

ULTRAFOG – MARINE FIRE

ENGINEERED FIRE SUPPRESSION SYSTEMS

Designed For Large Yachts >24m or Class-Certified Yachts up to 500GT, MarineFire's engineered fire suppression systems use NOVEC 1230 as the extinguishing agent and provide reliable solutions for large pleasure craft, yachts, workboats, and marine vessels.

- **Fully customizable** with options such as activation modes (manual or manual/electric), delays, and sirens, these systems are housed in compact, solid cabinets for easy installation outside the engine room and fully integrable with the onboard fire alarm system. We also manufacture fully customizable CO2 fire suppression systems for galley hoods
- Additionally, we provide consulting and **system design services** based on the yacht's General Arrangement, offering a full turnkey solution—from design and engineering to manufacturing, system certification, after-sales support, and warranty services.
- They are tested to IMO/SOLAS standards and hold multiple international certifications.
-
