EDUCATION

Florida Atlantic University
2022-2027
Bachelor of Architecture

GPA: 3.8

Relevant Coursework:

Design 8
Structures 3
Robot Toolpathing
Environmental Technologies 2
Materials & Methods of Cons.

PROFILE

I'm an aspiring designer finishing my fourth year in Florida Atlantic University's Architecture program. I'm well versed in multiple different software applications and can learn very quickly. I have established a firm foundation in design through various internships and my academic studies. Once I graduate, I plan on working toward licensure or other opportunities to expand my knowledge of construction.

EXPERIENCE

Architecture Intern 2024 Summer, 2025 Summer
Meld Studio Architecture Melbourne, Florida

Worked at every stage of the design process including as-builts, redlining, code research, schedules, and portfolio documentation. Through my experience at Meld, I have become proficient in AutoCAD and assisting in the design process. I routinely worked on residential, commercial, and civil construction projects with multiple phases and hundreds of structures.

Civil Engineering Intern 2023 Summer
Morgan & Associates Melbourne, Florida
Consulting Engineers Inc.

Gained experience in office as well as in the field drafting subsurface infrastructure for large scale residential developments and surveying. My role as a field technician provided insightful on-site experience shaping my understanding of the construction process from start to end.

Landscaping and Renovation 2020 Summer, 2021 Summer,
Dalles, Oregon 2022 Summer

Renovated and maintained multiple rental properties where I constructed retaining walls, paths, and interior finishing. This role planted deep roots within my understanding of the built environment.
