

Goodbye, boring banking. Hello, PiXi AI.

The intelligence layer of the PortX platform gives financial institutions enterprise-grade power without armies of specialists, custom code, or heavy infrastructure.

What It Is

PiXi is the **AI foundation of the PortX Platform**. It enables banks and credit unions to connect systems faster, govern data more effectively, and unlock insights instantly.

With PiXi, institutions can interact with integrations and data using natural language, automate repetitive tasks, and ensure governance through **compliance-first AI** built specifically for financial services.

With PiXi, financial institutions no longer need teams of analysts, data scientists, engineers, and DevOps working hand-in-hand with complex infrastructure and custom code. PiXi puts that power directly into the hands of your team through **automation, orchestration, and natural language intelligence**.

Why it Matters for Financial Institutions

AI You Can Trust.	Data never leaves your tenant and is never used to train external models.
Faster Projects.	Automates data mapping and integration tasks, shrinking timelines from months to weeks.
Conversational Insights.	Ask questions in plain English and instantly get trusted, real-time answers.
Governance Built-In.	Ensures every connection and decision is powered by accurate, consistent data.
Future-Ready.	Expanding AI-powered capabilities across integration, data, and payments.

hello@portx.io

What it Does

Automates Data Mapping.

Built into **PiXi Data Mapper**, eliminating brittle manual schema alignment.

Accelerates Integration.

Works within **Integration Manager** to streamline connectivity and orchestration.

Unlocks Data Access.

Embedded in **Data Manager**, enabling natural language queries and AI-powered dashboards.

Enhances Payments.

Powers intelligent workflows and automation in **Payment Manager**.

Supports Governance.

Enforces accuracy, consistency, and compliance across the PortX Platform.

Key Features

Natural Language Queries.	Ask your data questions in plain English and get instant, trusted insights.
AI-Powered Data Mapping.	Simplifies and accelerates schema mapping and transformations.
Automation & Orchestration.	Reduces manual tasks across integration workflows.
Compliance-First Design.	FI-grade AI: secure, governed, and auditable.
Platform-Wide Intelligence.	Embedded across Integration Manager, Data Manager, and Payment Manager.
