

The Ether Machine

Spokesperson - *Andrew Keys*

—

Andrew Keys is the Co-Founder and Chairman of The Ether Machine, where he leads the company's mission to provide institutional-grade access to Ethereum's economic infrastructure.

A pioneer in Ethereum's institutional adoption, Andrew previously co-founded DARMA Capital, a CFTC-registered commodity pool operator and advisor managing over \$1 billion in ether-focused strategies. Before DARMA, he served as Head of Global Business Development and a board member at ConsenSys, the leading Ethereum software engineering firm.

At ConsenSys, Andrew helped position Ethereum at the center of enterprise and government innovation, creating the first Ethereum Blockchain-as-a-Service with Microsoft, which propelled Ethereum to trade above \$1 in 2015. He co-founded the Enterprise Ethereum Alliance (EEA) in 2017 – the largest open-source blockchain consortium in the world with members including J.P. Morgan, UBS, Credit Suisse, BNY Mellon, Santander, Microsoft, Intel, BP and Accenture. Andrew's work has bridged blockchain technology with central banks, Fortune 500s, and financial infrastructure leaders around the globe for most of the last decade.

He began his career in technology equities analysis at UBS, and holds a bachelor's degree in Economics from Loyola University Maryland.
