HUMIFOR Revitalizer Ca is built for growers looking to put meaningful material back into the soil while also adding a calcium component. It helps support soil conditioning, nutrient exchange, root-zone development, and long-term soil resilience, especially in programs focused on improving soil performance over time.

Humic acid content verified using both California Method HA4/JC and ISO 19822 analytical methods.

DIRECTIONS FOR USE

Apply HUMIFOR Revitalizer Ca as part of a soil fertility program. Rates vary based on crop, soil conditions, and application method. Conduct a soil test and consult your agronomist for more precise application rates.

Apply during pre-emergence and during vegetative stages in row crops. For horticultural crops, apply throughout the growing season.
