

Start with the room you use most.

Smart controls, lighting and everyday comfort.
Made around the way you live.

Illustrative room setting

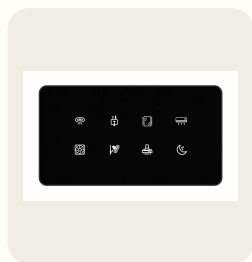

TouchX glass panels

A considered finish for your walls.
Layout and icons chosen for your room.

Plan one room. Explore at your pace.

Walls that work for you.

Three ways to make compatible switches smarter.

TouchX

A coordinated glass panel

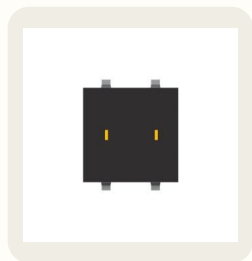

Choose a glass finish, control layout and familiar icons when ordering. Available in 2M, 4M, 6M, 8M and 12M sizes.

Retrofit Pro

Keep your existing switches

A smart module fits behind a compatible switchboard. Tixa checks space, wiring and connected loads before recommending a model.

Mosaic Pro

Choose individual touch modules

Build around a compatible modular plate. The exact plate series and module combination need to match.

Not sure which fits? Send Tixa a photo of the switchboard and your city. M refers to plate size, not the number of controls.

Little changes. Better everyday.

Choose what matters in the room you use most.

Lighting

Create the mood you want with selected lights, strips, magnetic track fixtures and compatible dimming.

Curtains & blinds

Open or close with a motor kit. Add a compatible controller for app and voice control. Fabric is separate.

AC & TV control

Bring compatible remote-controlled appliances into your setup. Share the brand and model for a fit check.

Smart access

Choose a lock around your door and access needs. Remote access depends on the selected lock and setup.

Sensors & actions

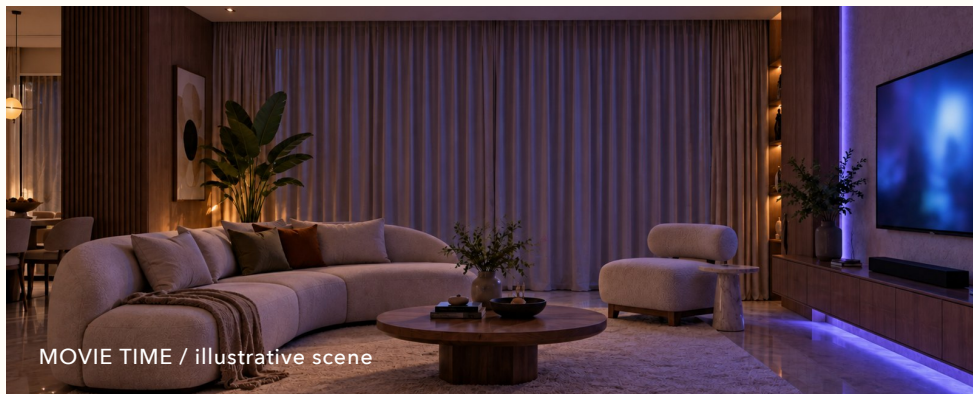

Use supported motion, presence or door events to trigger a switch, a scene or a configured alert.

Energy awareness

Explore selected energy meters and power controls. Tixa confirms the electrical format and supported functions.

Each solution needs suitable devices and installation. HomeSync is a Zigbee hub; hub and connectivity requirements vary by model.

Your home. Your kind of routine.

One moment, brought together.

A scene can bring selected lights, curtains and other compatible devices into the setting you choose.

Tixa app

Organise rooms, control supported devices, and set up scenes, routines and schedules.

Voice & shortcuts

Alexa, Google Assistant and Siri Shortcuts for supported devices and scenes, with setup guides.

[Explore app & setup guides](#)

Features depend on device and account setup. Optional messaging, camera cloud backup and alert services are paid services.

A first step. A plan that fits.

01 Tell us what would make life easier.

Share your city, one room and whether your home is existing, under construction or being renovated.

02 Let Tixa check the fit.

Send a switchboard photo or book a demonstration. We match controls, wiring, loads and accessories to your needs.

03 Review your quotation, then decide.

Confirm the products, installation and other costs before ordering. Saved online quotes use a quote number and private access code.

Visit Tixa Experience Center
113B, 1st floor, Westend Mall, Road No. 36,
Jubilee Hills, Hyderabad 500033.
Mon-Sat, 10am-6pm. Please arrange your visit first.

Good questions. Clear answers.

Can I start with an existing home?

Yes, suitable retrofit options can retain existing switches. Space, wiring and connected loads are checked first.

Can I use a fan dimmer with a BLDC fan?

Conventional fan dimmers are not for BLDC speed control. Share your fan model so Tixa can confirm a suitable option.

Do I need a hub or internet?

The requirement depends on your devices and functions. Tixa confirms local control, remote access, voice and hub needs for your setup.

What will my first room cost?

It depends on the controls, devices and installation. Website product estimates include GST. Wiring, installation, delivery and required accessories are confirmed separately.

What happens after installation?

Use the app and voice guides or contact Tixa for help. Magnetic TouchX panels have a 5-year service warranty; confirm coverage and terms in your quotation or invoice.

Hyderabad installation. Enquiries across India.

Availability and service for your location are confirmed with Tixa.
