WORK EXPERIENCE

SeeMe

New York, NY

UI UX Design Manager

March 2026 – Present

- Own end-to-end product design for SeeMe's platform, delivering production-ready experiences aligned with business goals and leadership direction.
- Author and maintain Product Requirements Documents (PRDs), translating strategic initiatives into clear, actionable specs for engineering and design teams.

UI UX Intern

September 2025 – March 2026

- Built high-fidelity Figma wireframes and leveraged AI-powered prototyping tools to rapidly create and iterate on product concepts, reducing time from idea to testable prototype and accelerating stakeholder feedback cycles.
- Designed scalable UI library for complex AI behaviors, increasing user trust and driving a 40% engagement lift in the SeeMe 3.0 release.
- Expanded and standardized the design system with design tokens, reusable components, and usage guidelines, reducing design-to-engineering handoff time by 50%.
- Drive data-informed design decisions through user research, usability testing, and tracking key product metrics to improve user experience and platform growth.

Big Break Foundation

Orlando, FL

Digital Experience Specialist

May 2025 - September 2025

- Directed research-driven digital experiences leveraging behavioral insights and content analytics to increase audience engagement by 60% within one quarter.
- Partnered with marketing and growth teams to define requirements, optimize content workflows, and deliver continuous user-centred improvements across digital channels.
- Analyzed user behaviour patterns and voice-of-customer insights to inform content strategy, refine formats, and drive ongoing experience enhancements.

Infosys

Pune, IN

Lead User Experience Designer

February 2021 – August 2023

- Implemented UX strategy and end-to-end design for 50+ B2B SaaS products, defining workflows, dashboards, and frameworks that improved engagement by an average of 30%.
- Created complex enterprise user interfaces that resolved 45% of usability issues and accelerated digital transformation for global clients.
- Developed interactive prototype-led proposals that secured three enterprise accounts, contributing to a 2% expansion in the business portfolio.

Qure.ai

Mumbai, IN

Product Designer

Jan 2020 – November 2020

- Defined human-AI workflows for medical imaging large language models (LLMs), turning complex model outputs into interpretable interactions that reduced diagnostic turnaround time by 85%.
- Conducted contextual inquiries and usability tests with 20+ clinicians, translating findings into product requirements and resolving 30+ critical usability issues.
- Collaborated with ML engineers and executives to align AI model behaviors with clinician mental models, increasing trust and adoption of AI-assisted decisions.
