Date: 16/01/2024	**Policy No: 1**
Doc No: Team Management	**Version: 1**

All team officials, parents/guardians and players.

This policy contains important information that affects the processes our members use.

Medical Conditions

1.1 Subject	Monaro Panthers Club policy on the responsibilities and duties of team officials, parents/guardians and players in regards to medical conditions.
1.2 Purpose	To inform team officials, parents/guardians and players of the duties and responsibilities in regard to pre-existing medical conditions when being registered with the club.
1.3 Principle	At the Monaro Panthers Football Club, we aim to improve conditions for members who are participating in training and competition matches.
1.4 Responsibilities	Players or parents/guardians with children registered with the club, with any specific medical conditions, must make their own arrangements to ensure that they and other persons are able to participate safely. Disclosure must be made to the Monaro Panthers Football Club by players or parents/guardians with children registered with the club, of any specific medical conditions, on Form T – Player Medical Profile (Information Form), and forwarded to the club Registrar, prior to participating in competition matches or training, to enable the club to be aware of any personal arrangements to be made if required. Disclosure is to ensure that the appropriate medical attention is given to the player in the event of an emergency or appropriate medical information is supplied to trained medical persons in the event of an emergency. This is also to ensure that the coaches and managers are aware of any medical condition that may affect any individual player.
1.5 Privacy	All information is confidential. Access will be limited to Monaro Panthers Football Club officials and immediate team staff only.
1.6 Medications	Managers or coaches must NOT administer any medication at any time to any player. Players who are currently taking any medication will advise the team management of this and the player or parent/guardian is responsible for the care and administering of the medication. Players are advised they are responsible to bring their own supply of Panadol / Aspirin for personal use. The only exception is where a person is suitably medically qualified and accurate records are kept.
1.7 Impact on Health and Safety	This policy requires a disclosure by parents/guardians or registered players to be made to the club. Coaches/Managers are advised that they should be alert to a player's needs and requirements at training and matches.
