

Terje Salomonsson

Practical and hands-on technician with many years of experience in installation and service, primarily within HVAC and plumbing systems. Having worked as a technician, project manager and co-owner, I am now looking for new challenges with a focus on technical development and continuous learning. From January 2025 to summer 2026, I completed further education in robotics and automation programming, gaining knowledge in PLC programming, industrial networks and electrical engineering. I am a natural problem-solver, curious and detail-oriented, and accustomed to working both independently and as part of a team.
