

AR ES

ARES

ENTERPRISE

ARES IS AN AUTONOMOUS RED TEAMING PLATFORM BUILT TO KEEP CONTINUOUS OFFENSIVE PRESSURE ON THE MODERN ENTERPRISE ATTACK SURFACE. POWERED BY A COORDINATED SWARM OF AI AGENTS, ARES HUNTS, EXPLOITS, CHAINS, AND VALIDATES VULNERABILITIES ACROSS APIS, WEB APPLICATIONS, AND MOBILE, PROVING WHAT AN ATTACKER CAN ACTUALLY ACCOMPLISH INSTEAD OF ADDING MORE FINDINGS TO THE PILE. WITH ARES, THE ENTIRE PLATFORM, INCLUDING THE AI MODEL, CAN RUN ON-PREMISES, INSIDE ISOLATED NETWORKS, IN YOUR OWN CLOUD, OR THROUGH SAAS, DELIVERING AUTONOMOUS OFFENSIVE SECURITY WITHOUT SURRENDERING CONTROL OF YOUR DATA, MODELS, OR ENVIRONMENT.

V2 SIDEWINDER

Full AI and Data Sovereignty	First AEV platform to run entirely inside your environment. Data and findings never leave it.	Continuous Adversarial Pressure	Tests every release as it ships. Not a quarterly penetration test.
Assail Anywhere™	On-prem, isolated, air-gapped, your cloud, or SaaS. AI model included.	Validated Exploitation	Exploited and proven, not scored. Prioritize on evidence.
Full Attack Chain Construction	Chains low-severity findings into complete attack paths.	Shadow AI and Shadow API Discovery	Finds the unsanctioned model and undocumented endpoint. Proves exploitability.
Modern Application Stack Targeting	Static code analysis (SAST), Dynamic code analysis (DAST) of source code repos, AI, APIs, web, and mobile. One platform.	Self-Correcting Operations	Reviews her own reasoning, fixes her own mistakes. Sharper every run.
No Training on Customer Data	Your data never trains our models. Ever.	Post-Quantum Encryption	Post-quantum encryption for Q-Day readiness against harvest-now, decrypt-later
