Airdrops are corrupted

Bots and duplicate accounts damage Airdrop's core value with industrial-scale farming.

⚇ Impact for community members
Fewer rewards per users, genuine users potentially left out, and rapid decrease in reward values due to dumping.

⊞ Impact for your project
Airdrop event perceived as a risk: potential negative backlash instead of positive community engagement.

Identifying true believers is a struggle

Identifying engaged users who won't cash out at launch, after the farming period is over is difficult. Current practices are broken.

▦ Complex rules
Projects often unintentionally exclude legitimate users in their efforts to block Sybil attacks.

⌤ Approximate Insights
Bots are farming airdrops on an industrial scale, making it difficult for projects to track true engagement.

⌕ Extreme verification
Social media verification is not Sybil resistant and KYC integration is not privacy preserving.

⏱ Time consuming
Teams work hard on these issues and users feel like projects are farming the farmers, season after season.

Reward genuine users with our Reputation NFT

Leverage Soulbound tokens (SBT) and Proof of Personhood (PoP) technology to identify unique users.

🎁 The best anti-bot solution, available for just a $2 fee paid by your users.

⚙ Biometric verification
First Proof of Humanity (PoH) with AI-driven biometric check.

👥 Scalable
Adapts seamlessly to any verification volume.

🔒 Privacy preserving
Biometric data converted into an encrypted, non-biometric proxy.

🌐 Universal
Available onchain via SBT or SDK integration.

⏱ Fast
10-second process for swift user humanity and uniqueness validation.

✓ Reliable
Re-authentication is possible every 2 weeks, depending on your needs.
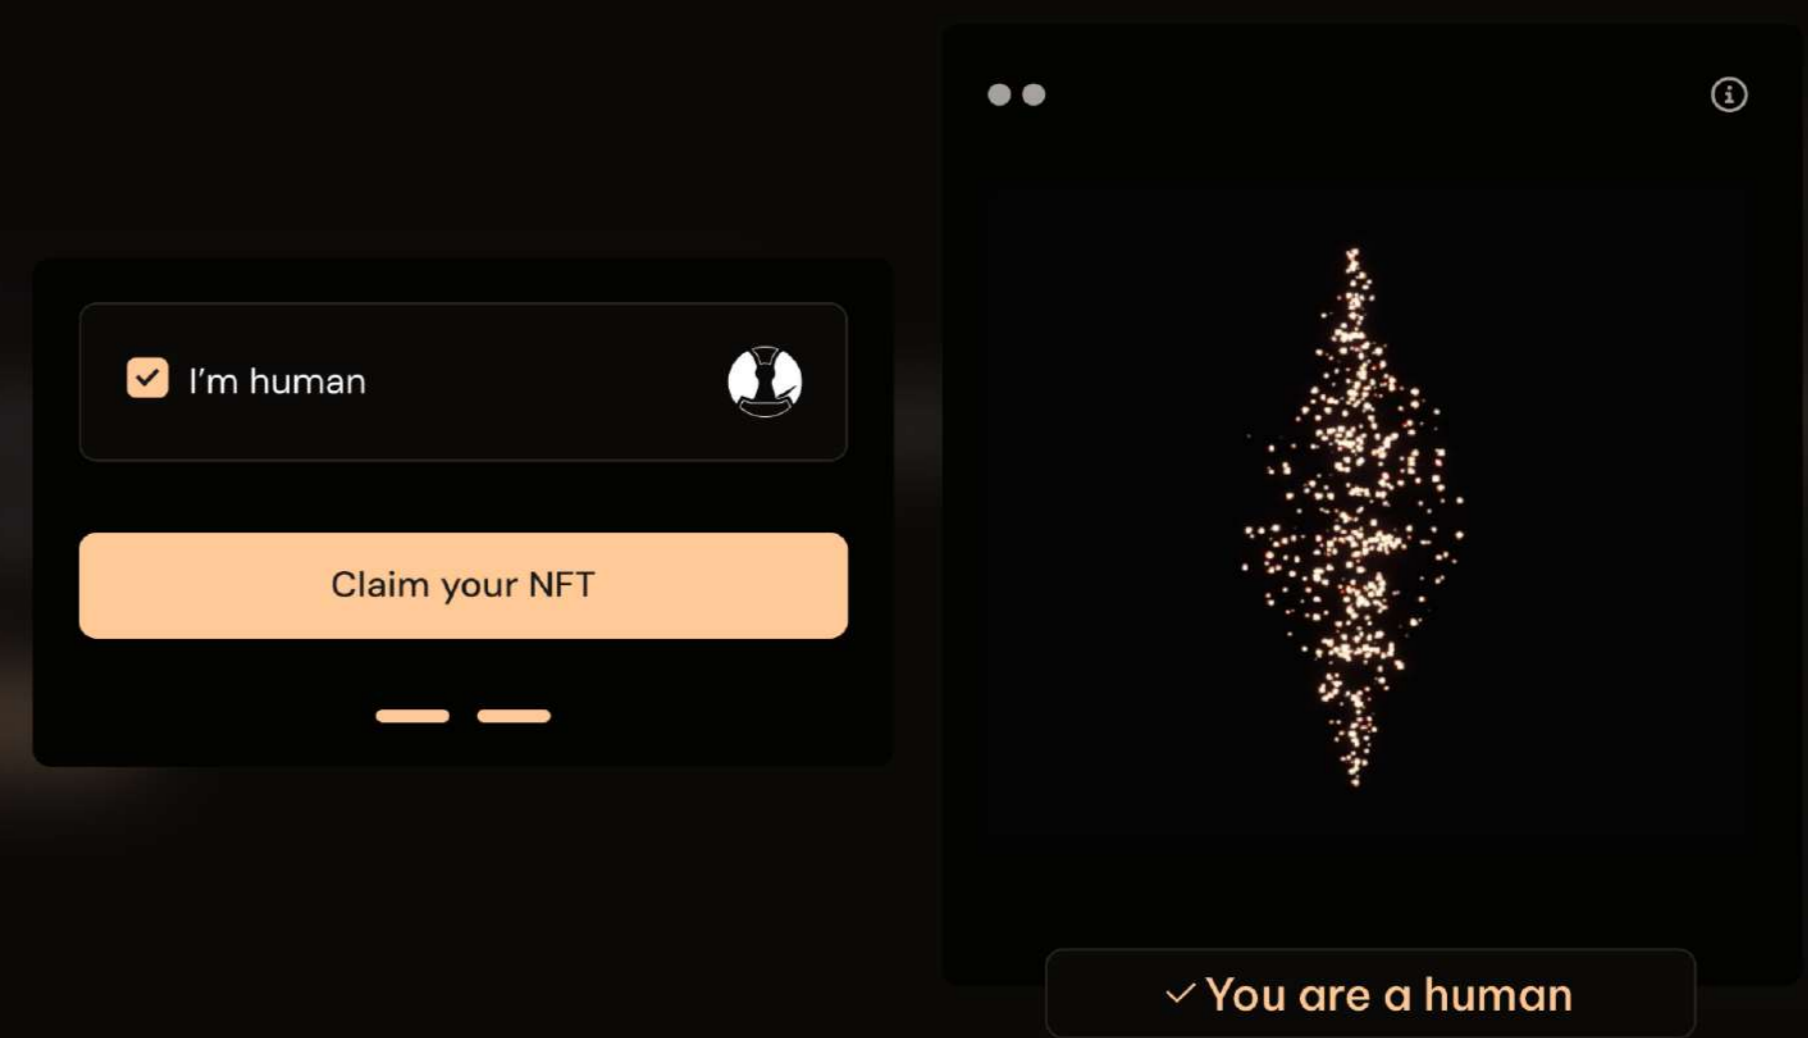

Your users' flow to claim their Reputation NFT

① Proof of Personhood challenge
✓ Users go through a face scan.
✓ Bots and duplicate users are detected.

I'm human
Start your challenge

Scan your face

② Proof of Personhood creation or update
✓ A non-biometric proxy called a FaceGraph is edited
✓ Biometric data is deleted

I'm human
Claim your NFT

✓ You are a human

③ Reputation NFT mint
✓ Chain is selected by the users
✓ A $2 minting fee is paid by the users

All blockchains Individually
