Kenya Passion Fruit

Purple passion fruit grown in Kenya's cool highlands above 1,500m — deep-coloured, aromatic fruit picked three-quarter ripe for export to the EU and Middle East.

QUICK FACTS

Country of Origin	Kenya
Growing Region	Highland zones 1,200–2,000m (Central Kenya, Rift Valley)
Processing	Hand-picked at three-quarter ripe stage, packhouse graded
Harvest Season	Two peaks: Jul–Aug and Dec–Jan
Available Grades	Purple passion (export grade); yellow passion (domestic/processing)
Typical Lead Time	Confirmed per order

SPECIFICATION

HS Code	0810.90
Packaging	Ventilated export cartons; cooled and held at 10–12°C post-harvest
Certifications	GlobalGAP, KEPHIS phytosanitary certification
Typical Export Markets	EU, Middle East

OVERVIEW

Purple passion fruit is Kenya's principal export variety, grown in cooler highland zones between roughly 1,200m and 2,000m where the fruit develops a smaller, sweeter profile than lowland yellow passion. Export fruit is picked at three-quarter ripeness with deep purple skin colour, then cooled quickly to extend post-harvest shelf life.
