## Global Centers of Excellence Outcomes for Joint Replacements & Bariatric Surgeries: Readmission Rates 45% Lower Than U.S. Average

### Summary

For over 15 years, World Class Health has been connecting patients to top global hospitals and doctors and is the largest Global Centers of Excellence platform serving employers today. This study validates the superior clinical outcomes World Class Health achieves for its patients through:

Navigation to the global top 1% of hospitals (including the preferred treatment destinations of world leaders, athletes)

High-touch care coordination pre- and post-treatment via dedicated nurse case manager (often 30+ interactions)

Recovery as a core focus (a typical 5+ days of in-hotel recovery includes daily nurse visits and all required PT)

### We Know What Quality Means

Our leadership team has 125+ years of experience in roles including CMO, CTO and CEO at companies such as:

 Cigna  Clover Health  
 amwell  AON  Zocdoc

Our Clinical Advisory Board includes physicians and faculty at:

 JOHNS HOPKINS  NYU  
HARVARD

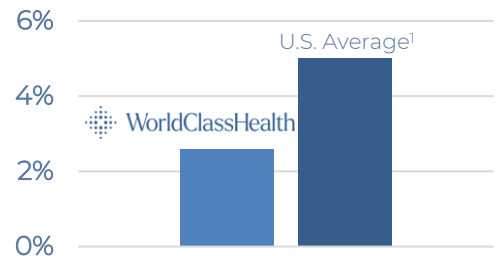

### Background

Patients in the U.S. and globally face barriers to accessing top-quality hospitals and surgeons. Companies that care deeply about their employees don't want geography, affordability, or the difficulty of navigating medical systems to get in the way of life-changing or life-saving care.

### Methodology

World Class Health clinicians conducted a retrospective analysis of 153 recent cases (75 bariatric surgeries, and 78 joint replacements) and compared observed clinical outcomes to U.S. averages.<sup>1</sup>

Lower 30-Day Readmission Rate for Bariatric and Joint Replacement Surgeries vs. U.S. Average

↓45%

lower 30-day readmission rate for bariatric and joint replacement surgeries vs. U.S. average<sup>1</sup>

1. <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC9001084/> and <https://pubmed.ncbi.nlm.nih.gov/27067353>

### Conclusion

In this sample of recent cases (bariatric and joint replacement surgeries are a large portion of the thousand of cases coordinated over the past 15 years), the World Class Health Global Centers of Excellence platform achieved clinical outcomes equal or superior to U.S. benchmarks.
