Dermatologist and Cosmetologist

I have been in private practice since 1986. I currently run a fully equipped, state of the art clinic using a wide range of both standard and innovative protocols. What really sets me apart is my commitment and ability to offer personalised solutions for both healing my patients' skin - detoxifying, hydrating and combating inflammation - and rejuvenating it. From decades of firsthand experience I have a real world understanding of patients' needs and how best to meet them.

Researcher and Clinical Trials

I was an early adopter and advocate for the LED protocol in France. In 2009, I initiated and coordinated research with Ashland Laboratories in order to prove LED's efficacy. I am grateful that there are now several clinical trials which substantiate the claim that LED is an effective protocol which merits further development and advancement. These results have been instrumental in lending credibility to the LED method. Prior to these studies LED was not well known and not well seen in France.

Co-founder of Several Associations

To further the research of innovative skin rejuvenation techniques and to provide a forum for global experts to collaborate, I have co-founded a number of associations.

LED Academy

I co-founded the LED Academy in 2010 and am currently its Vice President. The aim was to bring together researchers, engineers and doctors to work on developing LED technology and discovering its full potential in skin rejuvenation.

I launched the **world's first certification programme in photobio-modulation LED** where I took part as an instructor.

Univers Skin

Years ago, I co-founded this company to provide innovative and personalised cosmetics and skincare products.

Since 1986 - Private practice in Nice, France

Range of Treatments

- | Injectables
- | Botox
- | Mesotherapy
- | Radio frequency
- | Laser treatments

Personal Strengths

I am curious by nature, which leads me to constantly keep up to date with and explore new techniques, ingredients and technologies in the skin care field. My passion is to innovate and find ever better solutions to meet the needs of my patients and I am personally and professionally committed to continuous development. I often bring together other experts in the field so that together we can contribute to ever better solutions for skin rejuvenation and anti-aging.

Education

Medical degree in 1984, **Polytechnique University of Nice**
Masters in Dermatology in 1985, **University of Marseille**
