Profile

UX / UI designer with 2 years of experience and a bachelor's degree in UX / UI Design, mixing business goals with user-centered design. I create intuitive interfaces based on research and Design Thinking methodology, optimizing conversion paths and key metrics.

Experience

2 YEARS AS UX / UI Designer at Freelance, Remote

I designed a No Code site that brought in 12% revenue in the first month.

Using SEO, I improved the client's site to the top five search results.

I have conducted the startup's full UX / UI processes, creating user flows, site maps and a 150+ element Design System for desktop and mobile devices. I actively participated in usage studies and stakeholder meetings.

2 YEARS AS Regular QA Engineer at Luxoft, Remote

As a QA Engineer at Luxoft, I have been helping providing the highest possible data quality, with different projects in automotive category. I am currently working on developing artificial intelligence to reduce the number of rule violations in bus lanes across the United States.
