THE NEW
MULTITOOL PRO

- Connect up to 12 SafeGauge sensors simultaneously
- Real time data logging and graphing
- Create custom reports with sensor comparison
- Export data and save machine history
- Intuitive touch-screen interface with plug and play setup
- Rugged IP68 designed device - heavy duty applications
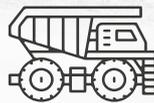

AUSTRALIAN MADE®

Maximise Safety

Eliminate Live Work

Wireless up to 50m

Purpose Built for Heavy Industry

The new **SafeGauge MultiTool Pro** takes Elimination of Live Work (ELW) to the next level - allowing maintenance technicians to seamlessly connect and monitor up to 12 SafeGauge sensors simultaneously, from up to 100m (328ft) away.

The intuitive 'plug-and-play' touchscreen interface comes packed with a host of new features, including data-logging and graphing, with the ability to generate comprehensive reports that can be exported and shared via in-built cloud connectivity.

Fit for industry heavy duty applications, it comes in a rugged IP68 designed casing, with attached stylus pen.

"The MultiTool Pro has revolutionised our approach to live machinery maintenance. We can connect and test many machine parameters at any one time wirelessly, making the process even more streamlined.

This allows for efficient testing, data logging and customised reporting. It even has test templates to save time on set up and data logging reports to document and analyse intermittent faults, making troubleshooting much easier. Data logging is key in diagnosing more elusive faults."
