

Why GRIFFIN365?

- Seamless Integration with Your Existing Digital Security Cameras. No Propriety Hardware is needed.
- Customize A.I. for your specific needs or unique situations.
- Proactive, Faster, and Precise Security using automation. Manual Monitoring of your security cameras is impractical and expensive.
- 24/7 Human Verification, if required, is configurable based on the type of threat.
- A user-friendly application for configuring who receives notifications based on the threat and severity.
- Preference on the method of notification: SMS, email, mobile app notifications, and more.

Self-Learning Strategy :
Employs an automated adaptive learning strategy, continually enhancing its overall accuracy.

Protecting Your Privacy. GRIFFIN365 does not retain any of your personal data. We hold a deep regard for your privacy and exclusively identify suspicious incidents to ensure the safety and security of all.

With our diverse backgrounds and expertise, we have extensive experience in multiple business and public service sectors. Our team comprises highly qualified PhDs and skilled Engineers specializing in Artificial Intelligence and Machine Learning.

You have only **seconds**, or at most a minute, to determine if a potential threat is entering your school premises.

GRIFFIN365 needs less than 5 seconds to detect the threat and send you an Alert!

You have already invested in camera equipment.

This is all achieved without the need for additional cameras or personnel. GRIFFIN365 operates 24/7/365 using existing resources, eliminating the issues associated with human monitoring.

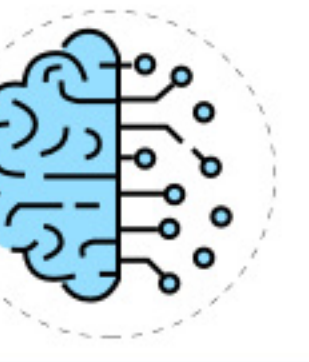

Let our software, the A.I. do the work for you, for a safer future for everyone.

A product and service provided by

Benefits of GRIFFIN365

GRIFFIN365 is a collection of Artificial Intelligence Models; we continue to develop new models based on client requirements and feedback, ensuring that we deliver the best possible solutions.

Stop threats before they escalate! We detect handguns, long guns, knives, and more, giving you crucial seconds to respond.

Weapon Detection: Proactively safeguard your premises from potential threats by instantly identifying a wide array of weapons.

Control who enters your space. Our system identifies unwanted individuals, keeping your premises secure and your people safe.

Suspicious Person Detection: Deny access to unauthorized individuals and known troublemakers, preventing disruptions and ensuring safety.

Unmask potential threats. Our system detects those hiding their faces, discouraging illegal activity and ensuring transparency.

Concealed Identity Detection: Deter criminal activity and maintain accountability by identifying those attempting to mask their identity.

See what's happening when it happens. Our system alerts you to fights, loitering, and people in distress, enabling swift action and enhancing safety.

Suspicious Activity Detection: Rapidly respond to altercations, prevent loitering, and get help to those in need, all while minimizing liability.

Leave nothing to chance. Our system spots unattended objects and suspicious packages, providing an extra layer of protection against potential harm.

Unattended Object Detection: Identify potential security threats and maintain a clutter-free environment for improved safety and aesthetics.

Keep your air clean and your environment healthy. Our system detects smoking and vaping, ensuring compliance with regulations and a safer workplace.

Smoking and Vaping Detection: Enforce smoke-free policies, protect air quality, and reduce fire risks.

Hear danger before it's too late. Our system recognizes the sounds of gunshots and distress, empowering you to take action and potentially save lives.

Acoustic Sound Detection: Get immediate alerts for gunshots and cries for help, enabling a rapid response to critical incidents.

Don't let threats hide. Our advanced technology sees through concealment, revealing weapons others can't.

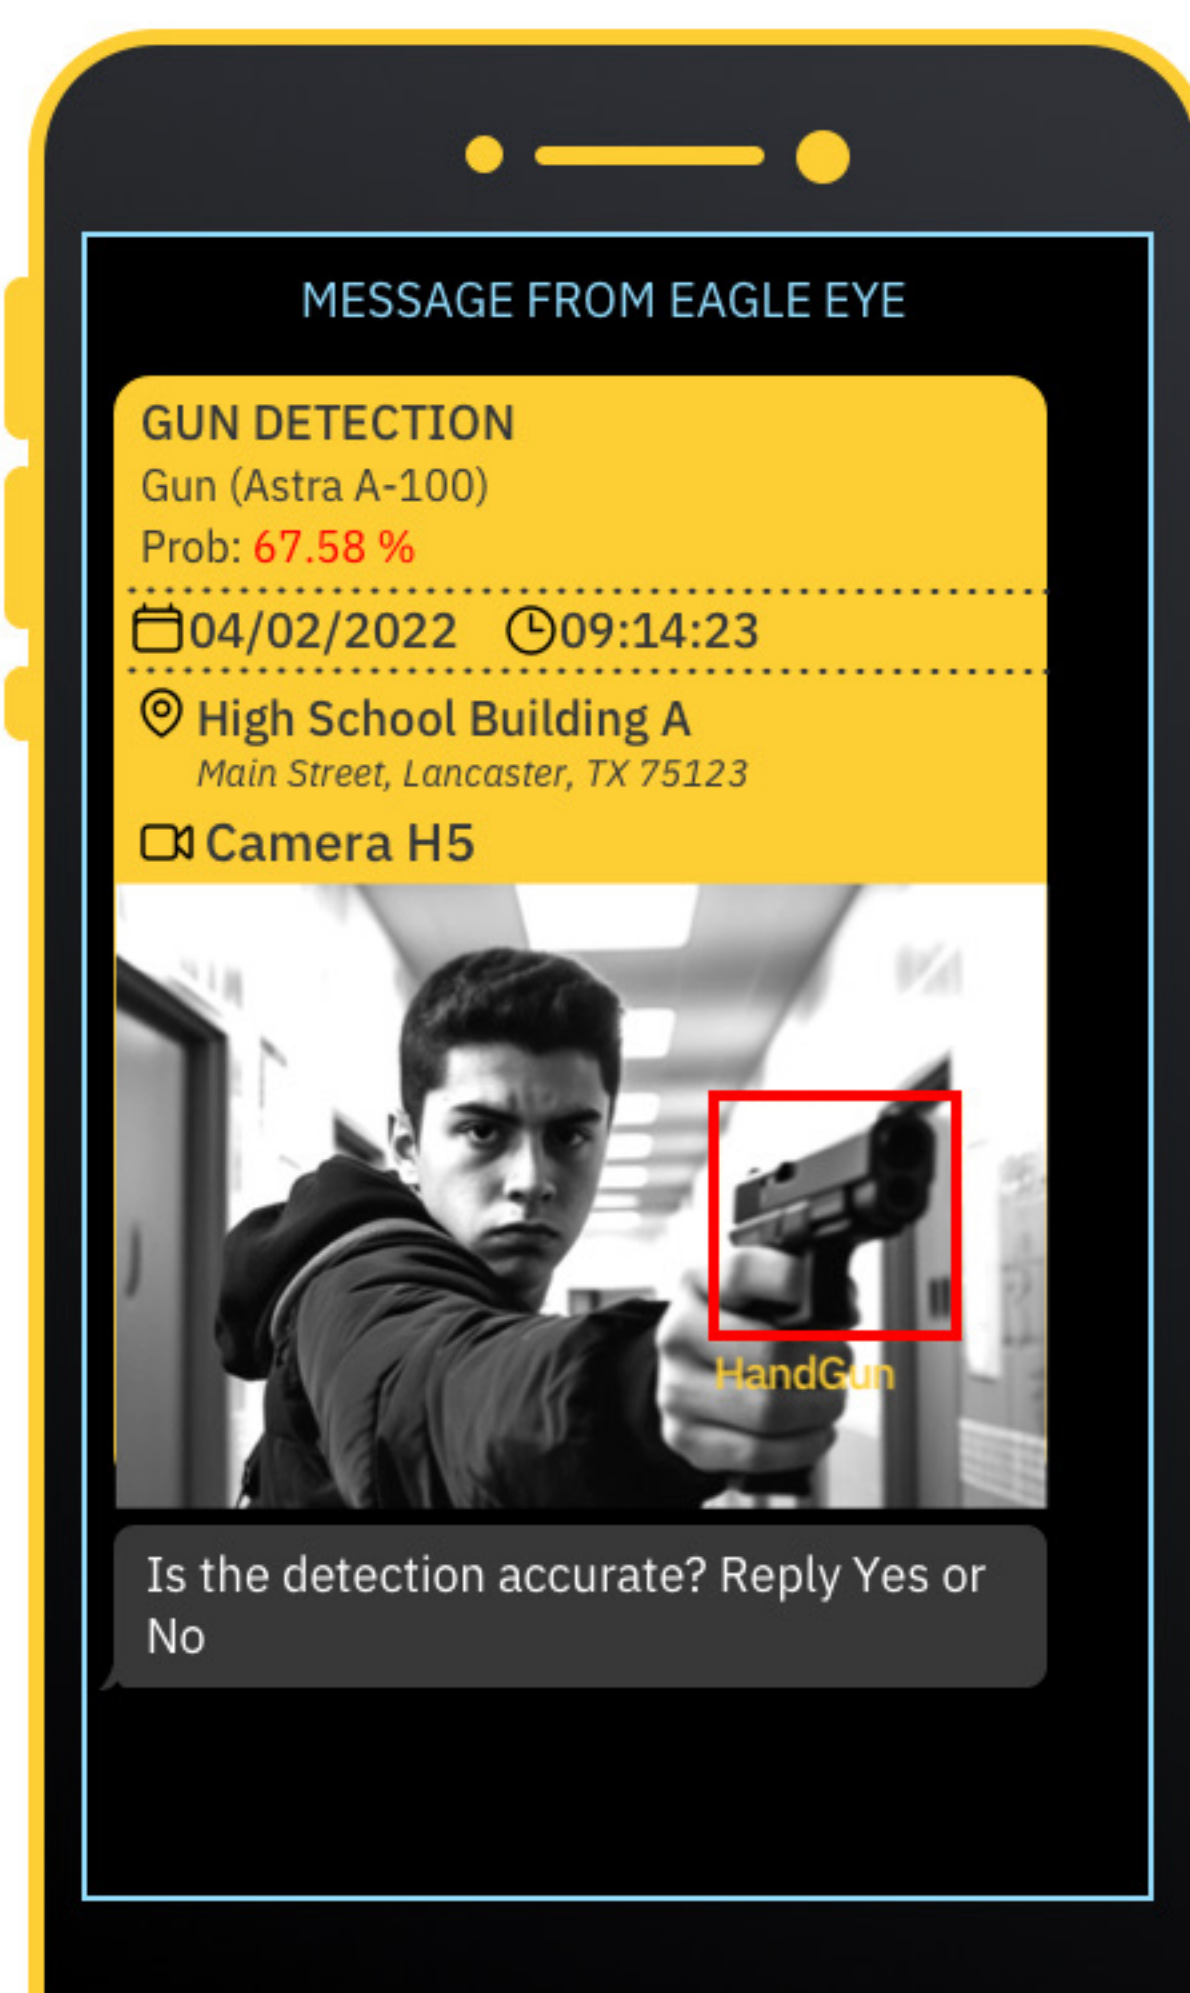

Concealed Weapons Detection (with terahertz imaging): Uncover hidden dangers and maintain a secure environment even when weapons are out of sight.

Automation : Saves Time, Saves Lives!

Knowledge is Power

Knowledge will save lives. In less than 5 seconds, you will know you need to act based on the information you receive. An image of the suspicious event and the location are vital details to help authorities take the appropriate action.

Alerts can be sent to messaging systems and also panic alert systems so it can initiate lockdown procedures.

Customization for Client Needs

WHY WE ARE A BETTER SOLUTION!

Apart from the items mentioned earlier, we can also monitor specific conditions based on the client's requirements. Currently, we are tasked with detecting baseball bats and opaque backpacks. Furthermore, we are identifying clothing associated with gang members and preventing their access to a school campus. Based on the client's need, we will create and train the A.I. to detect and alert for these unique situations.

How Griffin365 works ...
