

Hi!
How has your May started?
For those that may be newer to the Cornerstone Audiology family, I wanted to take a moment to share a little about me and the beating heart of Cornerstone.
My name is Julie Hubik, and I am the proud owner and founder. 🥰
I always knew I wanted to own a business (even as a young girl) and here we are enjoying our 17th year helping people hear better in West Texas! I am an early riser and find myself on weekends, sitting with a pot of coffee at our kitchen table, writing.
I usually write about my grandparents as 3 out of the 4 of them are gone (Papaw is 92) and I have such fond memories of my time with them, I don't want to forget those special times.
If it's ok with you, I may start sharing a few of these stories in our Cornerstone newsletters. Be gracious with my stories.. I am not a professional author, just an audiologist with a love for small business and a hobby - writing.
I thought since most of you are grandparents, you may enjoy these stories and through them, you may see how special you are - how important the time is that you spend with your grandchildren, and know that they will look back when they are older and see how your involvement in their lives shaped them and they will be grateful.

If any of you are writers, I would love to read your work! Reply and share!
Overall, I wanted to say thank you for choosing Cornerstone Audiology as your preferred provider for hearing care. I am really proud of our team and our business and hope you feel as cared for as a person as you truly are.
Please let us know if you ever need anything at all!
From my family to yours.

Dr. Julie Hubik

Hola! Did You Know ...

Did you know we have a Spanish Speaking member of the team in each department?

If you know anyone who is Spanish-speaking, who could benefit from our services, please tell them that we are here and excited to get to know them!

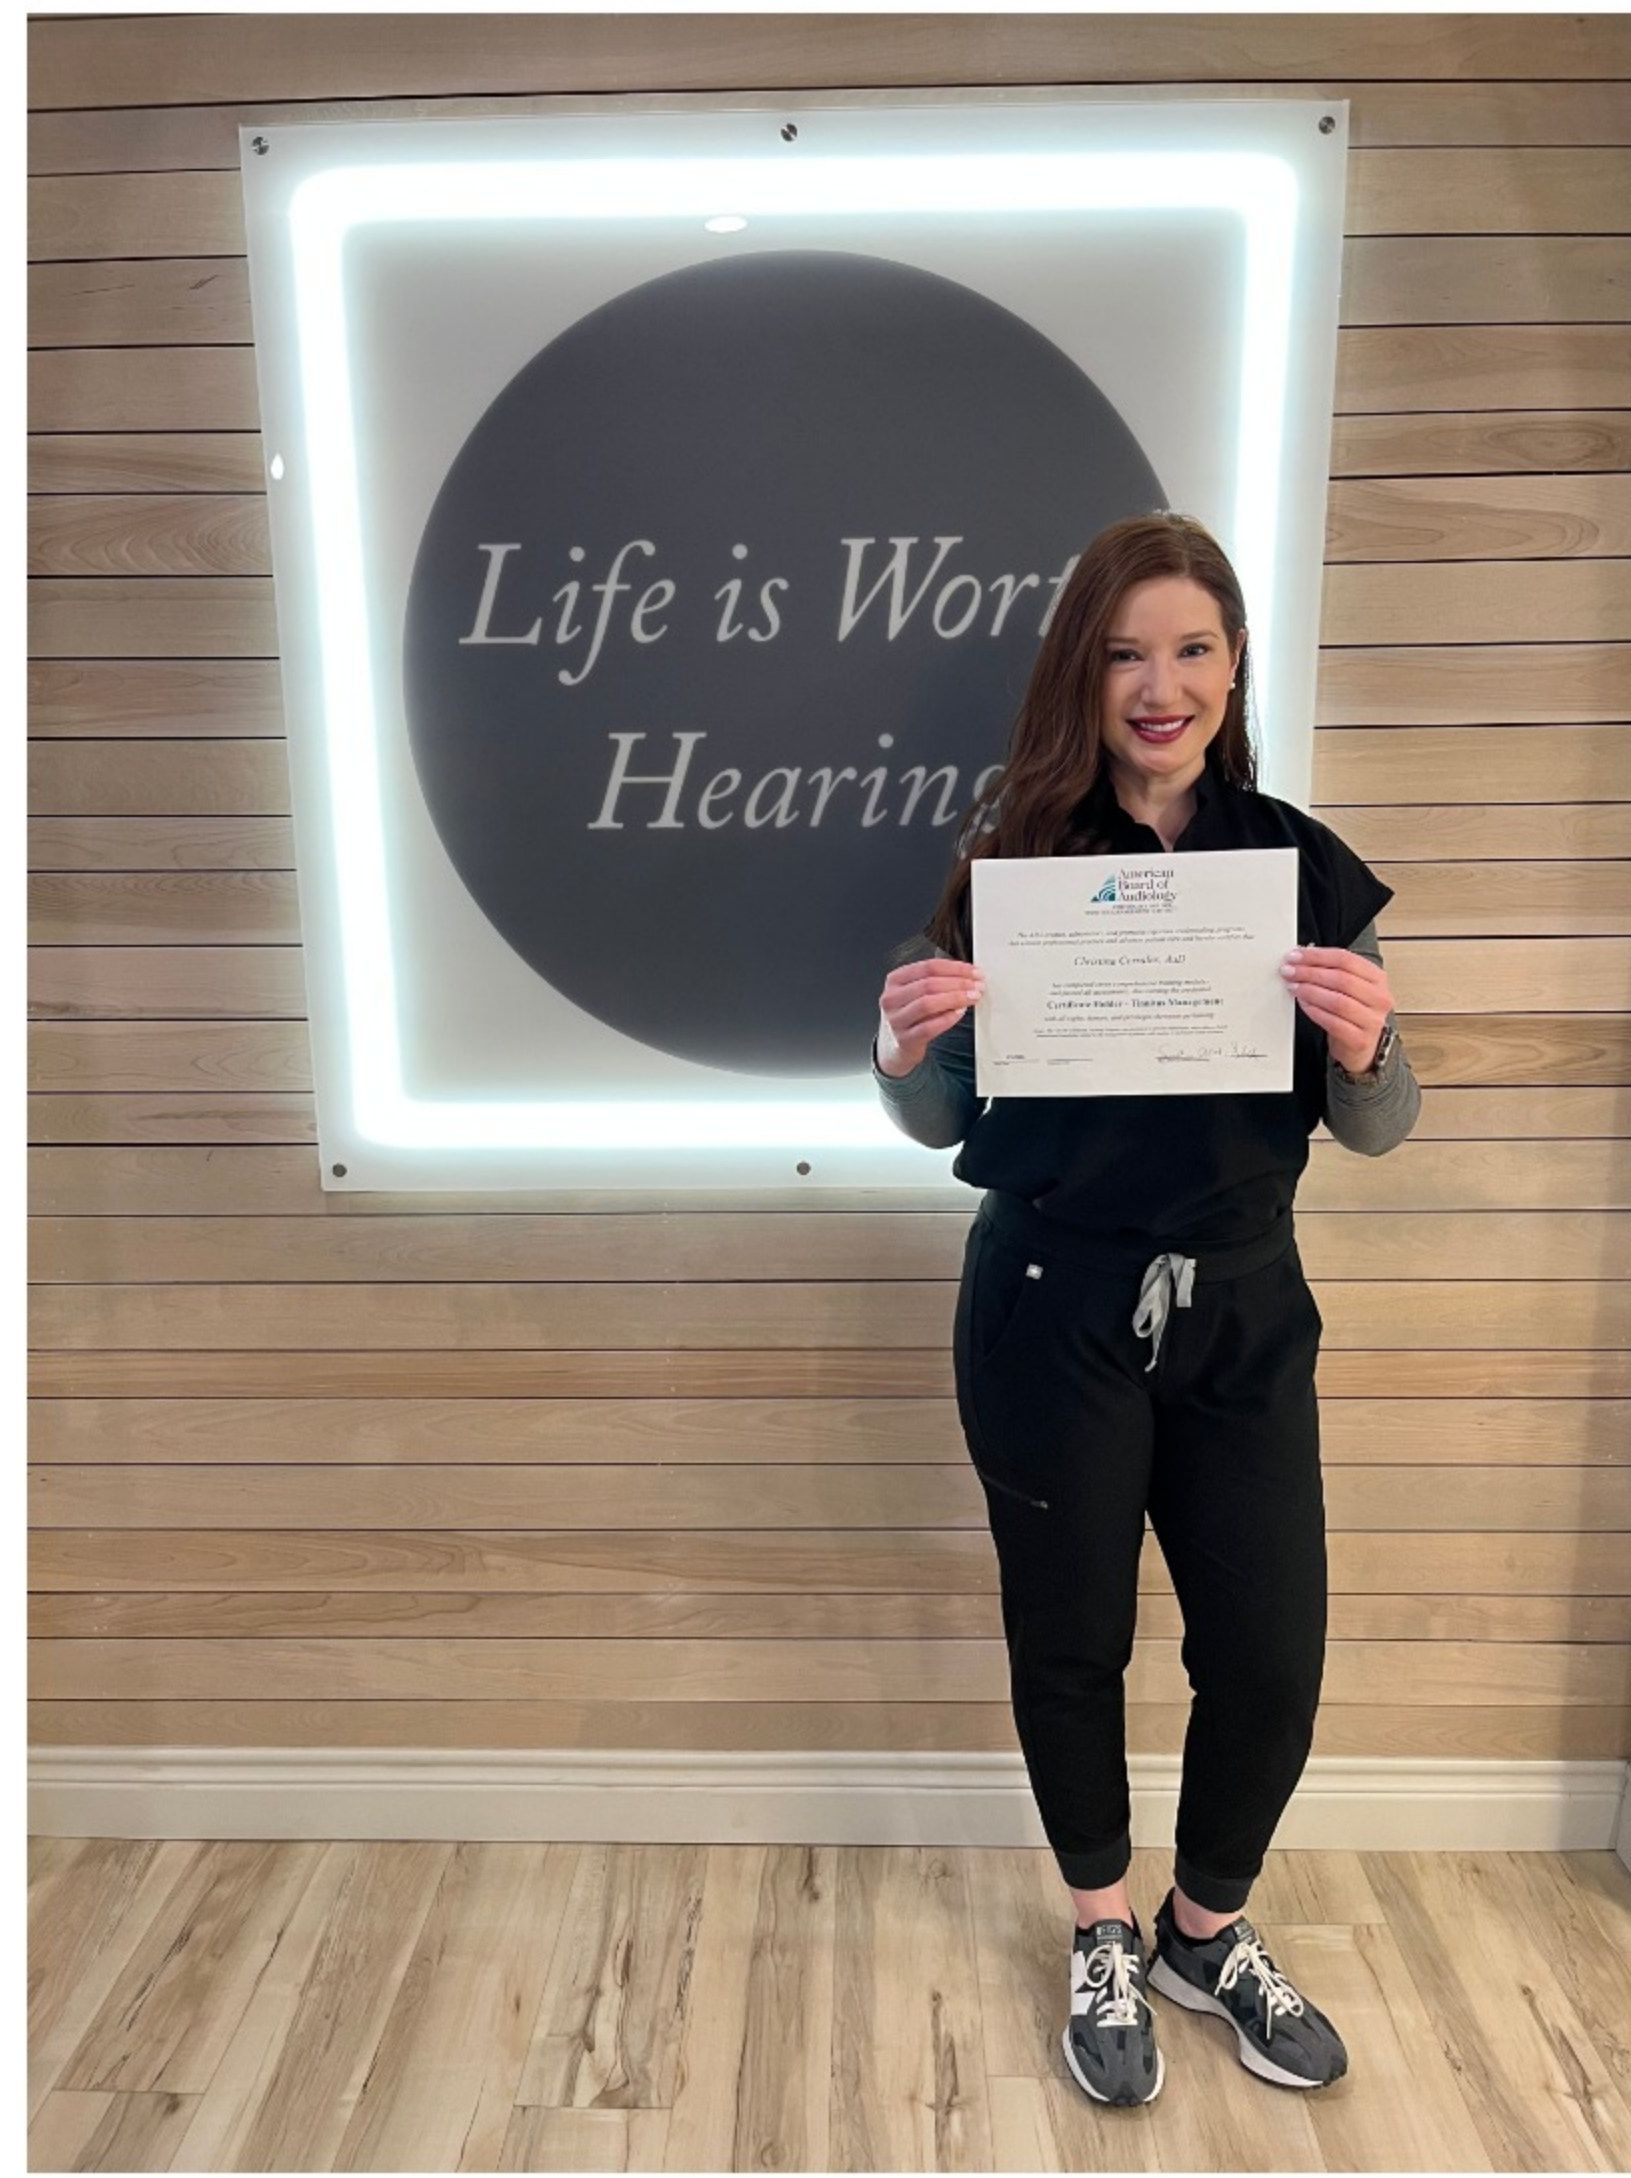

Celebrating 3 Years of Being Certified in Tinnitus Management.

Congratulations to Dr. Christina Corrales for celebrating her third year of being certified in tinnitus management on May 15th!

Dr. Corrales completed a special certification in order to help patients who have ringing in their ears back in 2021! Today marks her 3rd year of helping patients with tinnitus!

Tinnitus can be defined as ringing or roaring in the ears. Many patients describe it as mildly bothersome while others suffer from debilitating tinnitus. Sometimes tinnitus manifests as intermittent meaning that it comes and goes while other patients describe it as constant.

No matter how it presents itself, our recommendation for patients with tinnitus is to come in for a hearing test annually. Our audiologists are able to perform some specific testing for our patients with tinnitus that can help us to give recommendations to lessen the awareness of tinnitus. Call today to schedule your tinnitus assessment with Dr. Corrales today.

Are You an Android User?

If you're an Android user and get a new phone, give us a call - there have been some streaming issues with the new device and hearing aids. Your hearing aids may be due for a firmware update. We would be happy to take a look at it and troubleshoot it for you, just give us a call [806-687-4327](tel:806-687-4327)!

Local Spot of the Month

We asked our staff about their favorite local restaurants and Audiologist, Deanna Wann mentioned Garcia's over by the mall on Slide Road. We LOVE their cheese enchiladas with red sauce!

[Here's what Dr. Wann had to say \[Video\]](#)

"The Cornerstone of Mexican Food?" Go try it and you tell us!

As always, if you have any challenges or any questions, we are here for you!
Have a wonderful month from all of your friends at Cornerstone Audiology.
