

Li (Lily) Liu

Product Designer

5+ years of experience across private markets, fintech, e-commerce, and healthtech, specializing in data-intensive interfaces and complex workflows. Across fully remote roles, I've worked with product and engineering teams from research through delivery, using AI tools to explore and prototype ideas.

EXPERIENCE

PactFi (Private Markets/Fintech) | Product Designer

Apr 2025 - Aug 2026

- Led end-to-end design for Signature Blocks and Custodian Reporting, replacing manual email, spreadsheet, and document workflows with structured private-credit tools.
- Translated complex client requirements, including entity relationships, permissions, bulk actions, templates, and data dependencies, into scalable experiences.
- Partnered with product, engineering, QA, and design from workflow definition and client validation through launch and post-launch iteration.
- Used ChatGPT, Claude, and Figma Make to accelerate research synthesis, workflow exploration, UX writing, and interactive prototyping.
- Contributed across Secondary Transfers, Parent Funds, and other transaction workflows, helping clients save time and reduce email coordination.

Captain (E-Commerce) | UX Designer

Mar 2024 - Jul 2024

- Redesigned the AI concierge and sign-up experience; cost per sign-up fell from \$150 to \$7 as the result.
- Simplified product discovery through guided recommendations and pre-curated kits, iterating on feedback from cross-functional partners.

Savana Inc. (Fintech) | UX/UI Designer

Dec 2021 - Feb 2024

- Designed responsive banking experiences for Battle Bank and Woodforest National Bank, translating complex account structures, regulations, and client needs into clear workflows.
- Led the design of Battle Bank’s online account opening across personal, business, retirement, and trust products, and participated in usability testing; opening speed improved 27%.
- Designed Woodforest’s branch workflow for multiple customers and products, including multi-titling, reusable customer data, hardware-integrated ID capture, and consolidated documents and signatures.
- Partnered with product, engineering, banking specialists, clients, and a system architect to work through requirements and technical constraints.
- Contributed to the design system and designed responsive experiences aligned with WCAG 2.1 requirements.

BravoCare (Healthtech) | UX/UI Designer

May 2021 - Nov 2021

- Figma prototypes and tested mobile healthcare staffing flows, using feedback to refine how clinicians found and evaluated shifts.

SKILLS

UX/Product Design

User-centered design, product strategy, complex workflows, data-intensive interfaces, design systems, responsive design, wireframing, prototyping

Research & Collaboration

User research, usability testing, cross-functional collaboration, stakeholder engagement, design critiques

Agile & Remote Work:

Fully remote collaboration, startup environments, agile workflows, managing multiple projects and deadlines

Tools & AI

Figma, Figma Make, Claude, ChatGPT, InVision, Framer, HTML/CSS, Jira

EDUCATION

UX Academy Certificate | Designlab

Jan 2021 - Jun 2021

BA in Fashion Merchandising | Virginia Commonwealth University

Sept 2013 - May 2017
