

UPTIVO BRIDGE

The Bridge is the core of the Uptivo solution at your Club: it acts as a receiver for heart rate sensors' telemetry to display individual and group based real-time training zones on a screen or projector, improving members motivation and giving trainers a powerful tool to assist their trainees. The Bridge connects to the Club's Ethernet or WiFi network and stores all the training data to the Uptivo Cloud.

LIVE HEART RATE MONITORING

Automatic and manual trainings

SENSORS COMPATIBILITY

Bluetooth: Uptivo Belt and Belt-M, Polar H7 and H10, Suunto Smart Sensor

ANT+: all ANT+ heart rate sensors

UPTIVO CLOUD CONNECTIVITY

Ethernet or WiFi network

USER DATA MEASUREMENT

Heartbeat, HRMax percentage, training zones, time spent in each training zone, calories burned, UPPs (Uptivo Performance Points) and Target Zone

SIMULTANEOUS USERS

Unlimited

USER TILES DISPLAY OPTION

4, 9, 16, 25 (with automatic rotation)

TECHNICAL FEATURES

NETWORK	100M/1000M Base-T	WEIGHT	0.5 kg
WiFi SUPPORT	2.4/5 GHz - WiFi 802.11 bgn/802.11 ac	SIZE	115 x 115 x 20 mm
AUDIO/VIDEO OUTPUT	HDMI, 720p and 1080p resolution	OPERATING TEMPERATURE	from -10°C to 40°C
POWER SUPPLY	AC 100V-240V (50/60Hz) - DC 5V/3A	CERTIFICATIONS	CE, RoHs, FCC
