon
Webtoon stories whose key scenes become motion. The moment a scene scrolls into view, the device responds to the narrative.

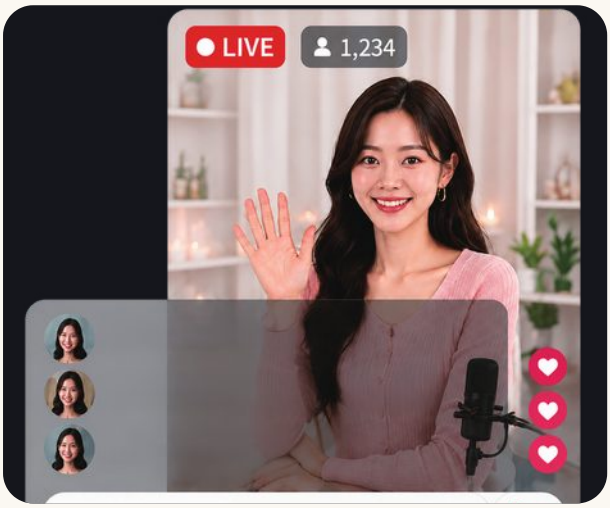

04 · OPEN PLATFORM
UGC Video
Users and creators produce, upload and share directly — a participatory content ecosystem that keeps expanding the catalog.

05 · PREMIUM
Creator private communities
Paid membership communities for star creators: exclusive content and dedicated messaging, a deeper layer between fan and creator.

06 · ON ↔ OFFLINE
Offline events & merchandise
Fan meetings with star creators, immersive experience events and limited brand / artist merchandise extend the online experience into the real world.

Connected in real time, responding instantly.

LIVE is ALICE's flagship scene. Every touch on the streamer's controller passes through ALICE Cloud, becomes a control command and reaches every LINKER in the room in the same instant. Not remote control — a synchronized experience shared by the whole room.

Live room: real-time chat · gifts · viewer count

GIFT EXAMPLES

Cherry Blossom	$1.00
Tulip	$3.00
Rose	$5.00
Premium Bouquet	$10.00

Gift types and prices follow the launch version and can be configured per country / region.

1:N live-room sync
One streamer's controller input reaches every connected viewer device in the room at the same time, in sync.

1:1 two-way link
In private lives, both sides' controllers and devices link to each other for a truly two-way connection.

Gifts & tipping
Viewers send gifts in real time; the streamer receives them instantly as revenue, and gifts can trigger device effects.

Live chat & interaction
Comments, reactions and invites appear live, so the streamer can interact while inviting more viewers in.

Private / VIP lives
Private sessions for subscribers or VIPs, with priority access and exclusive interaction.

Replay saved as VOD
When a live ends, the recording is saved automatically; edit the details, publish it as VOD and keep earning.

1 : N SYNC FLOW

Streamer controller
touch position / range

→

Streamer client
Bluetooth relay

→

ALICE Cloud
session · rules · conversion

→

Viewer clients
real-time distribution

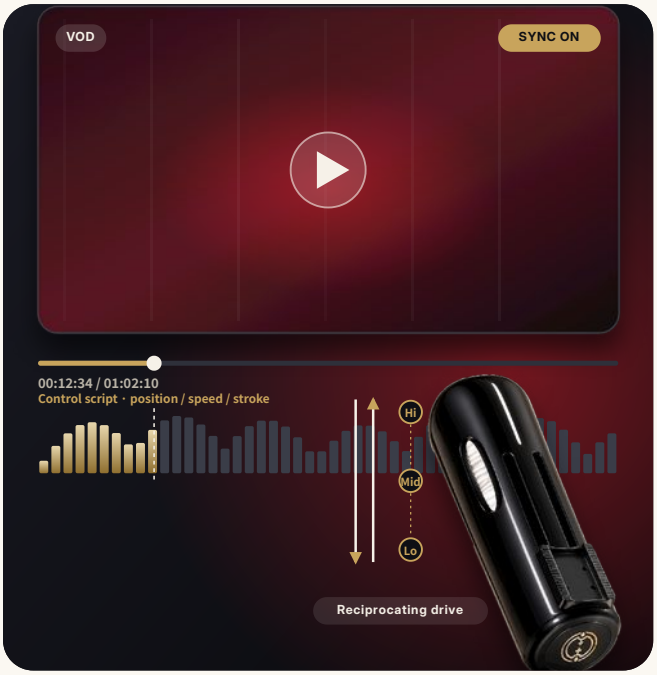

→

Viewer devices ×N
synced motion

One streamer → one live room → N devices in sync. Latency compensation: server timestamps · buffering · client re-sync.

The moment the video starts, so does the response.

VOD mode aligns video content with a device control script on the timeline. Every motion and rhythm in the video maps to a set of position · speed · stroke parameters that drive LINKER second by second as it plays.

VOD mode: playback timeline · control script · device move together

PLAYBACK STATE SYNC

When playback changes, the device changes with it

PLAY **Play**	Device script plays in sync
PAUSE **Pause**	Device stops immediately
SEEK **Seek**	Control values re-sync to the new timecode
SPEED **Speed change**	Control tempo adjusts to playback speed
OFFLINE **Network drop / reconnect**	Device stops; re-syncs after reconnection, then resumes

Not just "moving along with the video" — full synchronization of playback state and device control state.

01

Timeline control script

Every video gets pre-generated control data mapped to playback time — position, speed and stroke per segment. Compatible with industry-standard timeline scripts as well as ALICE's own format.

02

Creator script workbench

Creators mark motion points on their own videos with the ALICE script tool: key recording, heat-map positioning, undo, speed control. Any VOD can become "responsive".

03

Licensed premium content

Licensing partnerships with content companies in Japan and elsewhere bring in high-quality, fully device-synced video for a stable, high-value VOD library.

FUTURE

AI video analysis and automatic script generation, AI character–device linking, control values generated from user reactions — the sync layer is already built to extend to next-generation content.

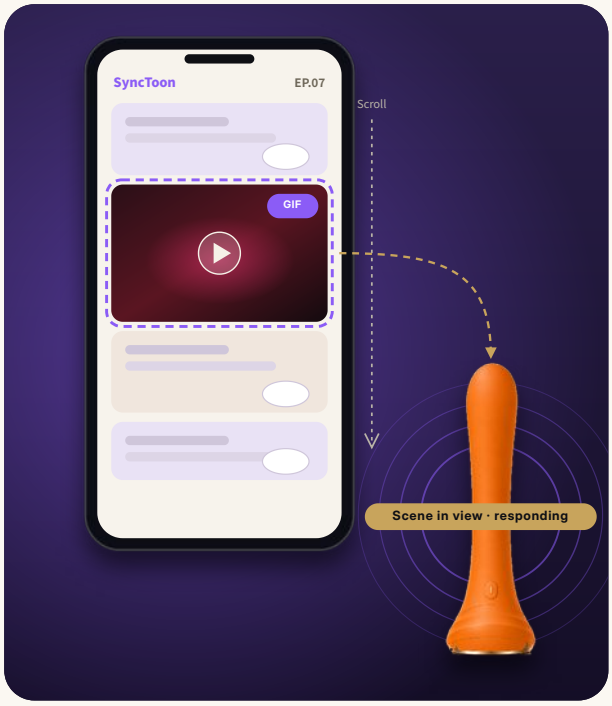

As the story moves forward, the connection begins.

SyncToon is a content format ALICE introduces for the first time. You read it like any webtoon, scrolling top to bottom — and when a highlight scene enters the screen as motion, LINKER responds. The trigger is not a timeline but "is the scene visible".

HOW IT WORKS

Read → scene enters → feel → continue

1. **Open the webtoon**
2. **Scroll down and read**
3. **Animated scene enters the screen** GIF / motion image
4. **Device starts responding** mapped control data is called
5. **Stops when the scene leaves** waits for the next trigger

SyncToon: the moment an animated scene enters the screen, the device responds

DIFFERENCE FROM VOD

VOD is driven by playback time; SyncToon is driven by **scene visibility while scrolling**. The reader holds the tempo, and that unpredictable "moment" is the appeal.

CIRCULATING HUB

One webtoon becomes the entrance to the whole platform

A conventional webtoon ends when you finish reading, and revenue stops at per-episode payment. SyncToon connects one episode to live, VOD, community and merchandise — scene unlocks · VIP · director's cut · merch · membership unfold layer by layer.

Read the webtoon → AI-animated key scenes → Device responds live → Author commentary / live → Community · merch → Next episode

Follow, subscribe, get closer to the creators you love.

Feed is ALICE's social layer. Creators run their channels and communities here; fans discover, subscribe and interact here. Even on days without a live, the relationship keeps building.

Creator cards: browse diverse content, subscribe and follow

Creator channels

Photos, posts, short video and updates — the creator's home page and the reason fans come back every day.

Subscribe & follow

Subscribe to updates, follow favorite creators, get live and new-content alerts, personalized recommendations.

Private communities

Paid-member-only spaces: exclusive content and dedicated messaging that build relationships outlasting any single piece of content.

UGC upload

Drag-and-drop video upload, edit the details and publish. Users and creators expand the platform's content together.

Fan messages

Fan DMs and reactions in one place, so creators respond efficiently and nurture their core fans.

News

Platform announcements, events and creator news keep the community warm.

Personalized content, richer experience. Subscription, viewing and interaction data shape each user's home, and creators get sharper exposure and higher conversion.

Every interaction becomes revenue.

ALICE gives creators a multi-layered revenue structure: a single payment from one fan can connect to subscriptions, interaction, private sessions and merchandise at once. Creator-first and transparent settlement are the platform's basic principles.

FIVE REVENUE POOLS

01
Subscriptions · view revenue
Monthly subscriptions, content purchases · view share

02
Interactive tipping
Gifts, live reactions, modes and intensity

03
Private / VIP
Private sessions, priority access

04
Devices & merch
LINKER, accessories, brand merchandise

05
B2B · license
White-label, studio, regional operation

CREATOR STUDIO

Creator studio

01 **Go live · upload · schedule**
One-click live, VOD upload and scheduled publishing

02 **Real-time dashboard**
Viewers, gifts, subscriptions and retention at a glance

03 **Fan management**
Subscribers, VIPs and messages in one place

04 **Revenue & settlement**
Multi-currency revenue totals, regular payouts

SETTLEMENT FLOW

01 **Sales occur**
Subscriptions · gifts · PPV · VOD views · private

02 **Taxes · payment fees deducted**
Local taxes and PG fees come off first

03 **Settlement base confirmed**
Transparent details on the dashboard

04 **Distribution · payout**
Creator · agency · platform split by contract, paid regularly

REVENUE SHARE

Creator first, ratios agreed by contract

The settlement base — after taxes and payment fees — is shared by the creator, their agency and the platform. Ratios are negotiated by content type (live · VOD · SyncToon) and agency contract; the platform's share funds technology, operations and global marketing.

Today's earnings example (creator guide): $3,855.00

Live → interact → earn → share again as VOD. Every live is recorded automatically; publish it as VOD and fans can rewatch any time, so one live keeps earning.

The difference isn't a feature — it's the structure.

We redefine the globally proven subscription and fan-economy model with "physical connection". Platform + device + payment + data + local operations combine into one complete Connected Experience.

01
World's first physical connection
A new dimension of immersion — not a connection on a screen, but a real response.

02
You're buying a relationship
Fans pay for their relationship with a creator, not a single piece of content. Deeper, and longer-lasting.

03
Real revenue is recurring
A device sale is only the beginning; ongoing platform interaction revenue follows.

04
Creators sell directly
Trust → purchase → spread. Creators recommend and sell devices and content themselves.

05
High lock-in
Device ownership plus accumulated relationships raise users' switching costs together.

06
Network effects
The more connections, the more the ecosystem's value grows — exponentially.

COMPETITIVE POSITION

Integrated revenue structure comparison

CAPABILITY	ONLYFANS	FANSLY	PASSES	CHATURBATE	ALICE
Membership / paid content	✓	✓	✓	△	✓

✓ full · △ limited / third-party · – non-core. Public feature comparison compiled June 2026; third-party policies may change.

Adult content, professional standards.

ALICE is an adults-only platform. Device linking is based on user consent and permission checks, and the platform can allow or block a device connection according to account permissions, content access rights, subscription and payment status, local law and age-verification conditions.

18+ age verification & KYC

All users and creators must complete age verification; creators additionally pass identity and eligibility review.

Consent-based device sessions

Before any device connects, the user must explicitly consent to a device link with that content or counterpart.

Emergency stop · manual stop

Users can disconnect or stop the device at any time; both streamer and viewer sides have one-touch stop.

Intensity · speed · stroke limits

Upper limits on control parameters follow user settings and can be adjusted instantly mid-session.

Country / region compliance

Content and device features are enabled according to local law. In mainland China only LINKER devices are sold; the ALICE platform service is not offered.

Encryption & session tokens

Device sessions are token-authenticated and control commands are encrypted; only authorized sessions receive them.

Complete logs

Connection, consent and control events are all logged — traceable and auditable.

Content review & support

Professional content review and multilingual support protect a safe experience for creators and users.

Safety is not a feature — it is part of the protocol.

Session tokens · encryption · intensity limits · emergency stop · audit logs — every control command travels only inside these five layers of rules. The core of the technology is not speed but a "safely controlled real-time experience".

LINKER

02

LINKER Devices

Official partner devices of the ALICE platform. Every interaction becomes a real, physical response.

18 Line-up: SPADE · HEART

19 LINKER SPADE — Spade Series

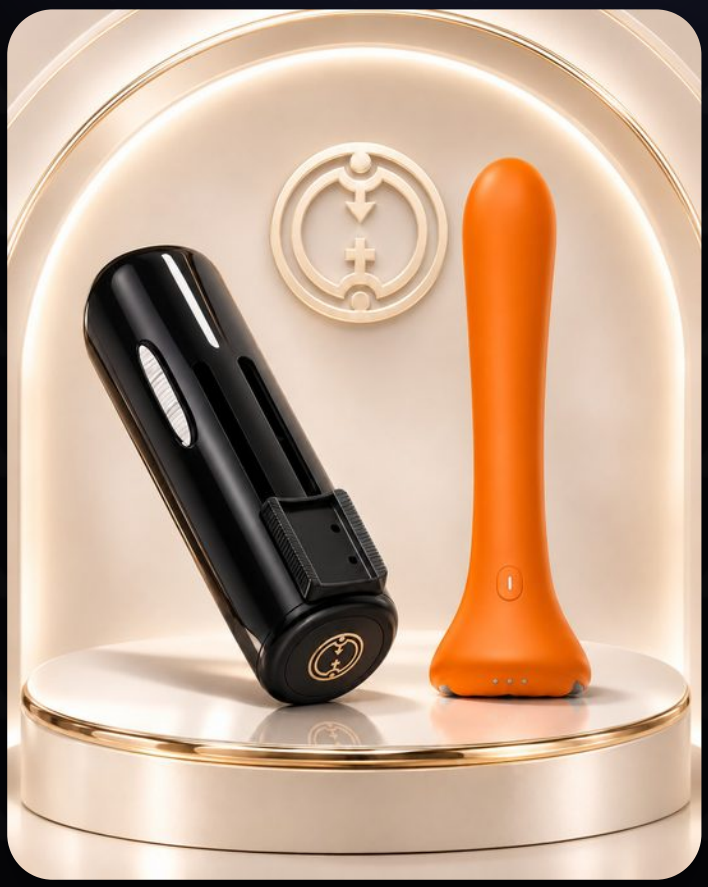

20 LINKER HEART — Heart Series

21 Connection architecture & sync technology

22 Three sync modes · user flow

23 Packaging · certification · specs

24 Patents & intellectual property

Two series, one connection layer.

The LINKER line-up takes its names from playing-card suits. The **SPADE series** is built around reciprocating drive and a position-mapping controller; the **HEART series** responds to audience participation in real time with multi-mode vibration. Both series are unisex devices and share the same ALICE sync protocol.

♠ SPADE

UNISEX · SPADE SERIES

Product	LINKER SPADE · Spade Series
Model	AC-SPADE-N-01
Dimensions	235 × 66 × 71 mm
Materials	ABS · TPE
Input	5V = 1A
Connectivity	Bluetooth · Wi-Fi
Drive	Reciprocating · position / speed / stroke control
Expansion	Strap-type external module interface
Standard	Q/XYS 1-2025

♡ HEART

UNISEX · HEART SERIES

Product	LINKER HEART · Heart Series
Model	AC-HEART-N-01
Dimensions	220 × 67.8 mm
Materials	ABS
Input	5V = 1A
Connectivity	Bluetooth
Response	Multi-mode vibration · real-time response
Use	Unisex · streamer side · user side, two-way
Includes	Creator guide · live kit

Bluetooth connection
Relayed to ALICE Cloud via the web / app client

Three sync modes
LIVE · VOD · SyncToon all supported

Safety control
Intensity limits · emergency stop · session authentication

Colors and appearance show product samples; production specifications follow the final shipping version.

LINKER SPADE

♠ AC-SPADE-N-01

The Spade series is LINKER's flagship reciprocating device. It is not a push-button remote: it maps the physical position of the input to the physical position of the output. Every movement of a streamer or a video arrives at the same position, in the same rhythm.

LINKER SPADE with retail packaging

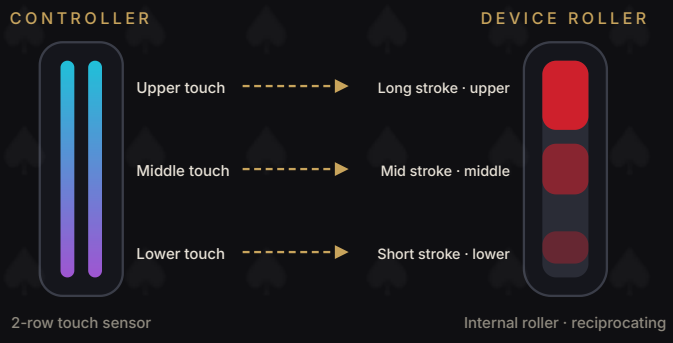

Reciprocating drive
Speed, stroke length and position are the control parameters, faithfully reproducing the controller's touch position and rhythm.

Position-mapping controller
A two-row touch sensor built into the controller detects touch position and range; the sensor length maps 1:1 to the stroke of the roller inside the device.

Strap-type external module
The drive unit couples with off-the-shelf accessories or dedicated modules via a strap / band interface to extend how the device is used.

LINK button · blue LED
Short-press the LINK button on top of the device: the indicator turns blue, the connection completes, and content responds immediately.

POSITION MAPPING

SETUP IN 3 STEPS

01 **Wear the LINKER device**
Wear it correctly as described in the manual and check that strap and module are secured.

02 **Connect via USB or wireless**
Pair over Bluetooth from the web / app client.

03 **Power on · short-press LINK**
When the indicator turns blue the connection is complete — start right away.

LINK → ✓ LINK

LINKER HEART

AC-HEART-N-01

The Heart series is a unisex multi-mode device for every user and every live streamer. Viewer participation, gifts and reactions pass through ALICE Cloud and become device responses instantly. A live is no longer only watched — it is felt.

Multi-mode vibration, real-time response
The device responds instantly in multiple modes according to audience participation and gift triggers, in sync with the live screen.

Designed for live streamers
Prepare the device, connect the streaming equipment, check battery and connection — three steps and you are in an interactive live.

Linked sound & visual effects
Vibration, sound and on-screen effects work together, so every viewer action is seen, heard and felt.

Streamer side · user side, two-way
An interaction tool for the streamer and an experience device for the user. In 1:1 private scenes it links both ways.

LINKER HEART with retail packaging

CREATOR FLOW

Go live, connect, earn, and meet again as VOD.

Go Live → Interact → Earn → Share as VOD

Viewer participation → device response → gifts and revenue → publish the live recording as VOD. The creator guide walks through all 12 steps from login to publishing.

SPEC

AC-HEART-N-01

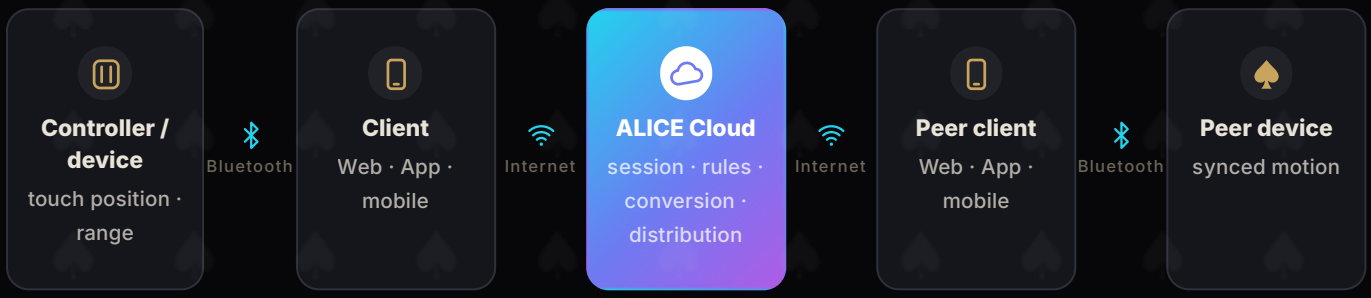

220 × 67.8 mm

ABS · 5V = 1A

Bluetooth · Unisex

One input, an instant response.

LINKER connects over Bluetooth to a web or app client, and the client relays communication with ALICE Cloud. The cloud manages sessions, permissions and rules, converts inputs into control commands and distributes them to one or many devices. This structure supports 1:1 and 1:N at the same time.

1 : 1 two-way link

Two users' controllers / devices link to each other. A's controller input travels through A's client and ALICE Cloud and becomes B's device motion, and vice versa. Device-to-device mutual input and output is supported as well.

1 : N live-room sync

The streamer opens a live room → viewers enter and connect their own LINKER → the streamer operates the controller → the cloud converts it into control commands → distributes them to every device in the room at once → every device performs the same motion in real time.

FIVE LAYERS OF SAFETY

Session tokens
Only authorized sessions receive commands

Encrypted transport
End-to-end encrypted control commands

Intensity limits
Caps on speed · stroke · position

Emergency stop
One-touch stop from either side

Audit logs
Connection · consent · control events

30 SEC
One input, instant response
Streamer input → user device responds

60 SEC
Becomes a revenue event
Mode / intensity change + payment · log

90 SEC
Two-way · safe · operable
Feedback + timeout + safety stop

Latency compensation for multi-device sync: server timestamps · buffering · client re-sync · stop and recover on network drop.

Three modes, one device.

A live in progress, a licensed video or an episode of an interactive webtoon — as long as LINKER is connected, the content can "respond". The modes differ only in how they trigger; the connection layer is always the same.

LIVE
REAL-TIME SYNC

The touch position on the streamer's controller becomes the motion of every viewer device in the room, in real time. 1:1 private linking is supported too.

VOD
TIMELINE SYNC

Video and control script are aligned second by second. Play, pause, seek, speed change and network drops are all handled in sync.

SyncToon
SCENE-TRIGGER SYNC

While scrolling, the device responds when an animated scene enters the screen and stops when it leaves. The reader holds the tempo.

FROM LOGIN TO EXPERIENCE

Four steps into the connected experience

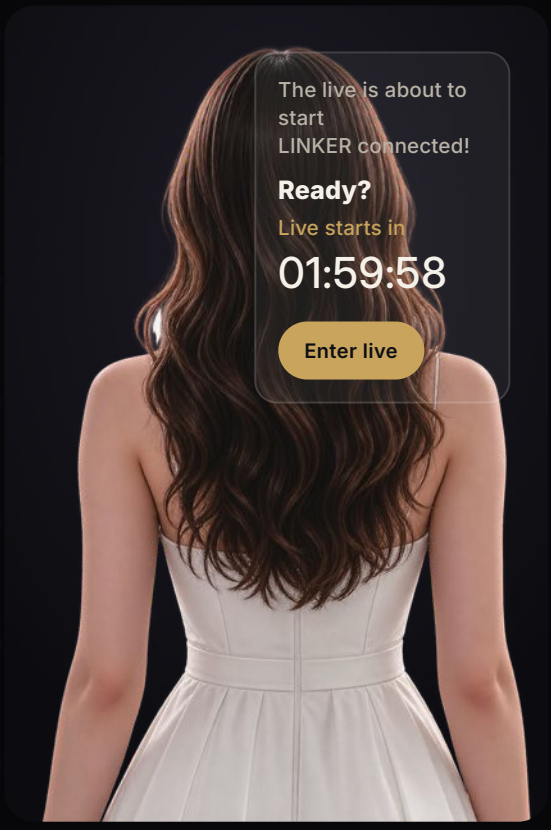

01 **Log in to ALICE**
Sign in to your account on web or mobile and open the home screen.

02 **Choose content**
Pick the VOD / LIVE / SyncToon content you want to experience.

03 **Short-press the LINK button**
Short-press the LINK button on top of the device; the indicator turns blue and it is connected.

04 **Start the experience**
The moment the content starts, LINKER responds.

Usage guidance: keep first sessions short · maintain a stable posture · intensity varies with the content · avoid excessive use and rest appropriately for your health and comfort.

Open the box. Connect.

Product and series identity on a black card-suit pattern; specifications, certification marks and QR connection guidance on the back. Manuals in English, Chinese and Japanese are included, and bulk packaging can be customized to distribution requirements.

LABEL INFORMATION

Brand	ALICE
Product	SPADE Series / HEART Series
Model	AC-SPADE-N-01 / AC-HEART-N-01
Materials	ABS · TPE / ABS
Input	5V = 1A
Standard	Q/XYS 1-2025
Origin	Made in China

CERTIFICATION & MARKS

CE · RoHS · 18+ · Made in China

Marks shown reflect the shipping package; country / regional import certification is handled together with distribution partners.

Multilingual manuals

English · 简体中文 · 日本語 — user guide and creator guide.

Notice: adults only. Use as directed in the manual, avoid excessive use and rest appropriately for your health and comfort.

What we protect is not one device — it is the whole connection structure.

The patent protecting ALICE × LINKER sync technology is not limited to a single product. It covers the entire system and method of converting a content platform's input, event and timeline data into device control signals and distributing them to one or more devices in real time or time-synchronized form.

INVENTION PATENT · KOREA

10-2026-0150581

Filed 2026-08-12
System and method for real-time synchronized control between a creator content platform and network-connected devices

PCT · INTERNATIONAL

PCT international filing in preparation

Covers key target markets with the Korean filing as priority basis.

BRAND

ALICE · LINKER · SyncToon

Brand names, logos and series naming (SPADE · HEART).

PROTECTED SCOPE

- Linking system between a creator content platform and network-connected devices
- Architecture in which the device connects to a client over Bluetooth and the client relays server communication
- Conversion of controller touch position / range values into device position, speed and stroke
- Position mapping in which controller sensor length corresponds to the stroke of the device's internal roller
- 1:N structure controlling many viewer devices in a live room in real time from a single controller input
- 1:1 device-to-device or controller-to-device two-way linking
- Synchronization of the VOD playback timeline with device control scripts (including pause · seek · speed · drop handling)
- Triggering a device response when an animated scene inside SyncToon enters the screen
- Reciprocating device structure that couples with external modules via a strap / band interface
- Extensibility to AI video analysis, automatic script generation and AI character linking

Patent status follows the official publications of each patent office. Nothing on this page constitutes legal advice.

ALICE

03

Partnership Programs

Five partnership tracks.
Users, resellers, creators, streamer agencies, national master agencies — there is an entrance for everyone.

26 Partnership tracks at a glance
27 Creator & live streamer program
28 MCN · national master agency

Five tracks, one ecosystem.

Different interests, different entrances — but every track leads into the same ALICE × LINKER ecosystem. Find your place. That is where it starts.

WHO YOU ARE	WHAT YOU GET	WHAT WE PROVIDE	NEXT STEP
Individual users Adults who buy LINKER for synced content	Device + ALICE account · three sync modes · multilingual manual	Retail channels · connection guide · customer support	Buy from a reseller or official channel → connect via QR
Resellers / distributors Retail or distribute LINKER in their region	Volume pricing · regional rights · marketing kit · after-sales	Product supply · expo and demo support · certification	Region, channel and expected volume → quote
Content creators Studios and creators making VOD / SyncToon	Publishing · script workbench · view / purchase revenue share (negotiated)	Creator studio · sync technology support · exposure	Register a creator account → submit a sample
Live streamers & MCNs Streamers on ALICE, or agencies running them	Live revenue · gifts · subscriptions · streamer kit · agency share (negotiated)	Training · device supply · dashboard · settlement	Register via the agency (MCN) → trial live
National master agencies Exclusive operators of the streamer ecosystem and devices in a country	Exclusive / non-exclusive rights · 2-year contract · share · priority supply	Platform · devices · technology · marketing · compliance framework	Agree region and terms → master agreement

HOW TO START

STEP 01
Inquire
Scan the back-cover QR or email us — who you are and what interests you.

STEP 02
Meet
We reply within three business days and set up a meeting, online or in person.

STEP 03
Sign
We sign the agreement for your track: distribution / creator / agency.

STEP 04
Start
Device supply, accounts, training and marketing start together.

Not sure which track fits you? Tell us about your business by email or WeChat (see p.32) and we will suggest the right entrance — or combine tracks, such as a reseller who also runs a streamer team.

Go live, connect, earn. Meet again as VOD.

Live streamer, video creator or webtoon author — ALICE provides a complete toolchain from publishing to settlement. And a fan base that "responds".

HOW TO JOIN

01 **Register a creator account**
Content creators sign up directly; live streamers register through their agency (MCN).

02 **Eligibility review**
Complete 18+ age verification and identity review (KYC).

03 **Receive / purchase LINKER**
Get the streamer kit through your agency or an official channel.

04 **Stream or upload**
Start a live, upload VOD or submit a SyncToon work.

EARNINGS

Gifts & tips
Received live during streams, counted as revenue instantly

Subscriptions & membership
Monthly subscriptions, private community membership

Paid content / PPV
Individual content purchases, private sessions

View revenue on uploads
Share from views and purchases of VOD · SyncToon, including live replays

REVENUE SHARE

After taxes and payment fees, the settlement base is **shared by creator, agency and platform at contracted ratios**. Regular payouts, multi-currency.

LIVE IN 12 STEPS

From the LINKER creator guide

01	Prepare LINKER
02	Prepare streaming gear
03	Log in to creator account
04	Connect LINKER
05	Check camera · mic
06	Set a title and go live
07	Real-time interaction
08	Receive gifts
09	Engage with viewers
10	Save after ending
11	Upload as VOD
12	Keep creating

Live streamers work through an agency. An MCN or master agency handles account setup, device supply, training and settlement in one place, and the split between agency and streamer is set by the two of them. Streamers without an agency can contact us and we will connect them with a regional agency.

Run the entire streamer ecosystem in your country.

The national master agency is the core model of ALICE's global expansion. An agency that knows the local market runs streamers, operations and distribution; ALICE provides the platform, devices, technology and global marketing. The first master agency, in Vietnam, signed in June 2026 and is operating.

Exclusive or non-exclusive

Operating rights are granted per country, as an exclusive or non-exclusive model.

2-year contract term

Base agreement of two years; amounts, installments and details are set in an annex.

Streamer recruitment & ops

The master agency recruits, trains, schedules and runs the local streamer community.

Device distribution

Priority supply and distribution rights for LINKER in the agency's country.

Settlement & share

After taxes and payment fees, the settlement base is shared by agency, creator and platform at contracted ratios.

Global marketing support

Platform-level exposure, expos and international events, contract and compliance framework.

CASE · VIETNAM

Exclusive master agency, Vietnam

Signed June 2026 · Ho Chi Minh City · 24 creators onboarded in four groups. ALICE's first country-level MCN partnership.

24

Contracted creators

PIPELINE · KOREA

Korean creator pipeline

21 creators — models, racing models, DJs, fitness, beauty and short-form — with 3.37 M+ combined social followers. Growing continuously.

3.37M+

Combined social followers

OPEN TERRITORIES

Territories open for master agencies

Mainland China · Japan · Thailand · Philippines · Indonesia · Europe · North America · South America · Central Asia and more.

Priority is given to agencies with streamer resources, local compliance and operating capability.

Master agency fees, installments and exclusivity scope follow the master agreement and annexes signed by both parties.

Bring LINKER to your market.

LINKER can be sold worldwide, including mainland China. Resellers and distributors get volume pricing, regional rights, marketing materials and after-sales support — and, for deeper cooperation, a B2B license program: white-label, studio, regional operation.

WHOLESALE · LINKER SPADE

Wholesale price (USD, per unit)

AC-SPADE-N-01 · MOQ 100 units per confirmed order · non-cumulative

100 – 499 units	500 – 999 units	1,000+ units
$85	$80	$75

Freight · insurance · duties · taxes extra · non-exclusive resale (exclusivity by written agreement) · order online at vionexahub.com · HEART pricing on request
Wholesale order form (EN · CN) attached

Volume pricing
Tiered quotes by volume; stable pricing and priority supply for long-term partners.

Regional rights
Distribution rights by country / region; exclusivity can be applied for.

Marketing kit
Product images, video, this catalog, packaging and expo materials, multilingual.

Expos & offline demos
Joint expo participation, in-store demo stands and event support.

Certification & after-sales
Import certification by country, warranty, spare parts, technical training.

Custom packaging & bundles
Bulk packaging, gift boxes and 'device + platform experience' bundles.

COMPARE

ITEM	INDIVIDUAL	RESELLER	MASTER AGENCY
Device purchase	Retail price	Volume pricing	Agency pricing · priority supply
Regional rights	—	Distribution rights · optional exclusivity	National exclusive / non-exclusive
Platform benefits	User account	Co-marketing · activation	Ecosystem operation · revenue share
Support	Support · manuals	Materials · expos · after-sales	Platform · tech · marketing · compliance

Pricing, MOQ and regional terms are set by negotiation. Tell us your region, channel and expected volume and we will send a quote.

B2B · LICENSE

- **White-label** — Operate a localized platform or device under the partner's brand.
- **Studio** — Produce synchronized content and SyncToon together with a content studio.
- **Regional operation** — Jointly operate platform, streamers and distribution in a specific market.
- **Co-brand** — Collaboration devices and merchandise with brands, artists and IP.

Starting in Asia, heading worldwide.

ALICE started in Korea, Vietnam, Taiwan, Japan, Hong Kong and mainland China and is expanding into Europe, North America, South America, Asia-Pacific and Central Asia. The principle is simple: wherever there is an expo about adult platforms, devices and ecosystems, ALICE is there.

CURRENT MARKETS

Creator network: 24 in Vietnam · 21 in Korea, growing continuously

Why now.

The creator economy, live streaming and interactive devices are all growing fast at the same time — yet the platform that connects the three is still missing. LINKER devices are ready for mass production and the ALICE platform has entered its launch phase. This is the best moment to join.

$480B

Creator economy · 2027E
$250B in 2025 → $480B in 2027 (Goldman Sachs)

$345B

Live streaming market · 2030E
$87.5B in 2023 → $345.1B in 2030, CAGR 23% (Grand View Research)

$241B

SexTech market · 2035E
$50.3B in 2025 → $240.6B in 2035, CAGR 17%, APAC growth 19.3% (SNS Insider)

WHY ALICE · WHY NOW

- **One-way viewing → two-way participation**
  Streaming is already everywhere, but 'participation' is still stuck at chat and tipping. A structure where participation itself becomes revenue is still an open space.
- **Add an experience layer — don't educate demand**
  ALICE does not create new demand. It adds one 'interaction layer' on top of proven willingness to pay.
- **The device opens, the platform continues**
  Device sales start the ecosystem; subscriptions, interaction and merchandise build into recurring platform revenue.

12-MONTH ROADMAP

LAUNCH

0–3 MONTHS

Official platform launch · first device shipments · streamers go live in core markets

GROW

3–6 MONTHS

More master agencies · creator scale-up · expanded VOD and SyncToon library

SCALE

6–12 MONTHS

5+ new territories · distribution network · B2B licenses and collaborations

Market data: Goldman Sachs · Grand View Research · SNS Insider. The roadmap is a plan; actual progress follows official announcements.

ALICE | LINKER

CONTACT
