Police busts biggest data breach in India
66.9 cr individuals & firms

A person was found selling personal and sensitive data of 66.9 crore individuals and organisations.

India Needs Digital Public Infrastructure Strategy

The government announced a strategy to build a digital public infrastructure (DPI) on June 12, when sensitive personal data such as names and vaccination status of immunisable people was leaked through a Telegram bot. Such a bot (Santosh) is being used by the Indian Ministry of Electronics and Information Technology on June 12 and 13. The strategy is the G20 president's vision, showcasing Digital India and Aadhaar, underlining ways in which they

India data breach in 2023: Report

India was phishing, says IBM report
IBM PIVOT came in 2023, an all-time high according to IBM Security's Cost of a Data Breach report.

Protection Bill

Data Protection (DPDP) Bill, 2023, was introduced in the Lok Sabha on August 2 by Minister for Electronics and Information Technology.

India to require cybersecurity incident reporting within six hours

The Indian government has issued new directives requiring organizations to report cybersecurity incidents to CERT-IN within six hours, even if those incidents are part of a vulnerability scan of computer systems.

Air India data breach: Login ids, passwords of airline's B2B customers compromised

Days after Akasa Air's data breach incident, now Air India's data has also been compromised. The airline has been unable to log in B2B customers starting the compromise of login user IDs and passwords of a limited number of B2B clients. The data compromise happened at an India GST portal which is provided by Navya Solutions Ltd. The compromised user IDs and passwords have been used by an unauthorised party to access their GST invoices and publish them in the public domain during the email was issued by the company.

2023 Thales Cloud Security Report Reveals Cloud Assets As One Of The Biggest Targets For Cyberattacks In India

Thales today announced the release of the 2023 Thales Cloud Security Study, its annual assessment on the latest cloud security threats, trends and emerging risks based on a survey of nearly 3,000 IT and security professionals across 12 countries. This year's study found that more than a third (33%) of respondents in India have experienced a data breach in their cloud environment last year, compared to 37% in 2022. In addition, human error was reported as the leading cause of cloud data breaches by over half of those surveyed (52% in India, 55% globally).

India's HDB Financial Services flags third-party data breach

HDB Financial Services, the non-bank lending unit of India's top private lender HDFC Bank, has disclosed a data breach at one of its service providers which processes customer information.

Hackers attempt to sell personal data of 1.5 million women

The data was posted for sale on a dark web following an alleged data breach.

India's HDB Financial Services flags third-party data breach

HDB Financial Services, the non-bank lending unit of India's top private lender HDFC Bank, has disclosed a data breach at one of its service providers which processes customer information.

Hackers attempt to sell personal data of 1.5 million women

The data was posted for sale on a dark web following an alleged data breach. The alleged data breach was discovered during the hack and posted on Telegram. The seller, who was offering the entire database for US\$500.

Upstox data breach for market intermediaries

Upstox, one of the largest discount broking firms in India, has disclosed a data breach in its systems, resulting in the exposure of its customer data. Though Upstox did not specify how many of its records were exposed, the company's records suggest at least 25 lakh customers' data was exposed.

Juspay data breach could have reaching consequences

The signature of the Juspay data breach is far from over. There's a huge cache of critical customer data and although some of the data might be encrypted, it's just a matter of time before hackers crack the code.

Cyberabad Police busts biggest data theft, info of 66.9 cr individuals & firms compromised

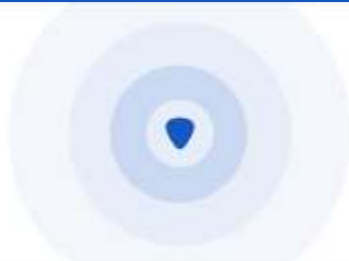

In massive data theft, a person was found selling personal and sensitive data of 66.9 crore individuals and organisations.

Regain control of your risk management

Instant

View real-time risks, address threats promptly, get alerted to risk exposure, and immediately generate reports

Centralized

Continuously monitor, gather evidence, assess and remediate risks all in a single unified platform

Automated

Remove the inefficiencies and manual work of assessing your attack surface and that of your supply chain

An all-in-one solution to manage your cyber risk

Breach Risk

Attack Surface Management

- ✓ Continuously monitor domains & IPs
- ✓ Detect data leaks
- ✓ Report on & remediate risks

Vendor Risk

Third-Party Risk Management

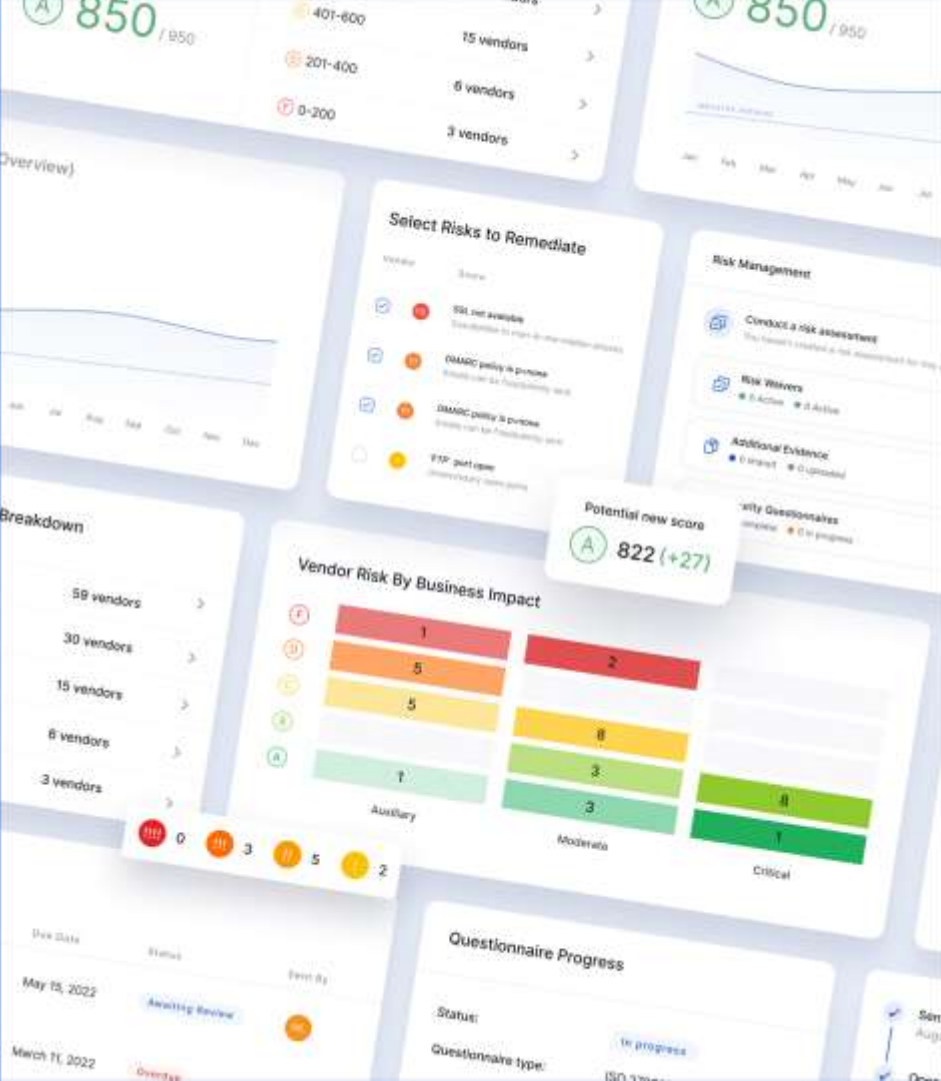

- ✓ Continuously monitor your vendors
- ✓ Assess questionnaires & evidence
- ✓ Remediate risk with built-in workflows

Trust Exchange

Trust Management

- ✓ Automate security questionnaires
- ✓ Proactively share your security posture
- ✓ Collaborate with other teams

The Platform |

Voted #1 Third Party & Supplier Risk Management Software for 2+ Years

Meet your Third-Party Risk Management Requirements

90% of G2 reviewers are satisfied with our ability to meet their third-party risk management requirements. Gain visibility of your third-party attack surface with continuous attack surface monitoring, instant security ratings, and third-party data leak detection capabilities.

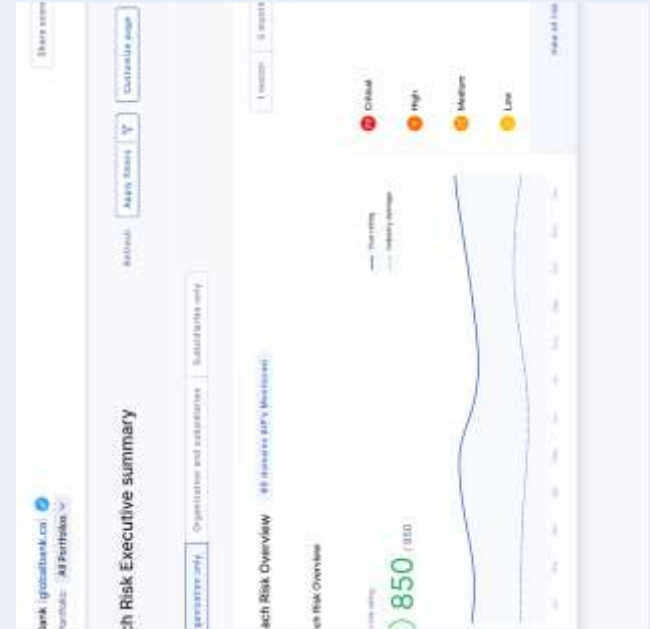

Easy and Intuitive Vendor Risk Workflows

94% of G2 reviewers find the platform easy to use. Automate your vendor risk assessments with pre-built security questionnaires, and accelerate the third-party remediation process with data-driven insights into high-risk threats and vulnerabilities.

Breach risk

Prevent data breaches and manage your attack surface with
Breach Risk

Uphold your organization's reputation by understanding the risks impacting your external security posture, and know that your assets are always monitored and protected.

Breach risk

Data leak detection

Protect your brand, intellectual property and customer data with timely detection of data leaks and avoid data breaches

Continuous monitoring

Get real-time information and manage exposures, including domains, IPs, and employee credentials

Attack surface reduction

Reduce your attack surface by discovering exploitable vulnerabilities and domains at risk of typosquatting

Shared security profile

Eliminate having to answer security questionnaires by creating an UpGuard Shared Profile

Workflows and waivers

Simplify and accelerate how you remediate issues, waive risks, and respond to security queries

Reporting and insights

Access tailor-made reports for different stakeholders, and view information about your external attack surface

Vendor risk

End-to-end cyber risk management for third-party vendors

Automate your third party risk assessment workflows, and get instant notifications about your vendors' security, all in one centralized dashboard with our Vendor Risk.

Vendor risk

Product Features

Security questionnaires

Automate security questionnaires with workflows to get deeper insights into your vendors' security

Security ratings

Instantly understand your vendors' security posture with our data driven, objective and dynamic security ratings

Risk assessments

Let us guide you each step of the way from gathering evidence, assessing risks, and requesting remediation

Monitor vendor risk

Monitor your vendors daily and view the details to understand what risks are impacting a vendor's security posture

Reporting and insights

UpGuard's Reports Library makes it easier and faster for you to access tailor-made reports for different stakeholders

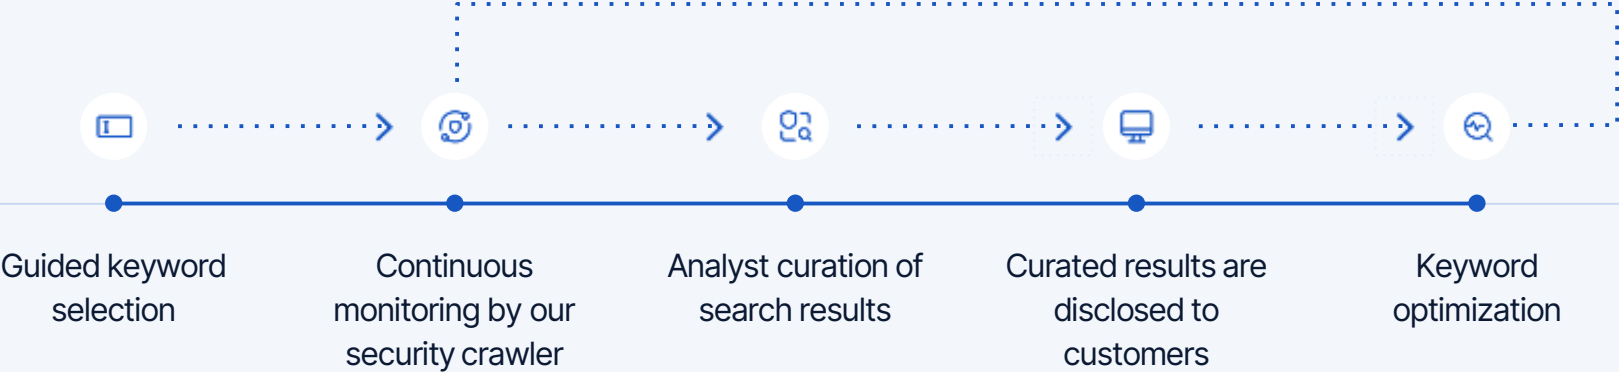

Managed vendor assessments

Let our expert analysts conduct your vendor assessments in half the time
