FRUITS | Kenya — Coast (Kilifi, Kwale, Tana River), Eastern, Central regions

Kenya Fresh Mango

We source a range of Kenyan mango varieties, but concentrate export programs on the low-fiber types that ship and ripen predictably. We can supply a single variety for a dedicated program, or a mixed-variety container to spread your supply across the full season.

QUICK FACTS

Country of Origin	Kenya
Growing Region	Coast (Kilifi, Kwale, Tana River), Eastern, Central regions
Processing	Hand-picked, packhouse graded, Class 1 export
Harvest Season	Main Nov–Feb (into Apr by variety); secondary coastal Jun–Aug
Available Grades	Apple, Ngowe, Kent, Tommy Atkins, Van Dyke, Keitt
Typical Lead Time	Confirmed per order

SPECIFICATION

HS Code	0804.50
Packaging	4kg cartons, count-sized by variety; sea-freight reefer standard, air freight on request
Certifications	GlobalGAP, KEPHIS phytosanitary certification, Organic (limited)
Typical Export Markets	Middle East, UK, EU

OVERVIEW

Kenya's mango calendar runs on two supply windows a year, not one — the main national harvest spans roughly November through February (extending into April for some varieties and altitude zones), and a second window centered on the coast, particularly Tana River and Garissa, runs from July into November. That coastal crop is what's moving right now: a smaller, regionally concentrated harvest compared to the November–February peak, but real, current supply.
