

eurammon marks 30 years of natural refrigerants at Chillventa

HALL
4

STAND
4-461

13–15 October 2026
together with IIAR

Nuremberg, 13 October 2026. eurammon is marking its 30th anniversary at Chillventa with a focus on the practical application of natural refrigerants. At its anniversary briefing, the association brings together Rob Vandenboer, Chair of eurammon, Michael Freiherr, Vice Chair, and founding member companies to recognise their contribution and look back at how the sector has changed since 1996 and set out eurammon's priorities for the years ahead.

Founding member companies represented include TH. WITT Kältemaschinenfabrik GmbH, Güntner GmbH & Co. KG, GEA Refrigeration, Johnson Controls Systems & Service GmbH, FUCHS LUBRICANTS GERMANY GmbH and Danfoss GmbH.

The anniversary connects eurammon's history with a continuing task: making technical knowledge and application experience accessible to those who select, design and operate refrigeration, air conditioning and heat pump systems.

Recognising the founding members

eurammon is honouring its founding member companies for their longstanding support of the association and its work on natural refrigerants. The recognition highlights the role of cooperation and the exchange of experience in developing practical solutions.

From experience to practical guidance

An anniversary publication brings together historical perspectives, interviews and contributions from the eurammon network. Alongside it, a technical selection guide addresses natural refrigerants across refrigeration, air conditioning and heat pump applications, connecting technology mapping with proven use cases.

Download the press briefing package here: eurammon.com/news/eurammon-at-chillventa-2026

The guide is also the subject of a presentation on Thursday, 15 October, from 13:40 to 14:20 in the "Fachforum" in Hall 8. During the fair, eurammon is organising guided student tours to member stands to encourage exchange between industry and future technicians and engineers.

Visitors can meet eurammon and its partner, the International Institute of All Natural Refrigeration (IIAR), in Hall 4, booth 4-461, throughout Chillventa, from 13 to 15 October.

ABOUT EURAMMON

Founded in 1996, eurammon is an international association of companies, institutions and individuals promoting the use of natural refrigerants in refrigeration, air conditioning and heat pump technologies. Its members share technical expertise and application experience to increase awareness and acceptance of natural refrigerants worldwide. Through its international network, publications and industry exchanges, eurammon supports a sustainable approach to cooling and heating.
