Real data, empty states and error states first. Then every pixel.

01 Profile

Product designer with nearly 3 years across B2B platforms and consumer mobile apps. I design prototypes, dashboards, design systems and AI features, and I start with the screens that break, like the fund nobody has mapped yet or the question the AI can't answer.

02 Experience

Product Designer KFinTech, Hyderabad, India

Jan 2025 – Present

- Led design of AEGIX, an investor relations platform, from a 14-screen first version made in 2 days to launch in April 2026 with 4 client companies. The first client signed on my Figma prototype before the build.
- Specified Ask AiRa, its AI assistant, which answers only from portal data and shows a draft to confirm before it books a meeting.
- One of 3 product designers on a new KYC registration agency (KYC is India's investor identity check). Drew the first drafts of registration, KYC entry and KYC review; live on launch day, 30 April 2025.
- Started a design system for KFinTech's next products on my own (Aug–Oct 2026): 439 tokens and 94 components in Figma and React, contrast checked by the numbers, and all 432 Button renders matching Figma.

Founding Product Designer Burpy, remote

Jun 2024 – Jan 2025

Design Intern Burpy, remote

Dec 2023 – May 2024

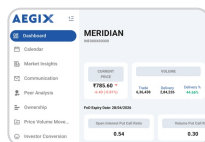

- First designer at an AI food and health startup, from my final year of college. Designed flows for all 12 app areas, about 500 Android screens; 8 areas and 3 AI features reached a private beta in June 2024.
- Designed and built the waitlist website in Framer.

Graphic Design Intern and Freelancer startups and small businesses

2022 – 2023

03 Selected work

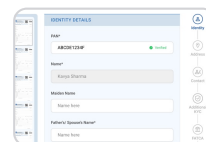

Each one opens the full case

AEGIX investor relations platform

Who really owns a company's shares. A 2-day first version, then 4 live client companies.

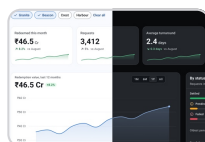

amandeepux.com/work/ir-portal

KYC Registry Platform

Scanned paper forms to checked records. OCR fills 66 fields; people check each one.

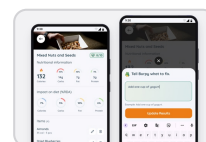

amandeepux.com/work/kyc-registry

Design system in Figma and React

94 components, and all 432 Button renders match Figma in light and dark.

amandeepux.com/work/design-system

Burpy, an AI health app

Built for how India eats. When the AI guesses a meal wrong, you fix it in plain words.
