Summary

UI/UX Designer with experience designing responsive web products, scalable design systems, and intuitive user interfaces using Figma. Skilled at translating business requirements into user-centered digital experiences through thoughtful UX and visual design.

Professional Projects

Ronak Advertising ([View Project →](#))

- Designed a complete website for an advertising company, aligning its visual direction with the brand's established identity.
- Developed cohesive page structures and visual layouts to present services and company information effectively.
- Optimized layouts for desktop, tablet, and mobile to ensure consistent usability across screen sizes.

La Nova ([View Project →](#))

- Designed a premium salon and skincare website that reinforced the brand's luxury identity while showcasing its technology- and data-driven treatments.
- Applied consistent brand identity with refined animations and interactions to create an engaging, high-end user experience.
- Crafted responsive, user-focused layouts with clear information architecture for seamless content discovery.

Airithm ([View Project →](#))

- Designed 30+ responsive screens for an AI testing platform, ensuring a consistent brand identity across the product.
- Implemented seamless navigation and clean interactions to deliver an intuitive and user-friendly experience.
- Built reusable UI components and maintained design consistency for efficient development handoff.
