

In hospital medicine, the note carries the whole stay.

Your H&Ps, progress notes, and discharge summaries have to convey your reasoning to the next clinician, match care to guidelines, and demonstrate medical necessity and complexity for UM and CDI.

Sayvant was built by hospitalists to:

Draft your notes across the whole stay

Sayvant drafts your H&P, progress notes, and discharge summary with diagnosis-specific plans and medical necessity discussion so your notes are done as you round and you don't have to reconstruct patient care at the end of your shift.

Catch what matters before you sign

Every diagnosis and plan is checked against clinical guidelines, mapped to LOS, and discharge criteria. Sayvant flags gaps in documented clinical reasoning, lab and imaging interpretations, and response to treatment.

Reflect the full complexity

Sayvant ensures your notes reflect the care delivered and meet payer criteria: medical necessity demonstration, stronger diagnosis capture and specificity for DRG capture, and plan documentation that stands up to denials and downcodes.

RESULTS

Sayvant cuts documentation overhead for hospitalists and improves the defensibility of every chart.

▼ **50%**

Reduction in admission documentation overhead reported at a 200-bed community hospital

▼ **30%**

Reduction in short-stay medical necessity exposure measured across a 3-site health system

▲ **6%**

Improvement in expected GMLOS identified at a 150-bed community hospital due to under-documentation of patient complexity and risk

▲ **40%**

Improvement in critical care capture for a physician group across a 5-site health system

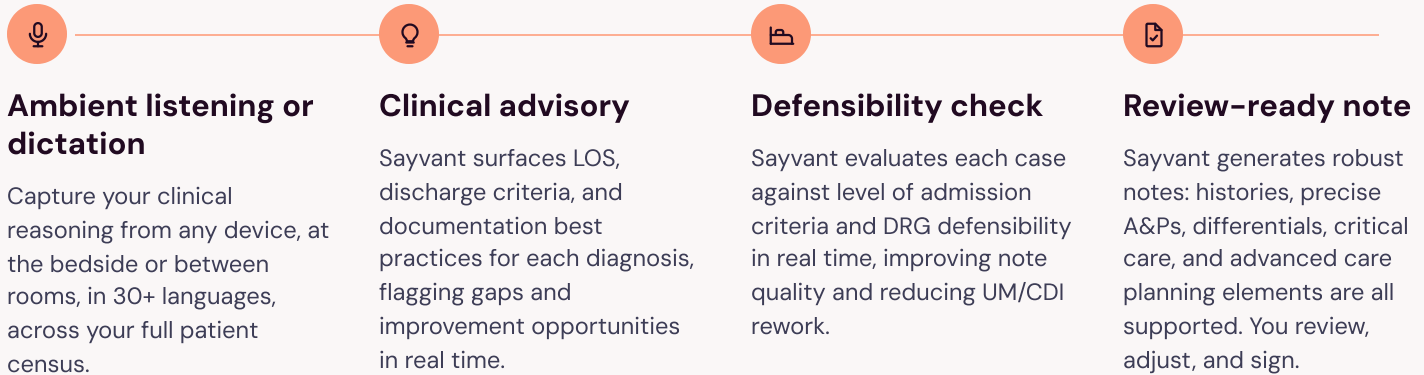

“

Sayvant's admission note narrative was very cohesive and human-like. The A&P was great and compliant with what my medical director wanted from me.

Jhonatan Muñoz, MD · Hospitalist, Huntington Health

From morning rounds to signed notes, without the after-shift backlog.

Sayvant builds H&Ps, progress notes, and discharge summaries using prior documentation, relevant clinical data, patient conversations, and direct dictation.

POWERED BY

Sayvant Quality System

A physician-validated, per-note scoring standard, built with board-certified acute care physicians, that scores every chart on completeness, clinical quality, and financial defensibility.

SUPPORTED INTEGRATIONS

Sayvant has allowed us to capture the complexity of a chart without having to input a ton of information or spend a ton of time.

Vishnu Parthasarathy, MD · Medical Director, San Joaquin General Hospital

Great care deserves a chart that proves it.
